Subject: Department of Agriculture and Natural Resources File Number 2026.162, pertaining to the release of diesel near Edgemont, South Dakota.

Dear Mr. Wimmer,

The Department of Agriculture and Natural Resources (DANR) is contacting you regarding the above referenced spill. A copy of the initial spill report form is enclosed for your review. Based on the information provided, approximately 850 gallons of diesel were released due to a transportation accident. The procedures for the assessment and cleanup of spills such as this were developed to protect surface and groundwater resources. In this situation, DANR requires the following:

- Retain an environmental consultant certified to perform petroleum remediation in South Dakota. Direct your consultant to excavate the contaminated soil and properly dispose of all contaminated materials at a permitted municipal solid waste facility;
- Have your consultant take representative soil samples at the bottom of the excavation for TPH as diesel;
- Reseed the excavated area using a blend of seed that matches the surrounding undisturbed vegetation;
- Provide consultant's report to this office including cleanup photos, analytical results, and landfill receipts to show proper disposal of the contaminated materials and;
- By November 15, 2026, please complete and return the attached Written Contamination Incident Follow Up Report form.

Hanna Kollbaum has been assigned as the project manager for this case. She will review all information provided and will contact you regarding any additional requirements. If you have questions or need additional information, please do not hesitate to contact either Hanna or myself at 605.773.3296. Thank you for your cooperation in this matter.

Sincerely,

Jackie McGuire
