Re: **Amendment** Special Local Need Registration SD-170002

Dear Sir/Madam:

Enclosed please find a copy of the label to amend the expiration date to read, This FIFRA special local need label expires December 31, 2028, and must not be distributed after this date.

SD170002 Dimetric EXT –for use as a pre-emergence application for the suppression and control of certain broadleaf weeds in lentil and peas.

The purpose of the Special Local Need registration is to provide application instructions for pre-emergence application for the suppression and control of certain broadleaf weeds in lentil and peas. This approval will give producers another mode of action to combat resistant weeds.

If you have any questions, please contact me at (605) 773-4432.

Sincerely,

Tom Gere, C.C.A
Environmental Scientist Manager

**Application for/Notification of State Registration
of a Pesticide To Meet a Special Local Need**
(Pursuant to section 24(c) of the Federal Insecticide,
Fungicide, and Rodenticide Act, as Amended)

For State Use Only
Registration No. Assigned
Date Registration Issued

1. Name and Address of Applicant for Registration
Winfield Solutions, LLC
PO 64589
St. Paul, MN 55164-0589

2. Product is (Check one)
 EPA-Registered
EPA Registration Number
1381-197
 New (not EPA-registered)
Attach EPA Form 8570-4, Confidential Statement of
Formula for new products.
EPA Company Number

4. Product Name
Dimetric EXT

5. If this is a food/feed use, a tolerance or other residue clearance is
required. Cite appropriate regulations in 40 CFR Part 180, 185, and/or
186.

6. Type of Registration (Give details in Item 13 or on a separate
page, properly identified and attached to this form):
a. To permit use of a new product.
b. To amend EPA registrations for one or more of the following purposes:
 (1) To permit use on additional crops or animals.
 (2) To permit use at additional sites.
 (3) To permit use against additional pests.
 (4) To permit use of additional application techniques or equipment.
 (5) To permit use at different application rates.
 (6) Other (specify below)

7. Nature of Special Local Need (check one)
 There is no pesticide product registered by EPA for such use.
 There is no EPA-registered pesticide product which, under the conditions of use within
the State, would be as safe and/or as efficacious for such use within the terms and
conditions of EPA registration.
 An appropriate EPA-registered pesticide product is not available.

10. Has FIFRA section 24(c) registration for this use of the
product ever, by another State, been (check appropriate
box(es), if known):
 Sought Issued Denied Revoked
If any of the above are checked, list States in Item 13 below.
 No FIFRA section 24(c) Action

8. If this registration is an amendment to an EPA-registered product, is it
for a "new use" as defined in 40 CFR 152.3 ?
 Yes (discuss in Item 13 below) No

9. Has an EPA Registration or Experimental Use Permit for this chemical ever been
(check applicable box(es), if known):
 Sought Issued Denied Cancelled Suspended
 Registration Experimental Use Permit No Previous Permit Action

Certification
I certify that the statements I have made on this form and all attachments
thereto are true, accurate, and complete. I acknowledge that any
knowingly false or misleading statement may be punishable by fine or
imprisonment or both under applicable law.

11. Endangered Species Act: (Give details in Item 13 or on a separate page,
properly identified and attached to this form)
Identify the counties where this pesticide will be used. If Statewide, indicate "all."
Provide a list of Federally protected endangered/threatened species which occur in
the areas of proposed use.

RE: Amendment – SLN Dimetric EXT (1381-197, SD170002) on Peas and Lentils

Dear Mr. Gere,

We currently seeking to continue our existing FIFRA 24(c) Special Local Need Label for the herbicide Dimetric EXT (EPA Reg. No. 1381-197), for use as a preemergence application for the suppression and control of certain broadleaf weeds on lentils and peas.

Winfield has held this 24(c) registration in South Dakota for this use since 2017. The continued use of Dimetric EXT in this manner is vital to our growers in this region to effectively suppress broadleaf weeds for lentil and peas.

We would like to request renewal of the FIFRA 24(c) Special Local Need Label for preemergent use on lentils and peas, so that our customers may continue to produce a quality crop. If you have any questions, or request additional information, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink that reads "Roxanne Rydeen".

Dimetric[®] EXT

Herbicide

EPA Reg. No. 1381-197
EPA SLN No. SD-170004

For Distribution and Use Only in the State of South Dakota

This label is valid until December 31, 2028 or until otherwise amended, withdrawn, cancelled or suspended.

Read and understand the Special Conditions and Risks of Use Section on this label before using this product in accordance with this FIFRA Section 24(c) Special Local need.

Dimetric[®] EXT for use as a preemergence application for the suppression and control of certain broadleaf weeds in lentils and peas.

ATTENTION

- It is a violation of the Federal law to use this product in a manner inconsistent with its labeling.
- This SLN label and the federal label for this product must be in the possession of the user at the time of pesticide application.
- Read this SLN and the label affixed to the container for Dimetric[®] EXT herbicide before applying.

Use of Dimetric[®] EXT herbicide according to this SLN is subject to all use directions, precautions and limitations imposed by the label affixed to the container for Dimetric[®] EXT.

LENTILS AND PEAS

PREEMERGENCE APPLICATION: Make a single preemergence application of Dimetric EXT at 1/4 to 1/3 lb per acre per crop year. Apply in 10 or more gallons of water per acre with ground spray equipment. Apply Dimetric EXT before planting. Thorough incorporation, either by rainfall or by mechanical means, is essential for weed suppression. Under dry conditions, incorporate Dimetric EXT into the top 1 to 2 inches of soil with spike harrows, or similar shallow incorporation equipment, then cross harrow to ensure uniform soil incorporation. Where soil surface is moist at the time of application and rain follows before weed emergence, a broadcast application should provide adequate weed suppression.

Use the higher rate on fine-textured soils (high in clay or organic matter) and in fields with a history of high weed populations.

SPECIAL PRECAUTIONS: Crop injury may result if crop is under stress conditions caused by cold weather, low fertility, disease or insect damage. Crop injury may also result if application is followed by heavy rain.

Do not use on coarse-textured soils, sandy soils or soils with less than 1.5% organic matter.

Do not apply to "Estin" lentils.

Do not use on clay knobs or poorly covered subsoils.

Do not apply on shallow seedings less than 2 inches deep (preemergence only).

Maintain continuous spray tank agitation to keep material in suspension. Avoid overlapping and shut off spray booms while turning, slowing or stopping, or crop injury will occur.

NOTE: This treatment may cause some chlorosis or minor necrosis. Because lentil and pea varieties may vary in their susceptibility to Dimetric EXT, determining crop tolerance prior to adoption as a field scale practice is suggested to prevent possible injury.
