GENERAL PERMIT FOR CONSTRUCTION AND DEMOLITION DEBRIS (C&D) DISPOSAL FACILITIES UNDER THE SOUTH DAKOTA WASTE MANAGEMENT PROGRAM

South Dakota Codified Law (SDCL) 34A-6-1.6 authorizes the Board of Minerals and Environment (Board) to adopt rules relating to the issuance, renewal, revocation or suspension of solid waste facility permits. SDCL 34A-6-58 authorizes the Secretary of the Department of Environment and Natural Resources (DENR) to recommend that the Board issue general permits for certain categories of solid waste facilities.

This general permit authorizes the construction and operation of a construction and demolition debris disposal facility within the State of South Dakota, subject to compliance with all conditions set forth in this general permit. If any of the conditions of this general permit are not met, the operator may be required to apply for and obtain an individual solid waste permit as specified in SDCL 34A-6-58 and the Administrative Rules of South Dakota (ARSD) 74:27:10:06. In addition, the operator may be subject to civil penalties set forth in SDCL 34A-6-1.4 and 34A-6-1.31.

Pursuant to SDCL 34A-6-58, this general permit is valid until suspended, revoked or modified by the Board.

This permit is effective as of December 28, 2017, and shall expire on December 28, 2022.

Signed this 28th day of December, 2017.

Steven M. Pirner, Secretary
Department of Environment and Natural Resources

IMPORTANT NOTICE: POSSESSION OF THIS DOCUMENT DOES NOT PROVE THE HOLDER IS LEGALLY AUTHORIZED TO OPERATE A CONSTRUCTION AND DEMOLITION DEBRIS DISPOSAL FACILITY.

THE DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES ISSUES A CERTIFICATE AND LETTER OF AUTHORIZATION TO EACH LEGALY AUTHORIZED OPERATOR. THE CERTIFICATE AND LETTER OF AUTHORIZATION ARE LEGAL PROOF OF AUTHORIZATION TO OPERATE.

1.0 GENERAL STATEMENTS OF LAW AND OWNER/OPERATOR RESPONSIBILITIES

1.01 Definitions
Definitions used in this permit are as follows:
A. “ARSD,” the Administrative Rules of South Dakota.
B. “Board,” the Board of Minerals and Environment.
C. “C&D,” construction and demolition debris.
D. “DENR,” the South Dakota Department of Environment and Natural Resources.
E. “Emergency,” a condition that the secretary finds deleterious to the public health, safety, and welfare and that requires immediate action.
F. “Occupied Dwelling,” a house or building normally occupied as a residence.
G. “Operator,” a person responsible for the overall operation of a facility or part of a facility.
I. “Secretary,” the secretary of the South Dakota Department of Environment and Natural Resources, or authorized representative.

1.02 Applicability of General Permit
This general permit is potentially applicable to operators of C&D disposal facilities in the State of South Dakota.

1.03 Severability
The provisions of this general permit are severable. If any provision of this general permit, or the application of any provision of this general permit to any circumstance, is held invalid, the application of such provisions to other circumstances and the remainder of this general permit, shall not be affected thereby.

1.04 Property Rights
This general permit does not convey any property rights of any kind, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state, or local laws and ordinances.

1.05 Amendments, Revocation, and Suspension of General Permit
DENR may recommend to the Board that this general permit be amended as provided by ARSD 74:27:10:05. The Board may suspend or revoke this general permit as provided by SDCL 34A-6-1.21 and 34A-6-58.

1.06 Procedure for Requesting Authorization
To obtain authorization to operate a C&D disposal facility under the terms and conditions of this general permit, the operator must submit a request for authorization and publish a notice of intent in an official newspaper in the county in which the proposed site will be located. The request for authorization must be submitted to DENR at least 60 calendar days before the first anticipated use of the site. The notice of intent must be published at least 20 calendar days before the first anticipated use of the site. The notice of intent shall include:
A. the name, address, and phone number of both the landowner and operator of the proposed site;
B. the number of acres comprising the proposed site;
C. the general location of the proposed site;
D. the legal description (quarter, section, township, range, and county) of the proposed site;
E. a description of the authorized wastes to be accepted and managed at the proposed site; and
F. the estimated annual tonnage of waste materials to be accepted and managed.

