COMMENTS:

I contacted Mr. Woods regarding Water Permit Application No. 1554A-1. My question was that the application proposes to transfer 134 of the 184 acres authorized by Water Right No. 1554-1. I asked which of the remaining 50 acres located in Section 17 will continue to be irrigated by Water Right No. 1554-1. Mr. Woods stated that the 50 acres will be those acres located in the N ½ SW ¼ and the SE ¼ SW ¼ of Section 17, T8N, R7E..

REPORT ON WATER PERMIT APPLICATION NO. 1554A-1

Stanley or Shirley Woods

July 18, 2007

Application No. 1554A-1, Stanley or Shirley Woods, proposes to amend Water Right No. 1554-1 by transferring the point of diversion and portions of the irrigated acres to other land. Water Right No. 1554-1 appropriates 2.63 cubic feet of water per second (cfs) from the Belle Fourche River located in the NE¼ SW¼ Section 17 to irrigate 184 acres located in the W½ Section 17; all in T8N-R7E in Butte County. This application proposed to move the location of 134 of the 184 acres approximately ¼ mile west to the NE ¼ Section 18, T8N-R7E. The Belle Fourche River diversion point will be located in the SW ¼ SE ¼ Section 18, T8N-R7E. This application also proposes to switch the method of irrigation from flood to low-pressure center pivot systems. No increase diversion rate or number of acres irrigated is requested by this application and the priority date May 6, 1992 will be retained.

Review of the Water Source

The water source for this proposed project is the Belle Fourche River in the SW ¼ SE ¼ Section 18, T8N-R7E in Butte County. The Belle Fourche River rises in the northeast Wyoming and flows northeast around the northern edge of the Black Hills then east to the Cheyenne River confluence north of Wasta, SD, a total of 290 river miles. Belle Fourche Dam is part of the U.S. Department of the Interior, Bureau of Reclamation (BOR) Belle Fourche Project completed in 1914 that includes a diversion dam, storage dam and a system of canals that irrigate 57,068 acres located in southern Butte County in western South Dakota.

Since 1945 the United States Geological Survey (USGS) has maintained a stream flow gaging station near on the Belle Fourche River near Sturgis, SD located approximately 13 miles downstream of this proposed project. This gage is located downstream of several Belle Fourche Project wasteways and tributaries such as Owl and Horse Creeks. Historical data from this gaging station indicate there is 50 percent probability the median flow rate could range from 236 to 231 cfs or greater during any given year. There is a 75 percent probability the median flow rate could range from 77 to 211 cfs or greater for this same period of time. (Table 1)

Table 1. Belle Fourche River near Sturgis, SD Median Flow Percentiles (cfs)

Review of the Project and Existing Water Rights

This application proposed to move the location of 134 of the 184 acres approximately ¼ mile west to the NE ¼ Section 18, T8N-R7E. The original location and new location for the irrigated acres are also covered

by irrigation under the Belle Fourche Irrigation District (BFID). The BFID is aware of the proposed project and advises landowners toward using this practice of providing supplemental irrigation water in case BFID is unable to provide sufficient water for the entire irrigation season.

South Dakota water law allows irrigation to be severed from the original land and simultaneously transferred and become appurtenant to other land. South Dakota Codified Law SDCL 46-5-34 states:

Irrigation rights appurtenant to land -- Amendment of permit required for severance and transfer. All water used in this state for irrigation purposes shall remain appurtenant to the land upon which it is used. However, if for any reason it should become impracticable to use all or any part of the water beneficially or economically for irrigation of any land to which the right of its use is appurtenant, all or any part of the right may be severed from the land and simultaneously transferred and become appurtenant to other land without losing priority of right previously established, subject to existing rights, upon approval of an application for an amended permit. No increase in total acres irrigated may be allowed under this section.

Approval of this request would not be expected to adversely affect existing water rights.

Conclusions

1. This application proposes to sever irrigation from a portion of the 184 acres and simultaneously transfer and become appurtenant to new land.
2. SDCL 46-5-34 allows irrigation water rights to be severed from the land and simultaneously transferred and become appurtenant to other land without losing priority of right previously established.
3. This application also proposes to switch the method of irrigation from flood to low-pressure center pivot systems. The proposed center pivot irrigation is a more efficient method of applying water compared to the existing flood irrigation.
4. This proposed project is going to be used as a backup to BFID irrigation water.
5. Approval of this request would not be expected to adversely affect existing water rights.

