Subject: Department of Agriculture and Natural Resources File # 2026.027: pertaining to a Glyphosate release at the Dakota Mill and Grain facility, 111 2nd Avenue, Wall, South Dakota.

Dear Mr. Langendorfer:

The Department of Agriculture and Natural Resources (DANR) is contacting you regarding the event noted above. A copy of the initial spill report form is enclosed for your review. Based on the information provided, approximately 90 gallons of Glyphosate (Roundup) was released due to a shuttle tote failing while being filled from a bulk tank. The procedures for the assessment and cleanup of spills such as this were developed to protect surface and groundwater resources. In this situation, DANR requires the following (we understand some of these actions may already be completed or underway):

- Pump up available product and containerize. Apply absorbents to the remaining product not recoverable via pump;
- Glyphosate/contaminated soil that cannot be sold as intended may be land applied, which must be approved by this office, or properly disposed of at a permitted municipal solid waste landfill;
- Provide this office with a copy of disposal receipts (if applicable); and
- By April 11, 2026, please complete and return the attached Written Contamination Incident Follow Up Report form.

Jacob Berg has been assigned as the project manager for this case. He will review the information provided and contact you if further remedial action is necessary. If you have any questions or need additional information, please do not hesitate to contact him at 605.773.3296. Thank you for your cooperation and assistance.

Sincerely,

Trish Kindt

Re: Closure designation for DANR File# 2026.027: pertaining to a Roundup (glyphosate) release at Dakota Mill and Grain, 111 2nd Avenue, Wall, South Dakota.

Dear Mr. Langendorfer:

The Department of Agriculture and Natural Resources (DANR) has reviewed the available information regarding the Roundup (glyphosate) release and determined further cleanup is unwarranted. Based on the information provided, there is no current risk to human health or further risk to the environment. Therefore, the department is closing this case.

The release was contained to a loading pad on location. The spill was recovered via pump and absorbents. The contaminated absorbents were then collected and land applied after approval from this office. If any future problems arise related to this event, Dakota Mill and Grain may be responsible for performing assessment and further cleanup.

The Closure designation will be recorded in DANR's release database and can be found at https://apps.sd.gov/NR42InteractiveMap. If you have questions or concerns about this site's Closure designation, please contact Jackie McGuire of my staff at 605.773.3296. Thank you for your cooperation in this matter.

Sincerely,

Terry Florentz, P.E.
