Clean Nuclear is working with an archaeologist to conduct cultural resource studies of the project area. That study is underway, with field work commencing in June, and a report will be submitted to SHPO in July. After that point, there will be additional SHPO review before DANR finishes their review, holds a public comment period, and makes a recommendation to the SD Board of Minerals. This project will likely be in front of the Board for decision this upcoming fall. Drilling would tentatively begin in early 2025 and continue through the first half of 2026. Clean Nuclear and their lawyer are willing to discuss payments for loss of grazing opportunities at a time that is convenient for your office and Mr. Allen.

Crystal,

We are in receipt of your email. Kyle Holt has left our office. I have added our SPL Land Agent to this email list. If you folks could provide Mr. Allen and our office a timeline concerning what you would propose regarding your exploration and when you would foresee being in a position to negotiate surface damages, I think that would be a good next step. I want Mr. Allen to have as much time and information as he needs in order to move forward with those discussions.

Thank you.

Brock Greenfield

Commissioner Greenfield and Mr. Allen,

We have not yet received a response, so I just wanted to follow up on my previous email from May 6, 2024.

Please confirm receipt of the reclamation plan immediately and let Clean Nuclear and the SD DANR know if you have any further recommendations or preferences on the reclamation plan for the project.

Commissioner Greenfield and Mr. Allen,

Clean Nuclear Energy has corrected the references to the appropriate SDCL 45-6D sections in the attached reclamation plan. No other changes were made from the February 2024 version of the reclamation plan.

Please respond to this email to acknowledge receipt and let us know if you have any further questions, comments, or preferences on the reclamation of the affected land (pursuant to SDCL 45-6D-16).

Further, we have engaged with the State Historic Preservation Office and an archaeological firm to evaluate cultural resources of the project site and surroundings. Mr. Allen, I or the archaeologist will be in contact to coordinate access for their upcoming field visit.

Regards,

Crystal

Subject: RE: Clean Nuclear Exploration Project - Sec 36/T7S/R2E - Reclamation Consultation

Ms. Hocking,

We've reviewed the reclamation plan submitted to our office by Clean Nuclear Energy Corp. We noted several references to SDCL 45-6C, a chapter that pertains to mineral exploration. Since this project is specifically for uranium exploration, SDCL 45-6D would be the appropriate chapter to refer to.

While it doesn't specifically apply to the reclamation plan, if more insight could be provided on the relationship between Cowboy Exploration/RESPEC/Clean Nuclear Energy/Basin Uranium, we would certainly appreciate some clarification. Most notably, in our research we discovered that Clean Nuclear Energy is a wholly owned subsidiary of Basin Uranium. It appears that Basin is not registered with the SD Secretary of State, while Clean Nuclear filed its registration with the SOS in January of 2024. The paperwork transmitted to our office in February implies that when Cowboy (through Mr. John Glasscock) sought the subsurface lease, they were acting as an agent of Clean Nuclear. We are trying to gain a handle on the situation that is unlike anything my relatively new team has dealt with to-date.

Thank you.

Roberta –

I'm forwarding confirmation of receipt of the plan by Tim Allen. Based on previous conversations I had with him, this "receipt" is all he'll respond with at this time.

I will forward anything from the SD Lands office if they respond.
