Subject: Department of Agriculture and Natural Resources File Number 2025.009: pertaining to a diesel fuel release at Ellsworth Airforce Base in Meade County, South Dakota.

Dear Ms. Baldwin,

The Department of Agriculture and Natural Resources (DANR) is contacting you regarding the event noted above. A copy of the initial spill report form is enclosed for your review. Based on the information provided, CORRAY overfilled a tank, spilling approximately 100 gallons of diesel fuel onto concrete. DANR considers CORRAY responsible for the release. However, Ellsworth Air Force Base responded proactively and immediately, pumping up pooled liquid and applying absorbents. The procedures for performing cleanup in response to releases such as this were developed to prevent contamination of the state's surface water resources. Taking into consideration the work already completed, DANR requires the following:

- Provide this office with post cleanup pictures;
- Provide documentation to DANR of proper use, recycling, or disposal of the recovered contaminated fuel;
- Dispose of contaminated absorbents at a properly permitted facility and provide this office with a copy of the disposal receipts;
- By February 24, 2025, please complete and return the enclosed Written Contamination Incident Follow Up Report form (this is a standard form so you can skip the questions that do not apply to your situation).

Macy Jo Peterson has been assigned as the project manager for this case. If you have questions or need additional information, please do not hesitate to contact her at (605) 773-3296. Thank you for your cooperation and assistance.

Sincerely,

Trish Kindt

OWNER OF NEAREST WATER WELL (if applicable): Wesley Rick (Irrigation Well)

DESCRIBE RESPONSE ACTION AND ADDITIONAL WORK PLANNED:

The contractor (CORRAY) working on Area D Fuel tank renovation was fueling a portable generator. During the fueling process they walked away from the generator and it overfilled, with excess fuel pouring out onto the pavement. When the contractor realized an estimated 100 gallons of fuel had been released. Each tank in the fuels area is surrounded by a secondary containment dike, so all fuel was contained on the pavement. Spill clean-up began immediately and was completed within the 24-hour cleanup window. The fuel was cleaned using absorbent pads and absorbent socks. The used absorbents were collected in 3 55-gallon drums (319 lbs) and taken to HAZMART to be properly disposed of. Because the fuel is non-hazardous the absorbents were wrung out in the HAZMART's centrifuge. The spun out fuel was collected for disposal as off-spec fuel, and the dry absorbents were disposed of in the garbage.

RE: Closure designation for DANR File 2025.009, pertaining to a diesel fuel release at Ellsworth Air Force Base in Meade County, South Dakota.

Dear Ms. Baldwin,

The Department of Agriculture and Natural Resources (DANR) has reviewed the available information regarding the above referenced incident. Based on the information provided, there is no risk to human health or further risk to the environment. Therefore, the DANR is closing this case.

Due to a tank overfill, approximately 100 gallons of diesel fuel were released onto pavement. DANR considers CORRAY responsible for the release. However, Ellsworth Air Force Base initiated remediation efforts. The pooled liquid was pumped up and absorbents were applied. The used absorbents were collected in three 55-gallon drums (319 lbs) and taken to the on-base HAZMART where they were wrung out in a centrifuge. The spun-out fuel was collected for disposal as off-spec fuel and the remaining dry absorbents were disposed at the Rapid City Landfill. If any future problems arise related to this spill, CORRAY may be responsible to perform further assessment and cleanup.

If you have questions or concerns about this site's closure designation, DANR spill case file information is publicly available at http://apps.sd.gov/NR42InteractiveMap#, or contact Macy Jo Peterson of my staff at (605) 773-3296. Thank you for your cooperation and willingness to protect South Dakota's natural resources.

Sincerely,

Terry Florentz, P.E.