If the DENR determines the request for authorization is complete and meets the terms of this general permit, DENR will issue an authorization letter and certificate approving the development and operation of the site.
1.07 Duration of Authorization
Initial authorization to operate under this general permit shall be valid for up to two years from the date of issuance and may be renewed for periods up to five years.

1.08 Duty to Renew Authorization
If the operator wishes to continue an activity regulated by this general permit, the operator must submit to DENR a complete renewal application 90 days prior to the authorization expiration date. If a renewal application is submitted 90 days prior to the date of expiration, then authorization to operate under the general permit shall remain in effect until the DENR takes final action on the renewal application, in accordance with SDCL 1-26-28. If the general permit expires prior to an authorization expiration date and if no substantive changes have taken place at the authorized site, then the authorization and expired general permit will remain in effect until such time as the authorization is issued under a new general permit.

1.09 Changes to Request for Authorization
The operator must notify DENR prior to implementing any proposed change to a C&D disposal site location, acreage, authorized waste acceptance, tonnage, or operational practice that would be different from the request for authorization initially submitted to DENR. All changes must be approved by DENR and be public noticed for at least 20 days prior to implementation.

1.10 Transfers
The authorization may be transferred to a new operator provided:
A. the current authorized operator notifies DENR in writing at least 20 calendar days prior to the proposed transfer date;
B. the notification to DENR includes a written agreement between the authorized and new operator containing the date of transfer of permit responsibility, coverage and liability;
C. the notification to DENR includes written documentation demonstrating that the new operator is qualified to comply with the terms and conditions of this general permit;
D. the new operator provides a financial assurance mechanism, if applicable, equal to that of the former operator;
E. the new operator provides a Certification of Applicant required by SDCL 1-40-27;
F. the transfer of site ownership/operation is public noticed for at least 20 calendar days prior to the proposed transfer date; and
G. DENR provides written approval of the transfer.

1.11 DENR Limitation of Liability
Any letter of authorization is specifically conditioned on the truth and accuracy of the statements made by the operator in the application to operate under this general permit. DENR assumes no liability for the truth and accuracy of the statements made by the operator in the application and any other submitted documents.

1.12 Individual Permit Required
DENR may require any operator requesting coverage under this general permit to apply for and obtain an individual solid waste permit if:
A. the operator is not or cannot operate in compliance with the conditions of this general permit;
B. the conditions or standards change such that C&D disposal facilities no longer qualify for a general permit; or
C. an operator is removed from the jurisdiction of this general permit as a result of a complaint and Board action according to SDCL 34A-6-58.

When an individual permit is issued to an operator otherwise authorized under this general permit, the applicability of this general permit to that operator is automatically terminated upon the effective date of the individual permit.
1.13 Individual Permit Requested
Any operator authorized under this general permit may request to be excluded from the authorization by applying for an individual solid waste permit.

1.14 Duty to Comply – Penalties for Violations
The operator shall construct, operate and maintain the restricted use solid waste disposal facility in accordance with SDCL 34A-6, ARSD 74:27, and the conditions of this general permit. If the provisions of the laws, rules, or any conditions of this general permit are violated, DENR may take action to suspend or revoke a general permit authorization as provided for by SDCL 34A-6-1.21; may assess a civil penalty pursuant to SDCL 34A-6-1.4 and 34A-6-1.31; or issue a notice of violation with penalties pursuant to SDCL 34A-6-1.22.

1.15 Stipulated Penalties
In the event an authorized operator fails to comply with the provisions of this general permit, DENR reserves the right to develop and pursue an agreement with the operator for the assessment of stipulated penalties.

1.16 Related Laws, Regulations and Permits
No provision of this general permit exempts the operator from the requirements of any local, state, or federal laws, regulations, or rules in existence or promulgated after this general permit or an authorization becomes effective. It is the responsibility of the operator to obtain any other required permits and licenses.

1.17 Duty to Provide Information
The operator shall furnish DENR, within 10 business days, any information which DENR may request to determine compliance with this general permit.

1.18 Duty to Provide Access
The owner/operator shall allow DENR during regular business hours:
A. to inspect or access the entire C&D disposal facility area authorized under this general permit and identified in the request for authorization;
B. to inspect any facilities, equipment, records, practices or operations regulated or required by this general permit; and
C. to sample or monitor any substances for any parameter.

