Subject: Department of Agriculture and Natural Resources File # 2026.021: pertaining to a urea release at the Dakota Mill and Grain facility, 111 2nd Avenue, Wall, South Dakota.

Dear Mr. Langendorfer:

The Department of Agriculture and Natural Resources (DANR) is contacting you regarding the event noted above. A copy of the initial spill report form is enclosed for your review. Based on the information provided, an unknown quantity of dry fertilizer (urea) was released due to a failed containment structure. The procedures for the assessment and cleanup of spills such as this were developed to protect surface and groundwater resources. In this situation, DANR requires the following (we understand some of these actions may already be completed or underway):

- Recover released fertilizer and scrape up contaminated soil;
- Fertilizer/contaminated soil that cannot be sold as intended may be land applied, pending approval from this office, or properly disposed at a permitted municipal solid waste landfill;
- Construct a containment wall with concrete barriers and tarp the exposed dry fertilizer and take any provisions necessary to prevent fertilizer runoff.
- Provide this office with a copy of disposal receipts (if applicable); and
- By March 26, 2026, please complete and return the attached Written Contamination Incident Follow Up Report form.

Jacob Berg has been assigned as the project manager for this case. He will review the information provided and contact you if further remedial action is necessary. If you have any questions or need additional information, please do not hesitate to contact him at 605.773.3296. Thank you for your cooperation and assistance.

Sincerely,

Trish Kindt