This application proposes to move the location of 134 of the 184 acres approximately 1/4 mile west to the NE 1/4 Section 18-T8N-R7E. The Belle Fourche River diversion point will be located in the SW 1/4 SE 1/4 Section 18-T8N-R7E. No increase in the diversion rate or number of acres irrigated is authorized by this application.

Water Right Nos. 1554-1 & 1554A-1

Donald J Stange
PO Box 189
Allen NE 68710 0189

Dear Mr. Stange:

I am writing in response to our phone visits regarding Water Right Nos. 1554-1 and 1554A-1. Initially we discussed ownership of the irrigated acreage in the SW1/4 section 17-T8N-R7E and you agreed that you do not own that property. Apparently, there was some confusion when Water Right No. 1554-1 was split between you and the Wood family. The SW1/4 of section 17 was transferred to your name when only the NW1/4 should have been transferred. I have informed the Wood family of the mistake and told them that the water right goes with the land and they still retain the water right (No. 1554-1) for the SW1/4 of section 17.

The second part of conversation concerned Water Right No. 1554A-1 which moved 134 acres from the NW1/4 section 17 to the NE1/4 section 18 and also moved the pumping point to the SE1/4 section 18 near a pumping site used by Curt Anderson. You indicated that you would like to move the 134 acres back to the NW1/4 section 17 and the pumping point back to the site used by the Wood family in the NE1/4 SW1/4 section 17. Since the 134 acres was being moved from the NE1/4 section 18 back to section 17 you also indicated you wanted a new permit to include cover the NE1/4 section 18. Based on this request I have drafted a permit application and a map (see enclosures) for your review. Since the diversion point to be used involves the Wood property I am also providing them a copy of this letter and attachments for their information.

Please look over the application and map and see whether I have drafted this in accordance with your plans. If the application looks correct you will need to complete section no. 1 (name, address, etc) and then sign the application. After doing so, please return the completed application and map to me along with the application fee. The application fee to add 150 acres is \$850.00 plus a \$200.00 licensing fee for a total of \$1,050.00. However, the transfer of ownership that was mistakenly filed for the land in the SW1/4 section 17 cost \$50.00 which should be refunded. Therefore, remit an even \$1,000.00 and the matter of a refund is addressed.

If you have any questions, please call me at (605) 773-3352.

Sincerely,

Ron Duvall

Dear Mr. Stange:

On August 7, 2017, a staff person with the Department of Environment and Natural Resources conducted a on-site licensing investigation of Water Permit Nos. 1554A-1 and 1935-1. Both permits appropriate water from the Belle Fourche River for irrigation.

Water Permit No. 1554A-1 transferred 134 acres one mile east to the NW ¼ Section 17-T8N-R7E. This irrigation right was established in 1992. The permit is held in the name Donald Stange, Marion Rus, Brad Stange and Theresa Person. The licensing investigation found 124 acres being irrigated.

Water Permit No. 1935-1 held in your name authorized irrigation of 150 acres in the NE ¼ Section 18-T8N-R7E. The licensing investigation found 135.3 acres being irrigated.

Both permits were found to have less acres developed for irrigation than the permit authorized. You indicated a desire to put a cornering unit on the pivot in the future.

In the case of Permit No. 1554A-1 which was an amendment to transfer acres to a new location, this is not possible since the three year forfeiture for nonuse period has passed. See attached South Dakota Codified Law (SDCL) 46-5-37. Therefore the license will be issued for 124 acres. If you desire to install a cornering system to irrigate more than 124 acres a water permit for the additional acres will need to be obtained.

Water Permit No. 1935-1 was a new permit and given a five year construction period pursuant to SDCL 46-2A-8 (see attachment). The five year construction period to complete works under Permit No. 1935-1 is up February 19, 2018. You have the right to develop up to the 150 acres until February 19, 2018. We will hold off licensing until that time. If 150 acres are not developed by this time, the license will be issued for what is developed (currently 135.3 acres).

Please let me know if you have any questions.

Sincerely,

Eric Gronlund

46-2A-8. Time for completion of construction and use of water--Application for lesser amount of water or variance in periods of use. Any construction necessary to put the water to beneficial use shall be completed within five years of approval of the permit and the water shall be put to beneficial use within an additional four years. The Water Management Board may, in its discretion, approve any application for a lesser amount of water or may vary the periods of annual use and the permit to appropriate water shall be regarded as limited accordingly.

