Dear Mr. Airhart.

In reply to your questions, I have enclosed copies of Water Permits Nos. 382-1, 988-1, 0486-1 and 0533-1. There is a gaging station on Elk Creek near Elm Springs, S.D. The records are somewhat poor, but the information that we have indicates that the average discharge for a 26 year period of record is 24.2 c.f.s. or 17,530 ac.ft. per year.

Generally speaking, the stream is intermittent with flows occurring in the spring and summer during the months of March through July, then dry during most of the remaining part of the year.

Please advise this office if you have any further questions.

Sincerely,

JAMES WINTERTON
Water Rights Specialist