1.19 Emergency Procedures
The operator must notify DENR, within one business day, of any emergency situation that arises at a C&D disposal facility.

1.20 Need to Halt or Reduce Activity not a Defense
DENR will not consider that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with this general permit, when enforcing the conditions of this general permit.

1.21 Duty to Mitigate
The operator shall take all reasonable steps to minimize or prevent any adverse effect on human health or the environment.

1.22 Responsibility and Liability of Owner or Operator
In accordance with SDCL 34A-6-1.10, the owner or operator of a C&D disposal facility authorized under this general permit is responsible in perpetuity for the solid waste and liable in perpetuity for any pollution or other detrimental effect caused by the solid waste.
1.23 Administrative Changes Authorized
DENR reserves the right to incorporate administrative changes and/or modifications to this general permit. Administrative changes are authorized for the purposes of changing or correcting:
A. typographical errors;
B. regulatory references;
C. titles of organizations or regulatory agencies; or
D. similar items that do not substantially change the requirements of this general permit.

2.0 LOCATION AND DESIGN REQUIREMENTS

2.01 Facility Siting
The operator shall not locate the C&D disposal facility:
A. within a wetland as defined by ARSD 74:27:07:01;
B. within 200 feet of surface water, excluding wetlands, as defined by ARSD 74:51:01:01;
C. within 1,000 feet of an occupied dwelling, unless the owner(s) provides written permission;
D. within 100 feet of a property boundary, unless the adjacent property owner(s) provides written permission;
E. within 1,000 feet of any private or public well which supplies drinking water for human consumption;
F. where the depth to an aquifer, as defined by ARSD 74:54:02:01, is less than 10 feet;
G. within a 100-year floodplain; or
H. in an area that adversely affects wildlife, recreation, aesthetic value of an area, or any threatened or endangered species.

A C&D disposal site may be located in a gravel pit or quarry, with the restriction that disposal of waste is restricted to materials that are free of regulated asbestos-containing waste materials, asphalt-containing materials, petroleum products, or other materials that may pollute ground water.

Occupied dwelling exception: Any occupied dwelling constructed less than 1,000 feet from a C&D disposal site after an initial general permit authorization has been granted will not be grounds to prevent future authorization renewals under this general permit.

2.02 Access Control
The operator shall control access to the C&D disposal site through the use of fences and locked gates. In addition, the operator shall post a sign or signs at the site entrance stating the operator’s name, phone number, type of facility, days/hours of operation, and acceptable waste materials. Directions for disposal should also be posted at the site entrance or within the facility boundaries.

Private C&D disposal sites not open to the public need only post a sign with the operator’s name and phone number. Private sites are not subject to the following signage requirements: type of facility, days/hours of operation, acceptable waste materials, and directions for disposal.

2.03 Surface Water Control
The operator shall construct and maintain soil berms or containment structures around active disposal areas and open burning areas to divert run-on and contain runoff from a 25-year, 24-hour storm event. The berms or structures shall be adequately constructed to prevent leakage. Storm water shall be diverted away from salvageable material storage areas.

2.04 Fire Control
The operator shall maintain a minimum 25-foot fire lane around areas used for open burning.
3.0 OPERATIONAL REQUIREMENTS

3.01 Authorized and Unauthorized Wastes
The operator may accept for disposal, burning or temporary storage the waste materials listed in Table 1, in accordance with the specified requirements. The operator shall not accept for handling any of the unauthorized waste materials listed in Table 2. Any unauthorized waste found on-site must be removed from the facility and handled according to Table 2 procedures. The operator shall contact DENR to determine proper handling procedures for any waste material not clearly identified in Table 1 or 2.

3.02 Routine Inspections Required
The operator shall inspect the facility at least weekly and on all days the facility is open to the public to evaluate permit compliance and to prevent and/or detect the disposal of unauthorized wastes. The site inspections shall be documented as required by Section 4.01(b) of this general permit.

3.03 Vector Control
The operator shall prevent or control on-site populations of disease vectors (rats, rodents, mosquitoes, etc.) by using techniques appropriate for the protection of public health and for preventing degradation of the environment.

3.04 Waste Separation Required
The operator shall place materials that are to be buried in piles or trenches that are well separated from burn piles.

