 MINERALS, MINING, &
 SUPERFUND PROGRAM

Date: 8 July 2024

Hi Roberta,

This letter is in reply to item 6. raised in *EXNI 455 Procedural completeness Response 0624* sent to Matthew Naasz and Nathan Chowning on 22 June 2024. (Appendix 1)

6. Amended drill plan:

To address issues raised on the site visit by the state 4th June 2024, and a site visit with the landholder on the 19th June, the drill pad locations were reviewed. Four drill pads in challenging topographical and physical locations have been removed from the proposed operation. The remaining drill pad details and amended plans are as follows:

Confidential

Table 1: Proposed number of new drill pads, drill holes and new trill track

Property	New Pads	Holes	m2 Pads	m Drill Track	m2 Drill Track
Brian Stewart	6	60*	600	100**	400**

**This number is the maximum number of holes that may be drilled assuming the request to drill up to 10 holes per pad is approved, but as results are analysed this may be less if no further drilling is warranted on that drill pad.*

*** There are existing drill tracks to the old drill holes drilled on the property which will need to be cleaned up by an excavator to mobilize drill equipment for this program.*