46-5-37. Failure to use beneficially appropriated water--Forfeiture for nonuse--Reversion to public. If any person entitled to the use of appropriated water fails to use beneficially any part of the water for the purpose for which it was appropriated, for a period of three years, the unused water shall revert to the public and shall be regarded as unappropriated public water.

Report of Examination of Works and/or Application of Water to Beneficial Use For Permit No. 1554A-1 (reissued)

I have this day, Aug 7, 2017 made a thorough examination of the water use system constructed by Donald Stange, 2807 Gamble Ct., Mitchell, SD 57301 of Permit No. 1554A-1, bearing the priority of 5/6/1992 authorizing the diversion of 2.0 cu. ft. per second of water from the Belle Fourche River for irrigation purposes in Butte County.

Inspection contact & relationship to permit holder, if applicable: **Donald Stange, owner**
402-316-6125
Terry Wood, neighbor

A. Works used to divert the water:

Pump:

This diversion point serves as a back-up water supply to the Belle Fourche Irrigation District. A portable pump is used at this location when needed. A pump was not onsite at the time of inspection.

B. Works used to transport water to place of use:

1) Type portable aluminum pipe 2) Size 12 inches 3) Length --- feet

C. Works used to apply water to beneficial use:

Center Pivot:

- 1) Make Reinke
- 2) Pipe length 1,222 feet
- 3) Number of towers 7 End Gun 105 feet
- 4) Capacity 900 gpm
- 5) Acres 124

Note: When water is supplied from the Belle Fourche Irrigation district, gravity flow from a division box located approximately 40 higher in elevation provides minimal pressure to the pivot.

D. Chemigation Equipment:

- | | |
|---|--|
| 1) Does chemigate <u>Is planning to</u> | 6) Interlock type <u>injection pump not onsite</u> |
| 2) Mainline check valve <u>no</u> | 7) injection pump type <u>-----</u> |
| 3) Inspection port/air-vac <u>no</u> | 8) injection check valve <u>-----</u> |
| 4) Low pressure drain <u>no</u> | 9) positive displacement pump <u>-----</u> |
| 5) Discharge 20' from source <u>Yes</u> | |

Comments: **A chemigation tank is located at the pivot but is not connected to an injection pump. Chemicals have not been injected as of the inspection date.** Note: Pivot is currently being supplied with water from the BFID which should exempt the system from complying with chemigation rules under SDCL 34A-2A-3. The law exempts required mechanical devices as long as there is an air gap. **However; if the Belle Fourche River diversion point is utilized the system must have the mechanical safety equipment installed per state law.**

E. Compliance with Permit Requirements:

- 1) Permit qualifications being abided by Yes
- 2) Irrigation Questionnaires checked to determine if permit owner started irrigation by the end of construction period Yes
List any extended period of nonuse: none
- 3) Exceptions to compliance are: none

F. Condition and Location:

1. The system is in good condition with the point of diversion located as follows:
1,500' N and 1,513' E of SW corner Section 17 T8N R7E (44.652132, -103.30093)
2. The works are capable of diverting and conveying to the place of use 2.0 cu. ft. per second of water (900 gpm) which is to be used for sprinkler irrigation use. Water has been put to beneficial use to the maximum extent as follows:

Section 17 T8N R7E

NW ¼ NW ¼	26.9 acres	NE ¼ NW ¼	30.4 acres
SW ¼ NW ¼	33.4 acres	SE ¼ NW ¼	33.3 acres

comprising a total of 124 acres of land and the license should be issued for 1.77 cfs .

Note: The license is issued for the statutory limit of 1 cfs for each 70 acres (795 gpm).

All structures and lands on map Yes

G. Comments or other permit(s) associated with the project: Water permit No. 1554A-1 authorized 2.0 cfs from the Belle Fourche River in the NE ¼ SE ¼ Section 18 for irrigation of 134 acres located in the NE ¼ Section 18 T8N R7E. The public notice for application 1935-1 served as notification to amend Water Permit No. 1554A-1 and reissue, thereby transferring the 134 acres one half mile east to the NW ¼ Section 17 and the diversion point to the NE ¼ SW ¼ Section 17, all in T8N R7E. Water Permit No.s 1554A-1 and 1935-1 owned by Donald Stange and 1934-1 owned by Shirley Wood utilize the same Belle Fourche River diversion point.

Dear Mr. Stange:

Enclosed is Water License No. 1554A-1, listed in the names of Donald J Stange, Marion Rus, Brad Stange and Thersa Person. This is the final water right document completing your process of obtaining a Water Right. Included with your license is a map prepared by the staff engineer who conducted the field investigation.

