Re: Water Appls 259-1 & 260-1
Chicken Creek

Dear Mr. Mortimer:

We have your letter of June 21 for which I thank you. I note what you say relative to the water right application of James Newland. You refer us to the Butte County records "Miscellaneous records." Page 24 Book 7 No. 539 where the original record was restored by court action on account of the same being destroyed by fire in Deadwood (then the county seat of this territory before statehood.)

This information is very interesting to us since we have quite occasionally had a call for records which were not available because they were lost in the Deadwood fire. I wonder if it would be possible for you to have the information relative to the James Newland right copied and supplied to us at our expense. I believe this is information that should be in the State Engineer's Office.

We have the original Location Notice of the C. T. Harrison filing and also a copy of the original Location Notice made by A. B. Chauteau and D. T. Harrison.

You then refer to another made by the Redwater Land and Canal Company predecessor of the Redwater Irrigating Association for 10,000 inches of water. You state that this is recorded as No. 2017 page 191 book 7, on Aug. 7 1889. We are also very much interested in this record and believe there should be a certified copy of same in the State Engineer's Office. I am wondering if it might be possible for us to also get a copy of this record made at our expense. Also any other filings on the stream that might be pertinent to that area.

I also note what you say in the last paragraph - that all water rights in that territory should be adjudicated and made of record in the State Engineer's Office. I am in full agreement with your position in this respect and I am hopeful that this may be accomplished through the passage of a revised water law that will undoubtedly come before the next Legislature.

Sincerely,

Re: Water Rights

Mr. Dean W. Loucks,
State Engineer,
Pierre, S. Da.

Dear Mr. Loucks:

I am in receipt of your letter of the 17th Inst, Re- Water Applications Nos 259-1 & 260-1 Chicken Creek and note the Contents thereof.

Referring to the last paragraph of the memo'. I notice your comment relating to the water right application made by James Newland, in that your office has no record thereof etc.

Would respectfully refer you to the Butte County records, "Miscellaneous records." Page 24 book 7 No 582 where the original record was restored by court action on account of the same being destroyed by fire in Deadwood (then the County seat of this territory before statehood.)

In this same book also shows the records of the D. T. Harrison filing made in 1884 on March 24th for 4000 inches of water, and another filing made by A B Chauveau and D T Harrison on Dec 2 1885 for another 4000 inches of water.

Still another made by the Re water Land and Canal Company (predecessor of the Redwater Irrigating Association) for 10,000 inches of water. this recorded as No 2017 pag. 191 Book 7, on Aug 7 1889.

There are numerous others filed on this stream and I think anyone would agree that the water in this stream is and has been for many years muchly overappropriated.

This all goes to point out what I have been preaching for many years, That ALL WATER RIGHTS in this territory should be adjudicated and made of record in your office and in my opinion this should be recommended to the committee studying the water laws of the state as a matter of first consideration in the immediate future.

Respectfully submitted,

2. The appropriation may not exceed the amount of water needed for beneficial use for irrigation. The appropriation may not exceed 3 acre feet per irrigated acre per year. The water is to be used during the following annual period: April 1- October 31.
3. The priority dates of the Vested Water Right are listed above.
4. The water use system has been constructed and water has been applied to beneficial use.
5. Water Rights obtained in compliance with the laws of the State of South Dakota must not be unlawfully impaired by this appropriation.

(continued)

QUALIFICATIONS

1. That Vested Right No. 1417-1 is subject to domestic use rights. Diversion of water under Water Right No. 1417-1 is contingent upon supplies being available first to domestic users.
2. That the flow measuring device on Redwater Ditch continue to be maintained and records of diversion be kept as directed by the Chief Engineer and reported to the Chief Engineer annually.
3. That the applicable portions of Water Right Filing Nos. 071-1, 0160-1, 0294-1, 0392-1 and 261-1 be incorporated into 1417-1 and that the abandoned portions of Nos. 071-1, 0160-1, 0294-1, 0392-1 and 261-1 be canceled.
4. Water for the "Jones" claim is delivered through the Redwater Irrigation Association Ditch. Permanent measuring devices must be installed to measure diversion from the Redwater Irrigation Association Ditch to the "Jones" claim. These measuring devices must be installed as soon as possible but not later than the beginning of the 1993 irrigation season.