3.05 Soil Cover Required
Construction and demolition debris, furniture, and other inert wastes intended for burial must be covered with six inches of soil cover at least monthly. Monthly placement of six inches of soil cover is necessary to prevent blowing debris and minimize fire potential.

3.06 Open Burning Requirements
The operator may periodically open burn trees, branches, brush, and untreated wood subject to existing state and local requirements. The operator is responsible for removing waste materials other than trees, branches, brush, and untreated wood from the burn pile prior to burning. The local fire department, local law enforcement, and DENR shall be notified prior to open burning.

Open burning shall occur only:
A. when the prevailing winds are away from adjacent residences;
B. when smoke will not obscure visibility or create a traffic hazard on any public road; and
C. during daylight hours.

3.07 Salvaging Allowed
The operator may allow the salvaging of waste materials for reuse or recycling, provided:
A. salvaging is conducted in a planned manner that does not interfere with normal operation of the C&D disposal site; and
B. salvaging does not pose a direct or deleterious threat to public health or the quality of the environment.

4.0 RECORDKEEPING AND REPORTING REQUIREMENTS

4.01 Required Records
The operator shall maintain all records required by this general permit and shall make records available to DENR as stated in ARSD 74:27:13:22. At a minimum, the records shall include:
A. the amounts, sources, types, and dates for wastes received;
B. documentation of the daily and/or weekly site inspections;
C. documentation of unauthorized waste found on-site and the steps taken in response;
D. records of any emergency conditions at the restricted use site;
E. documentation of complaints received and responses to complaints;
F. data on open burning activities at the site to include dates, weather conditions, and an estimate of the quantity of wood in the pile;
G. copies of the current general permit, request for authorization, authorization letter, certificate to operate, and any other permits or licenses required by state, local, or federal laws, rules, and regulations; and
H. documentation identifying the quantity and destination of salvaged materials removed from the site.

4.02 Maintenance of Records
The operator shall maintain all required records for a period of three years from the date the records were generated.

5.0 CLOSURE REQUIREMENTS

5.01 Closure Notification
The operator shall notify DENR of the intent to close the C&D disposal site at least 90 days prior to closure.

5.02 Startup of Closure Activities
The operator shall begin closure activities for all waste disposal areas of the facility within 30 days of receipt of the last load of waste.

5.03 Removal of Salvageable Materials
The operator shall remove all salvageable materials and unauthorized wastes prior to closing the C&D disposal site. Removed materials shall be taken to a permitted solid waste disposal facility or recycler.

5.04 Final Closure Requirements
The final cover and closure activities for the C&D disposal site shall meet the requirements of ARSD 74:27:15:03 and include:
A. covering waste disposal areas/trenches with a minimum of two feet of earthen material capable of sustaining perennial vegetation;
B. incorporating contours of the covered waste disposal areas/trenches and other reclaimed areas into the contours of the surrounding area;
C. grading to prevent ponding of water;
D. seeding and revegetating the entire closed C&D disposal site in accordance with Natural Resources Conservation Service recommendations; and
E. posting a sign stating that the site is closed.

5.05 Completion of Final Closure
The operator shall complete closure activities for the entire C&D disposal site within 180 days of receipt of the last load of waste.

5.06 Notation on Deed Required
The operator shall record a notation on the deed to the property or on some other instrument that is normally examined during a title search. The deed notation shall state that the land has been used as a solid waste disposal facility.

5.07 Certification of Closure
Upon completion of closure of the C&D disposal site, the operator shall provide DENR with a certification confirming that the provisions of the closure plan (if applicable) have been carried
out, and that the facility has been closed in accordance with Section 5.0 of this general permit and the applicable performance standards of ARSD 74:27:15.

6.0 Financial Assurance
DENR will not typically require financial assurance for a facility authorized under this general permit as long as the operator complies with the environmental laws and rules of the state and the conditions of this general permit. However, DENR reserves the right to require financial assurance if violations occur or if unique circumstances dictate the need for financial assurance. If required, financial assurance shall comply with SDCL 34A-6-1.11 and 34A-6-1.12, and ARSD 74:27:16.
Table 1
Authorized Wastes
C&D Solid Waste Disposal Facility

Under South Dakota law, local ordinances may further restrict some of the items listed below. The operator may choose not to accept some of the waste materials listed below.
