

MARKING OF INTERMEDIATE BULK CONTAINERS

49 CFR 178.703

NOTE: Markings must be continuous and in the order displayed above, but may be printed on more than one line.

In addition to the above markings, IBCs must also be marked with the following information:

Fiberboard and wooden IBCs:

- Tare mass in kg

Rigid plastic and composite IBCs:

- Rated capacity in liters of water at 20°C
- Tare mass in kg
- Gauge test pressure in kPa
- Date of last leakproofness test, if applicable
- Date of last inspection

Composite IBCs:

- Inner receptacle:
 - Code # of IBC design type
 - Name and address or symbol of manufacturer
 - Date of manufacture
 - Country authorizing allocation of mark
- Detachable parts:
 - Month and year of manufacture
 - Name or symbol of manufacturer

Metal IBCs:

- Rated capacity in liters of water at 20° C
- Tare mass in kg
- Date of last leakproofness test, if applicable
- Date of last inspection
- Maximum loading/discharge pressure in kPa, if applicable
- Body material and minimum thickness in mm
- Serial number assigned by the manufacturer
