Application for Permit to Appropriate Water in South Dakota

7.

Our company would like to utilize a section of the land to build a pond with runoff and ground water. This water will then be used by pumping it to a wash plant in order for us to wash material. The water will be recycled and reused. This plant will not be ran year round, only when weather is appropriate and material is needed. The intention would be to have 2 ponds, one for the water pump and sediment pond, both equal in size.
