Gentlemen:

The rules adopted by the Water Management Board for establishing a water use control area on the Belle Fourche River, Whitewood Creek and Owl Creek requires that the water right holder be assessed a fee of ten dollars for each cubic foot per second or portion thereof, of the diversion capability of the diversion works plus twenty-five cents for each acre irrigated as shown by the water rights of record in the Division of Water Rights. These fees are required to be paid to the Division of Water Rights by July 1, 1981.

Permits for which fees have not been paid by July 1, 1981 shall be refused the right to divert water for the remainder of the year. The fees paid will be used to defray the costs of providing water master services within the water use control area. The following is a tabulation of your assessment.

Subject: Water Rights - Belle Fourche River

Dear John:

During the past five years, Homestake has been working with the U.S. Department of Agriculture's Soil Conservation Service under their Great Plains Conservation Program. In conjunction with the Great Plains Conservation, an effort is being made to establish water rights to complement the stock dams and water spreader systems that have been built.

Due to various circumstances, we were unable to completely develop the program and to establish the actual amount of water required under the various permits that have been applied for in the time allotted, and, therefore, we request that we be given some additional time in which to bring this project to a successful completion.

A recap of work completed to date is as follows:

Permit No. 1148-1 (13.5 cfs, 948 acres) -

1. Water spreading dikes
(6898 cubic yards - cost \$5324.89)
2. Stock dam
(4291 cubic yards - cost \$2789.15)
3. Stock dam and water spreading dikes
(5721 cubic yards - cost \$3774.43)

This permit covers three different tenants. One tenant irrigated during the summer of 1981. This same tenant did land leveling on a 62-acre field in anticipation of irrigating in 1982, however, due to abundant moisture, found it unnecessary to irrigate. Another tenant under this permit was prepared to irrigate this year, but found it unnecessary.

Permit No. 1149-1 (3.2 cfs, 226 acres)

1. Stock dam
(3874 cubic yards - cost \$1433.38)
2. Stock dam
(3812 cubic yards - cost \$2923.44)

This permit covers two tenants, neither of whom irrigated this year.

Permit No. 1150-1 (7.6 cfs, 534 acres)

1. Stock dam
(5759 cubic yards - cost \$3466.60)
2. Stock dam
(3013 cubic yards - cost \$2620.49)
3. Stock dam
(3067 cubic yards - cost \$1134.79)
4. Diversion dam and spreader system
(15,581 cubic yards - cost \$6745.61)

This permit covers two tenants. One tenant set up a side-roll irrigation system, but found it unnecessary to use it this summer.

Permit No. 1151-1 (5.5 cfs, 390 acres)

1. Stock dam
(5368 cubic yards - cost \$1986.60)
2. Two spreader systems
(18,130 cubic yards - cost \$8926.10)
3. Stock dam
(4,292 cubic yards - cost \$2847.04)

One tenant. No irrigation done this year.

Permit No. 1152-1 (6.6 cfs, 462 acres)

1. Stock dam
(5939 cubic yards - cost \$2567.43)

One tenant. Was prepared to irrigate this year, but had a lot of flood damage in spring and a wet summer.

Permit No. 1153 -1 (6.1 cfs, 428 acres)

Tenant had his own Great Plains contract. Did not irrigate this year because of plenty of rain.

Permit No. 1154-1 (4.5 cfs, 319 acres)

1. Stock dam
(4712 cubic yards - cost \$3152.94)
2. A very large (24,530 to 40,000 cubic yard) spreader dike system has been designed for this ranch; however, due to its high estimated cost (\$21,000 to \$36,000) something smaller will be built.

No irrigation done this year.

Thank you for any consideration that you can give this matter.

Yours truly,

Robert J. Sliper

NOTICE TO SUBMIT THE 2016 IRRIGATION QUESTIONNAIRE

With the fall season upon us and the ending of the irrigation season, it is time to complete and return your 2016 Irrigation Questionnaire form(s). Some items to note are:

Thanks!
Julie

- Please complete each form separately. Return all form(s) by December 1, 2016.
- If you have multiple permits, do not combine information on one form if the water sources are not the same for each permit. The water source for each permit is shown in No. 4 on the questionnaire.
- Submission is required whether you irrigate or not, otherwise your permit or right may be suspended or cancelled.
- Submission does NOT protect a water right from being subject to cancellation for periods of nonuse greater than 3 years unless legal excuse exists for not using water. Legal excuse includes unavailability of water, excessive precipitation, or participation in a federal acreage set aside program such as the Conservation Reserve Program.
- For more information regarding water rights visit our web site at <http://denr.sd.gov/wr>

The information gathered from the questionnaire is a valuable tool for guiding the Water Rights Program in the protection and beneficial use of the waters of the State. *Accuracy in your reporting is important.*
