

# **NOTICE OF GENERAL AIR QUALITY OPERATING PERMIT FOR CONCRETE PLANTS OPERATING IN SOUTH DAKOTA**

The South Dakota Department of Agriculture and Natural Resources (DANR) is proposing to renew four general air quality permits for concrete plants operating throughout the State of South Dakota. The permits will cover both stationary and portable concrete plants with potential emissions less than 100 tons per year. These permits will replace the previous general permits for concrete plants DANR issued on February 8, 2021.

The proposed general permits identify who may seek coverage under the permit, the general permit requirements, air pollution limits, compliance responsibilities, record keeping and reporting requirements, as well as performance test procedures. Issuing these general permits for concrete plants is another attempt by DANR to streamline environmental permitting in South Dakota and to provide better service to all our customers. These general permits will be effective for five years.

Prior to obtaining coverage under the general air quality permit, the applicant must submit a Notice of Intent form to the department. The Notice of Intent form requires the applicant to describe the operations, equipment, and location that will be covered under this permit. The department will review the information contained in the Notice of Intent to determine if the applicant qualifies for coverage under the general permit and is capable of complying with the general permit. If the applicant qualifies and can meet the requirements, coverage under the general air quality permit will be authorized to the applicant.

In accordance with the Administrative Rules of South Dakota (ARSD) 74:36:04:12, any person desiring to comment on DANR's draft permit must submit written comments to the address below within thirty days of this public notice. Comments may be directed to the following mailing address: Teresa Williams; PMB 2020; Department of Agriculture and Natural Resources; 523 East Capitol; Pierre, South Dakota 57501. DANR will consider and address all comments submitted and issue a final permit decision pursuant to ARSD 74:36:04:12.01. DANR will notify the applicant and each person that submitted written comments or requested notice of DANR's final permit decision, including notification of any changes to the permit based on the comments.

Any person desiring to contest the issuance of this permit and have a contested case hearing must file a petition, which complies with ARSD 74:09:20:14. This petition must be filed either within thirty days of this public notice or, if that person submits comments on DANR's draft permit pursuant to the paragraph above, within thirty days of receiving notice of DANR's final permit decision. Upon receipt of a petition, DANR will schedule this matter for a contested case hearing before the Board of Minerals and Environment.

If no comments or objections are received within thirty days of this public notice, the draft permit becomes the final permit decision and the proposed permit will be issued.

Copies of DANR's draft permit conditions and other information may be obtained from Teresa Williams, at the above address or telephone at (605) 773-3151 or from DANR's website at:
