Pierre, South Dakota 57501

January 2023

South Dakota Nonpoint Source Program Fact Sheet Federal Fiscal Year (FFY) 2022

Date of FFY 2022 Section 319 Project Grant Award: July 12, 2022

Amount of FFY 2022 Section 319 Project Grant: \$2,755,000

For EPA grant award purposes, half of the grant award is designated as Program Funds that can be used for all activities that support the goals of the state NPS Management Plan. The other half is designated as Project Funds that must be spent on watershed projects to restore impaired waters.

- Amount FFY 2022 Project Funds: \$1,377,500
- Amount FFY 2022 Program Funds: \$1,377,500

FFY 2022 Third-Party Section 319 NPS Projects Awarded:

- Belle Fourche River Watershed Partnership – \$1,287,000 for the Belle Fourche River Watershed Project – Segment 10
- South Dakota Soil Health Coalition - \$123,000 of CWSRF-WQ funds for the Soil Health Improvement and Planning Project – Segment 2 (Amendment)
- James River Water Development District – \$626,000 for the South Central Watershed Implementation Project - Segment 2 (Amendment)

Total number of Active Section 319 NPS Projects in FFY 2022: 7

- Belle Fourche River Watershed Project
- Big Sioux River Watershed Project
- Northeast Glacial Lakes Watershed Project
- Soil Health Improvement and Planning Project
- South Central Watershed Project
- South Dakota NPS Information and Education Project
- Upper Big Sioux River Watershed Project

FFY 2022 Total Pollutant Load Reduction Estimates:

- Sediment: 7,062 tons
- Phosphorus: 19,168 lbs.
- Nitrogen: 86,591 lbs.

Individual Section 319 NPS project load reductions for FFY22 can be found in Table 10.

Load reductions in the 2022 Annual Report are provided for the federal fiscal year using reductions that have been reported to the Department's Tracker database. Pollutant load reductions will be downloaded from EPA's Grant Reporting and Tracking System (GRTS) to maintain consistency between South Dakota's NPS Annual Report and the GRTS database.

Summary of BMPs implemented by South Dakota 319 NPS projects in FFY 2022

- Conservation Tillage
 - 1,248.51 acres of conservation tillage
- Cropland BMPs
 - 250 acres of conservation crop rotation
 - 2,386.82 acres of cover crops
 - 24 acres of grass seeding
- Grazing Management
 - 117,385 linear feet of fence
 - 5 grazing management plans
 - 595 acres of grazing planned systems
 - 14,668 acres of grazing systems installed
 - 69,967 feet of livestock pipeline
 - 63 livestock water tanks/troughs/alternative water sources
 - 361 acres of range planting
 - 19.5 acres of tree/shrub establishment
- Perennial Vegetation
 - 25.7 acres of grass seeding/pollinator habitat
- Riparian Restoration/Protection
 - 90.06 acres of conservation reserve program
 - 170.15 acres of riparian area management
 - 8 livestock water tanks/troughs/alternative water sources
 - 22.83 acres of grass seeding
 - 202 acres of grazing planned systems
 - 3 stream crossings
 - 8,281 linear feet of streambank and shoreline protection
 - 18,533 feet of fencing and stream exclusion
 - 135.65 acres of seasonal riparian area management

**South Dakota Department of Agriculture and Natural Resources
Nonpoint Source Pollution Program Annual Report
Federal Fiscal Year 2022**

South Dakota NPS Program Structure and Management

The South Dakota Nonpoint Source (NPS) Pollution Program is administered by the South Dakota Department of Agriculture and Natural Resources’ (DANR) Watershed Protection Program. NPS pollution activities completed by program staff are selected to improve, restore, and protect the water quality of the state’s lakes, streams, and wetlands in partnership with other organizations, agencies, and citizens. For more information about DANR’s NPS activities visit:

<https://danr.sd.gov/Conservation/WatershedProtection/default.aspx>

The South Dakota Nonpoint Source Task Force is DANR’s primary partner for implementation of the South Dakota NPS Program. The task force is a citizens’ advisory group with a membership of more than 20 agencies, organizations, and tribal representatives (see Table 1). For additional information about the Task Force visit:

<https://danr.sd.gov/Conservation/WatershedProtection/NonpointSource.aspx>

Table 1. NPS Task Force Core Agencies & Interest Groups

Corn Growers Association	Izaak Walton League of America
Planning Districts	SD Cattlemen’s Association
SD Association of Conservation Districts	SD Conservation Commission
SD Chapter of the Sierra Club	SD Dept. of Agriculture and Natural Resources
Water Development Districts	SD Dept. of Transportation
SD Dept. of Game, Fish and Parks	SD Farmers Union
SD Farm Bureau	SD Pork Producers
SD Grassland Coalition	South Dakota State University
SD Wheat, Inc.	US Fish and Wildlife Services
US Bureau of Reclamation	US Geological Survey
US Forest Service	Natural Resource Conservation Service

319 Grant

The South Dakota Department of Agriculture and Natural Resources’ FFY 2022 Section 319 grant award from the Environmental Protection Agency (EPA) consisted of \$1,377,500 in Program funds and \$1,377,500 in Project funds. The \$2,755,000 total award was allocated as follows: Staff & Support - \$842,000 and 319 Projects - \$1,913,000. Projects awarded funding from the Department’s FFY 2022 Grant are listed in Table 2. For EPA grant award purposes, half is designated as Program Funds that can be used for all activities that support the goals of the state NPS Management Plan. The other half is designated as Project Funds that must be spent on watershed projects to restore impaired waters as well as protect unimpaired waters.

The South Dakota Board of Water and Natural Resources awarded \$200,000 in Clean Water State Revolving Fund (CWSRF) Water Quality Grant dollars to supplement the 319 pass-through funds. See Table 8.

Table 2. FFY 2022 Section 319 Project Awards

Project	Grant (\$)		
	Program	Project	Total
Staff & Support			
DANR Staffing and Technical Support	\$ 842,000		\$ 842,000
Implementation			
Belle Fourche River Watershed – Segment 10	\$535,500	\$751,500	\$1,287,000
South Central Watershed Project – Segment 2 (Amendment)		\$626,000	\$626,000
Total 319 Funds	\$1,377,500	\$1,377,500	\$2,755,000

Projects awarded additional Section 319 funding during FFY 2022 using prior year funds reverted from closed watershed projects that did not expend their total grant award are listed in Table 3. We did not have any prior year’s funds awarded.

Table 3. Projects Awarded Section 319 Grants from Prior Year Funds

Project	Grant (\$)	319 Grant Year
Total	\$ 0	

Active 319 Projects

A list of Section 319 projects funded by previous grant awards that were open during the FFY 2022 reporting period is provided in Appendix A. Projects are listed by river basin.

Completed 319 Projects

Table 4 contains a list of 319 projects closed during FFY 2022. The status of the final report is listed for each project.

Table 4. 319 Projects Closed During FFY 2022

Project	Final Report Status				
	In Preparation	In Review		Approved	
		DANR	EPA	DANR	EPA
Upper Big Sioux Watershed Project Segment 7*				X	
South Central Watershed Implementation Project Segment 1				X	
Belle Fourche River Implementation Project Segment 9				X	

The Upper Big Sioux Watershed Project was merged with the Northeast Glacial Improvement and Protection Project. A final report was submitted by the project coordinator prior to his retirement.

A historical list of Section 319 projects completed by DANR and its project partners is provided in Appendix B. The projects are listed alphabetically by river basin. Unless otherwise indicated, a final report for each project has been filed with EPA, entered in the Grant Reporting and Tracking System (GRTS), and is available from the SD State Library. Several of the reports are also available by visiting:

<https://danr.sd.gov/Conservation/WatershedProtection/ReportsPublications.aspx>

During 2022, DANR continued activities to close out all 319 grants awarded to the department by their expiration date. The 2018 grant is on target for being completed on time in 2023. There is some remaining reverted money that will be spent prior to the end date for the FY2018 grant. See Appendix F for the final FFY 2017 report.

604(b) Grant

South Dakota had three 604(b) grants open during the FFY 2022 reporting period. The Section 604(b) project activities are detailed in Table 5.

Table 5. 604(b) Projects Active in FFY 2022

Grant #C6-96854620		
1-Oct-2020 through 30-Sep-2022		
Project	Grant (\$)	Status
Rotating Basins Project (East Dakota Water Development District)	\$60,000	Completed
South Central Water Quality Monitoring Project (James River Water Development District)	\$20,000	Completed
DANR Personnel and Summer Intern Salaries	\$20,000	Completed
	\$ 100,000	
Grant #C6-96854621		
1-Oct-2021 through 30-Sep-2023		
Project	Grant (\$)	Status
Rotating Basins Project (Black Hills)	\$80,000	On Schedule
South Central Water Quality Monitoring Project (James River Water Development District)	\$20,000	On Schedule
	\$ 100,000	
Grant #C6-96854622		
1-Oct-2022 through 30-Sep-2024		
Project	Grant (\$)	Status
Rotating Basins Project (Black Hills)	\$88,000.00 (BIL Funds)	On Schedule

Rotating Basins Project (Black Hills)	\$5,000 (Emerging Contaminants)	On Schedule
South Central Water Quality Monitoring Project (James River Water Development District)	\$50,000	On Schedule
DANR Salaries and Water Quality Samples	\$7,000	On Schedule
	\$150,000	

A historical listing of completed 604(b) projects is provided in Appendix C.

Section 106 Categorical Grant

South Dakota had one 106 Supplemental Categorical grants open during the FFY 2022 reporting period. Grant #I-96858801-2 includes the FFY19, FFY20, and FFY 21 grants. The Section 106 project activities for the FFY19, FFY20, and FFY21 are detailed in Table 6.

Table 6. Section 106 Categorical Grant Activities

Grant #I-96858801-2 1-Oct-19 through 30-Sep-24	
Project	Grant (\$)
2022 National Lakes Assessment (NLA)-State Scale Survey	\$225,900
Stream Reference Site Development	\$125,000
Statewide Lakes Assessment/Harmful Algal Blooms	\$110,000
Use Attainability Analysis	\$59,000
Statewide Streamflow Monitoring Network	\$99,268
Rotating Basins Project	\$90,000
TOTAL	\$709,168

A historical listing of completed Section 106 projects is provided in Appendix D.

Grants Reporting and Tracking System

South Dakota enters 319 project information into the EPA Grants Reporting and Tracking System (GRTS) database. The GRTS database contains information about project funding, goals, and tasks. DANR entered annual evaluations for all projects active in FFY 2022. The reports detail project activities and progress for the period October 1, 2021, through September 30, 2022. The GRTS database can be accessed at:

<https://ofmpub.epa.gov/apex/grts/f?p=109:1:3697814748928::::>

Staff

During the reporting period, the Watershed Protection Program was authorized 14 full-time equivalents (FTE). Included in the number were 12 environmental scientists, one natural resource engineer and one program administrator. Visit the DANR website for contact information.

<https://danr.sd.gov/ContactUs/default.aspx>

Watershed Protection Program staff provided funded projects with technical assistance and project oversight through onsite and electronic means during FFY 2022. They also assisted prospective project partners with the preparation of project proposals and implementation plans. In FFY 2022, staff initiated five contracts obligating \$1,963,000 in federal funds (319, 106, & 604(b)) and processed 55 payment requests for federal funds totaling \$2,620,885.77. Staff also initiated two contracts obligating \$200,000 in state funds (Consolidated Water Facilities Construction Program grants and Clean Water State Revolving Fund Program Water Quality grants) and processed 21 payment requests from these sources totaling \$261,256.20.

Training & Support

Training was provided for department program staff, local watershed implementation and assessment project staff, and stakeholder groups. This training consisted of onsite project assistance, specialized training for monitoring and assessment, and training for citizen science monitoring.

In addition to the training opportunities provided with direct involvement by the department, training is provided by 319 implementation project sponsors. Examples of training opportunities would be volunteer water quality monitoring, implementation tours and workshops, soil health demonstrations, and nutrient management workshops.

Project Guidance & Oversight

Watershed Protection Program staff provided project management assistance to project sponsors during all phases of project development, implementation, and evaluation. The project guidance information and other documents are available at:

<https://danr.sd.gov/Conservation/WatershedProtection/Section319/Guidance.aspx>

Program project officers are encouraged to conduct onsite visits to each assigned project annually. During FFY 2022, reviews resulted in revisions of several project implementation plans and budgets.

Information and Education

Since 2003, the NPS Information and Education (I & E) Program has been outsourced to the South Dakota Discovery Center. The Discovery Center was awarded an initial \$200,000 I&E grant in FFY 2004. During the FFY 2007 through 2019 period, the Discovery Center was awarded an additional

\$1,190,700 to continue the I&E program. In FFY 2020, the Discovery Center was awarded \$300,000 (\$200,000 of 319 funds and \$100,000 CWSRF Water Quality Grants) for SD Nonpoint Source Information and Education Project Segment 6. DANR maintains a close working relationship with the South Dakota Discovery Center to ensure program milestones are met and to ensure that the program is widely advertised.

Information activities share information with the public. Some of these activities are one-time projects such as the media campaign on pet waste or the planning for urban watersheds planned in previous segments. Other ongoing activities include volunteer monitoring, conference support, water festivals, and the minigrants program.

The minigrant process awards small grants to local, regional, and state projects that promote watershed education. Ten to twelve minigrants are awarded typically during each project segment.

Education activities include educator trainings, Project WET, Water Festivals, volunteer water monitoring, and youth and student outreach activities.

Since 1992, South Dakota Water Festivals have delivered a strong water conservation message to an increasing number of fourth graders. More than 4,500 students and 240 teachers are served by 140 volunteers at Water Festivals each year.

Financial and Technical Assistance Provided by Project Partners

While financial and technical assistance received from the Environmental Protection Agency provide the base for the South Dakota NPS Program, the resources available from public and private program partners are integral components of many program activities. Selected partnerships active during the past year are summarized below. For additional information about these and other program partnerships, consult the *South Dakota Watershed Project Funding and Technical Assistance Guide*. An electronic copy of the guide is available by visiting:

<https://danr.sd.gov/Conservation/WatershedProtection/docs/319guidance2022.pdf>

USDA Natural Resources Conservation Service and Farm Service Agency

The USDA Natural Resources Conservation Service (NRCS) and Farm Service Agency (FSA) are active project partners in nearly all phases of the NPS Program.

The National Water Quality Initiative (NWQI) was initiated in FFY 2012. The goal is to remove streams and other waterbodies from the State's 303(d) list from threatened status or from contributing to impairments. NWQI will assist producers to address high-priority water resource concerns in small watersheds. The State partnership selected four 12-digit Hydrologic Units in the Skunk Creek watershed, which drains to the Big Sioux River. The significance of this tributary is that it contributes pollutants that affect the city of Sioux Falls' ability to meet water quality standards for the portion of the Big Sioux River that flows through the city. During 2014, an in-stream monitoring project was initiated to determine progress toward Skunk Creek meeting its assigned beneficial uses, and that progress is still moving forward today. Skunk Creek was delisted

for total suspended solids (TSS) from the State's 303(d) list in the 2018 Integrated Report. A nonpoint source pollution Success Story was finalized for Skunk Creek TSS in 2019.

In FFY 2017, DENR (now DANR) and NRCS agreed to discontinue work in two NWQI watersheds in the Skunk Creek watershed and identified three NWQI watersheds in the Firesteel Creek watershed. These watersheds are Storia, West Fork Firesteel Creek, and Lower West Fork Firesteel Creek. Firesteel Creek is a tributary to the James River and is impaired for bacteria and TSS. In-stream monitoring on Firesteel Creek began in 2016, and planning and implementation are currently ongoing in the three Firesteel Creek NWQI watersheds.

US Geologic Survey

The US Geologic Survey provides technical assistance to several South Dakota nonpoint source assessment and implementation projects. The US Geological Survey also provides water quality and water quantity data to help DANR develop and implement TMDLs. The survey is also an active participant in planning and conducting the Western South Dakota Hydrology Conference.

US Fish and Wildlife Service

The US Fish and Wildlife Service (USFWS) provides technical and financial assistance to watershed projects for Best Management Practice (BMP) installation. This assistance centers primarily on cost share for practices related to managed grazing systems and wetland habitat development. The main USFWS programs providing funds for BMPs are Partners for Fish and Wildlife Program and North American Wetland Conservation Act. Commonly cost shared BMPs include grass seeding, cross fencing, multiple purpose ponds, and riparian exclusion fencing.

South Dakota Board of Water and Natural Resources Grant Assistance

The Consolidated Water Facilities Construction Program (CWFCP) is administered by the South Dakota Board of Water and Natural Resources (BWNR). The program provides state grants and low-interest loans for projects on the State Water Facilities Plan. NPS structural and construction BMPs, such as animal waste management systems (AWMS) and shoreline stabilization, are eligible for cost share funds through the program. Projects awarded Consolidated Water Facilities Construction Program funds during the reporting period are listed in Table 8.

The BWNR also provides Water Quality grant assistance to watershed projects from the Clean Water State Revolving Fund (CWSRF) administrative surcharge fees. Projects awarded Water Quality grants during the reporting period are listed in Table 8.

The 2022 State Legislature appropriated \$600 million of American Rescue Plan Act (ARPA) grant funding to the Board of Water and Natural Resources. The funds were for eligible water and sewer projects on the State Water Plan. Projects awarded ARPA funding are listed in Table 8.

Table 8. FFY 2022 State Grants

Project	Funding Source	Grant Award (\$)
Belle Fourche River Watershed Project – Segment 10	CWSRF WQ Grant	\$77,000
Soil Health Improvement and Planning Project – Segment 2 (Amendment)	CWSRF WQ Grant	\$123,000
Riparian Buffer Initiative- SD DANR	ARPA	\$1,000,000
South Central Watershed Implementation Project – Segment 2	ARPA	\$5,000,000
	Total	\$ 7,200,000

South Dakota Clean Water State Revolving Fund (NPS Incentive Loan Program)

The South Dakota Board of Water and Natural Resources administers the state’s Clean Water State Revolving Fund (CWSRF) loan program. During 2004, the board established a nonpoint source incentive rate for nonpoint source projects. Projects for traditional wastewater or storm water that include a nonpoint source component are eligible for the nonpoint source interest rate. The annual principal and interest payment is calculated for a loan at the current base SRF interest rate of 2 percent for loans with a term of 10 years or less, 2.25 percent for loans with a term of 11 to 20 years, and 2.5 percent for loans with a term greater than 20 years. Using the lower incentive interest rates of 1 percent, 1.25 percent, and 1.5 percent, respectively, a loan is sized using the annual payment previously calculated. The difference in the two loan principal amounts is the amount of funding available for the NPS component of the project.

Since its inception, six NPS project sponsors have accessed NPS incentive program rate financing. In FFY 2022, two CWSRF NPS Incentive Loans were awarded. The NPS projects and loan amounts are shown in Table 9.

Table 9. CWSRF NPS Loans

Project	Municipality	SRF Loan
FFY 2005		
Brown County Water Quality Improvement	City of Aberdeen	\$ 1,156,259

South Dakota Department of Agriculture and Natural Resources Conservation Commission Grant

In fiscal year 2021, the Department of Agriculture and Department of Environment and Natural Resources merged to form one department, the Department of Agriculture and Natural Resources (DANR). The newly formed department will provide state funds to conservation districts for the installation of conservation BMPs through the Conservation Grants Program. During this reporting period, DANR awarded \$500,000 to conservation district projects. Many of these projects include NPS-related activities.

South Dakota Department of Game, Fish, and Parks (GFP)

GFP assistance programs accessed by projects are like those offered by the USFWS and center mainly on managed grazing and wetlands.

The former Department of Agriculture and the GFP worked together to develop the Habitat Pays website. The Habitat Pays website focuses on compiling habitat and conservation funding programs and assistance from federal and state agencies. The information is easily accessible to South Dakota landowners and the public with interest in creating wildlife habitat and improving water quality.

For a description of the programs and practices cost shared visit:

<https://habitat.sd.gov/>

319 Grant Match

Nonfederal match of 40 percent of project expenditures is required for Section 319 grants. South Dakota takes a conservative approach to approving nonfederal match submitted by its project partners. As much of the match comes from the construction and implementation of BMPs, a large proportion of the match requirement for many projects is documented during the later phases of a project. See Appendix E for a summary of nonfederal match documented for each of the department’s 319 grants.

Water Quality Improvements

The South Dakota NPS Program considers quantification of load reductions and resultant water quality improvements essential to evaluating project goal attainment and reaching the TMDLs established for priority waterbodies. The quantification process uses a combination of modeling and water quality sample results. In FFY 2007, DANR adopted STEPL as the primary load reduction estimation model for reporting annual and cumulative load reductions in GRTS. DANR will continue to use STEPL as its primary load reduction estimation model.

Annual load reductions/water quality improvements documented are entered in GRTS. Load reductions for waterbodies located in project areas during FFY 2022 were 86,591 pounds of nitrogen, 19,168 pounds of phosphorous and 7,062 tons of sediment.

Table 10. STEPL Load Reductions for Projects during FFY 2022

Project Name	Nitrogen (lbs. per year)	Phosphorus (lbs. per year)	Sediment (tons per year)
Belle Fourche River Watershed Implementation-Segment 9	177	21	12

Appendix D

Completed Section 106 Projects

Project
Center Lake Report Writing
Cottonwood Creek Watershed TMDL Assessment
DENR Monitoring Supplies and Equipment
DENR National Rivers and Streams Evaluation & Reference Sites
DENR Stream Reference Site Development
Digital Line Graphs
Digitized SD Soil Survey
East Dakota WDD Water Quality Monitoring
Equipment for Lower Big Sioux and Spring Creek Assessment
EPA In-Kind for Lab Services
EPA National Lakes Assessment (NLA)
Fish Lake/Lake Alice Assessment
Gauging Equipment
Gauging Stations
Lake Hanson Assessment Project
Lewis and Clark Watershed Assessment
Lower Cheyenne River TMDL Assessment-Phase I
Lower James River TMDL Assessment
Mercury Sampling
Missouri River Monitoring
Northern Glaciated Plains Ref. Site Validation & Bio Toolkit
Northwest Great Plains Reference Site Development
Remote Sensing – AGNPS Crop Layers
Rotating Basins Project—Big Sioux/Red/Minnesota River Basins
School – Bullhead Watershed Assessment - TMDL
Sediment Diatom Analysis
Sediment Diatom Dating through Radiochemistry
Selection and & Validation of Stream Reference Sites
Spring Creek/Sheridan Lake Assessment
Stage/Discharge Relationship Development
Statewide Lakes Assessment
Statewide Aquatic Macroinvertebrate Collection and Database (Specify)
Statistics Training Course
Upper Cheyenne River TMDL
Upper Rapid Creek Assessment
Use Attainability Assessments
USGS Gage Station Water Use Agreements

Appendix F

SOUTH DAKOTA NONPOINT SOURCE PROGRESS REPORT						
C9-99818517						
Cooperative Agreement Details						
Cooperative Agreement: C9-99818517						
Date of Award: July 24, 2017						
Expiration Date: June 24, 2022						
EPA Pass Thru Amount: \$1,864,000						
EPA Total: \$2,631,000						
Summary						
A total of six projects were approved for funding through the FY2017 Cooperative Agreement (Table 1). Four of the six projects were awarded \$548,500 in program funds and six of the six projects received \$1,315,500 in project funding. The South Dakota Department of Environment and Natural Resources (DENR) is using \$767,000 of the program funding for staff and support.						
Table 1. Summary of Section 319 projects approved for funding through the FY17 Cooperative Agreement.						
	2017 Projects (Current as of April 2020)	Master Grant	Program	Project	Total	Status
	Staff & Technical Support	FY17	\$767,000.00		\$767,000.00	Completed final report approved
	Belle Fourche River Watershed Project Seg 8	FY17	\$48,500.00	\$601,500.00	\$650,000.00	Completed final report approved
	NPS Information & Education Project Segment 5	FY17	\$175,566.45		\$175,566.45	Completed final report approved
	Northeast Glacial Lakes Watershed Project Seg 4	FY17		\$250,000.00	\$250,000.00	Completed final report approved
	South Central Implementation Project Seg 1 (Amendment)	FY17	\$54,321.86	\$464,000.00	\$518,321.86	Completed final report approved
	Soil Health Improvement & Planning Project	FY17	\$88,428.72		\$88,428.72	Completed final report approved
	Grassland Management & Planning Project Seg 5	FY17	\$181,682.97		\$181,682.97	Completed final report approved
	Unobligated / Available		\$0.00	\$0.00	\$0.00	
	Total		\$1,315,500.00	\$1,315,500.00	\$2,631,000.00
