REPORT ON APPLICATION NO. 1551-1
for Trailhead Lodge, Inc.
June 25, 1992

Application No. 1551-1 proposes to appropriate 15 gpm (0.033 cfs) from one well approximately 500 feet deep located in the SW 1/4 SE 1/4 of section 20, T3N R1E in Lawrence County. The water is for commercial use at the lodge, restaurant and five cabins.

AQUIFER - DEADWOOD FORMATION (DDWD)

The Deadwood Formation consists of brown to light-gray glauconitic sandstone, shale and limestone with locally a basal conglomeritic unit (DeWitt, 1989). The Deadwood underlies 428,800 acres and contains an estimated 7.5 million acre feet of recoverable water in storage in Lawrence County (Allen, 1984). According to the driller's log accompanying the application the Deadwood was encountered about 440 feet below land surface and the completed well has a static water level of 300 feet below land surface and was capable of producing 20-30 gpm. The aquifer is confined at this location and under artesian conditions.

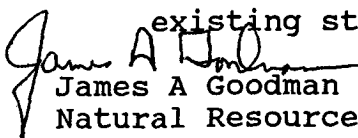

The Division of Water Rights does not monitor any observation wells in this area completed into the Deadwood Formation. No information is available to evaluate water levels.

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There are no other water permits/rights in this area. Interference is not expected to be a problem.

CONCLUSIONS

1. Water is available from the Deadwood Formation.
2. This is an existing well and has been in use for many years.
3. The well as built does not comply with existing SD Well Construction Standards.
4. The wastewater system has been inspected and does comply with existing standards.

Dear Ms. VanDeest:

Enclosed is Water License No. 1551-1. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 413537 in the amount of \$50.00 which you paid for the inspection and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 1551-1, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,

REPORT OF EXAMINATION OF WORKS AND/OR APPLICATION OF WATER TO BENEFICIAL USE

I have this day made a thorough examination of the water use system constructed by the Trail's Head Lodge, Inc. holder of Permit No. 1551-1, bearing the priority of June 3, 1992 authorizing the diversion of 0.033 cu. ft. per second of groundwater for commercial purposes, in Lawrence County.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

One well 500' deep with a submersible pump set at 15 GPM.

B. Works used to transport water to place of use:

210 feet of 1 1/2" PVC pipe connects the well to a 60 gallon pressure tank and 1 1/2" PVC is also used to transport the water through the distribution system.
