Subject: Department of Agriculture and Natural Resources File Number #2026.102: pertaining to a diesel release at the Hilderbrand Creek crossing, Highway 85, mile marker 75, near Belle Fourche, South Dakota.

Dear Mr. Overholt,

The Department of Agriculture and Natural Resources (DANR) is contacting you regarding the event noted above. A copy of the initial spill report form is enclosed for your review. Based on the information provided, approximately 15 gallons of diesel were released as a result of a single vehicle accident. The Rapid City Hazmat Team responded to the incident and pumped up pooled product and applied absorbent booms and pillows. The procedures for the assessment and cleanup of spills such as this were developed to protect surface and groundwater resources. In this situation, DANR requires the following work be performed:

- Properly dispose of all applied absorbents at a permitted municipal solid waste landfill;
- Provide DANR with a copy of landfill receipts;
- By **August 14, 2026**, please complete and return the attached Written Contamination Incident Follow Up Report form.

I have been assigned as the project manager for this case. I will review the information provided and will contact you if further remedial action is necessary. If you have questions or need additional information, please do not hesitate to contact me at Jaclyn.mcguire@state.sd.us. Thank you for your cooperation and assistance.

Sincerely,

Jaclyn McGuire

Re: Closure designation for DANR File# 2026.102: pertaining to a diesel release at the Hilderbrand Creek crossing, Highway 85, mile marker 75, near Belle Fourche, SD.

Dear Mr. Overholt:

The Department of Agriculture and Natural Resources (DANR) has reviewed the action taken in response to the diesel release and determined further cleanup is unwarranted. Based on the information provided, there is no current risk to human health or further risk to the environment. Therefore, the department is closing this case.

The Rapid City Fire Hazmat Team responded to the incident. They pumped up approximately 8 gallons of product and applied absorbents. Plains Towing properly disposed of used absorbents at the Belle Fourche Landfill and recycled fuel collected by the Hazmat Team. There was no visible petroleum sheen or stained soil following cleanup. If any future problems arise related to this event, Overholt Trucking may be responsible for performing assessment and further cleanup.

The Closure designation will be recorded in DANR's release database and can be found at https://apps.sd.gov/NR42InteractiveMap. If you have questions or concerns about this site's Closure designation, please contact Jackie McGuire of my staff at 605.773.3296. Thank you for your cooperation in protecting groundwater resources.

Sincerely,

Terry Florentz, P.E.

Date: Monday, July 20, 2026 10:11:34 AM

Jackie,

I spoke with our people out there, and they reported that everything appears to be cleaned up and there is no remaining contamination. We will continue to monitor the area, but everything looks good at this time.
Please let us know if you need anything else.

Thanks,
Jonah S.

Joel and Jonah,
We received these pictures from the towing company. Based on all of this information it looks like we don't have any remaining contamination. Can you confirm on your end?

Thanks,
Jackie McGuire

Disposal Note:
There was another similar transportation accident that occurred at the same location one day later. The Rapid City Fire Hazmat Team and Plains Towing responded to both incidents.

Absorbents boom and pillows were applied by the hazmat team on Monday. On Tuesday, Plains Towing picked up the spent booms and included them in the waste disposal for the second accident. One of the scale tickets has been attached to reflect that the contaminated material was properly disposed at the Belle Fourche Landfill.