The investigation of your water use system found a chemical tank located at the pivot but not yet connected to an injection pump. Our understanding is that you plan to chemigate in the future. In regard to the equipment used for applying chemicals and/or fertilizer through your irrigation systems, enclosed is a copy of Water Management Board rules dealing with chemigation. "Appendix A" shows the minimum requirements for the equipment. These rules would apply when using the Belle Fourche River diversion point as authorized under Water Right No. 1554A-1.

If the pivot is operating with water from the Belle Fourche Irrigation District, the system would be exempt from complying with Board rules since it would be an open discharge system with an air gap. An open discharge system is an irrigation pump discharge with an air gap. An air gap is a physical separation between the free-flowing discharge end of a water pipeline and an open receiving vessel. An air gap meets the requirements if the end of the discharge pipe is located above the topmost rim of the receiving vessel, if the distance of the separation is greater than one inch, and if the air gap is located between the irrigation pump discharge outlet and the point of chemical injection.

As long as you use the water beneficially, as stated in the Water License, State Water Laws provide that you have a continuing right to use the water.

Sincerely,

Jeanne Goodman, Chief Engineer

NOTICE OF ENTRY OF ORDER
FOR ONE YEAR SUSPENSION OF WATER RIGHT & WATER PERMIT

TO: Donald J Stange, 2807 Gamble Ct, Mitchell SD 57301-6411

FROM: Jeanne Goodman, Chief Engineer
Water Rights Program 

SUBJECT: One Year Suspension of Water Right No. 1554A-1 & Water Permit No. 1935-1

On March 7, 2018, the Water Management Board ordered:

Effective April 7, 2018, Water Right No. 1554A-1 & Water Permit No. 1935-1 be suspended for the 2018 irrigation season for failure to submit the 2017 irrigation questionnaires.

If the 2017 irrigation questionnaires are received prior to April 7, 2018, the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2018 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2018 unless the 2017 irrigation questionnaires are submitted by April 7th.

After April 7th, you may petition the Water Management Board to rescind the suspensions. You will need to submit the 2017 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 2-3, 2018, in Pierre, SD. The letter should include your reasons for not completing the 2017 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

Dear Mr. Dyck:

I am writing regarding ownership of land described in Water Right No. 1554A-1 currently listed in the name of Donald Stange. In October 2019, we mailed a copy of the water right and a partially completed transfer form to you for changing ownership on the water right. To date we have not received anything back from you.

NOTE: Water permits may be cancelled for nonconstruction after the five year construction period has expired. Once a water permit is developed and the water used, the permit becomes a right. A water right may be lost for three reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.

Dear Mr. Dyck:

I am writing to acknowledge receipt of the transfer form and filing fee you submitted for changing ownership on Water Right No. 1554A-1.

The ownership change has been completed and the water right is now listed in your name. Enclosed for your records is a receipt for the filing fee you paid.

Each year we mail irrigators in South Dakota an irrigation questionnaire for reporting how much water they pumped during that specific crop season. During the year, please keep track of how many hours you pumped each month. You will need this information for completing the questionnaire.

If, during the season, you only used purchased water from the Belle Fourche Irrigation District, you do not need to report that to us. Just make the notation on the form that you used Project water and return it to us.

Sincerely,

A handwritten signature in black ink, appearing to read "Genny McMath". The signature is written in a cursive, flowing style.

NOTICE OF ENTRY OF ORDER FOR ONE YEAR SUSPENSION OF WATER RIGHT

TO: Franklin Dyck, 313 Pierre St, Vale SD 57788

FROM: Eric Gronlund, Chief Engineer
Water Rights Program

SUBJECT: One Year Suspension of Water Right No. 1554A-1

On March 3, 2021, the Water Management Board ordered:

Effective April 3, 2021, Water Right No. 1554A-1 be suspended for the 2021 irrigation season for failure to submit the 2020 irrigation questionnaire.

If the 2020 irrigation questionnaire is received prior to April 3, 2021, the suspension will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2021 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2021 unless the 2020 irrigation questionnaire is submitted by April 3, 2021.

After April 3rd, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2020 irrigation questionnaire and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 5-6, 2021 in Pierre, SD. The letter should include your reasons for not completing the 2020 irrigation questionnaire. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

Water Rights Staff will conduct compliance checks of suspended water rights this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.
