Notice of Hearing - date to intervene: _____

SOUTH DAKOTA
WATER PERMIT NO. 1636-1

Date of first receipt of application January 16, 1996.

The Chief Engineer, on behalf of the Water Management Board, issues Water Permit No. 1636-1 to Wayne Lindstad, RR 2, Box 393H, Spearfish SD 57783 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 1636-1 appropriates 0.23 cubic feet of water per second (cfs) (104 gallons per minute) from one additional well (Minnekahta Formation) 746 feet deep located in the SW 1/4 NW 1/4 Section 35-T7N-R2E. Water Permit No. 1379-1 appropriates 0.16 cfs from two wells located in the SW 1/4 NW 1/4 and the NW 1/4 NW 1/4 Section 35-T7N-R2E. Water from the three wells is diverted to three shallow ponds.
2. The water appropriated shall be used for the purpose of supplying water for domestic use and commercial use for a fish farming operation and may not exceed the amount of water needed for beneficial use for domestic and commercial use purposes.
3. The water is to be used during the following described annual period: January 1 - December 31
4. The date of approval of Permit No. 1636-1 is March 11, 1996.
5. The date from which applicant may claim right is January 16, 1996.
6. One-fifth of the construction is to be completed on or before September 11, 1998.
7. All construction is to be completed on or before March 11, 2001.
8. Water is to be put to beneficial use on or before March 11, 2005.
9. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATIONS

1. The well approved under this Permit shall be valved and the flow reduced to the amount needed or to a minimum when not being used (directly or for storage purposes). The well shall also be equipped with a pressure gauge and a record kept of any pressure fluctuations. Such records shall be available to the Chief Engineer upon request. If this well is abandoned or the Permit cancelled, the well must be plugged in accordance with Water Management Board Rules, Chapter 74:02:04.
2. The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.

Dear Mr. Johnson:

As requested, pursuant to South Dakota Well Construction Standard 74:02:04:21, T. Johnson Drilling is authorized to construct a test well into the Minnekahta Limestone in the Section 34 or 35, T7N-R2E for Wayne Lindstad, prior to approval of a water permit. The test well must be constructed in accordance with the SD Well Construction Standards. Any test holes that are abandoned must be plugged pursuant to the SD Well Construction Standards.

Very truly yours,

NAME OF PERSON OR FILE: Wayne Linstad - water permit application

ADDRESS: COUNTY: Lawrence

DATE: 1/18/96

TELEPHONE: (892-4776 - Linstad Alignment)

RE: Called regarding his application

COMMENTS:

I assisted Mr. Linstad (via phone) in filling out his application. Once the application was received I found out that Permit No. 1379-1 existed for the fish farm. Permit No. 1379-1 appropriated 0.16 cfs from two wells and also includes a dam in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 27. The new application requests a total of 0.39 cfs (176 gpm) from three wells. I contacted Mr. Linstad to see if he was aware of this previous water permit. He said he vaguely remembered it. This new application is really an additional appropriation of 0.23 cfs (104 gpm) and a additional well to the previous water permit. Mr. Linstad agreed with this and asked me to amend his application.

The application filing fee will now be \$225 instead of the \$250. Since Mr. Linstad was just leaving and will be gone for two weeks, we are going to receipt the check for \$250 and refund \$25 to Mr. Linstad.

Mr. Linstad stated that the dam in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 27 is on property owned another individual and is no longer a part of the fish farming operation.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.

RE: Called regarding his application

COMMENTS:

I contacted Mr. Linstad as a follow-up to the report prepared for Application No. 1636-1. The report stated that there is not sufficient information to determine if any wastewater is generate or how it will be disposed. Mr. Linstad stated that under the old water permit diverting only 20 gpm, there was no discharge. He stated that the ponds are lined with plastic. He stated that with the increased diversion that the third pond (lowest in the chain) does now discharge and flow over land. He state that he did not know if the water ever entered the drainage the flows into Spring Creek. I explained to Mr. Linstad that if there is a discharge from the ponds then he will need to discuss with the Point Source Control Program whether a discharge permit is required.

He stated that the ponds has two risers in them so that no solids flow into the drainage. I stated that if a discharge does occur, then questions on the amount of fish produced, flow rate, etc. will need to be answered so that a determination can be made on whether a discharge permit is required.

Mr. Linstad stated that he will check tonight whether any water is flowing to the drainage.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.

RE: Called regarding his application

COMMENTS:

Mr. Linstad called back regarding flow from the ponds. Now that he is uses a greater amount of water, the ponds do overflow. Pond No. 3 is the lowest pond in the chain. Mr. Linstad stated that he went out and checked the overflow this morning. The pond (dugout) was flowing onto land but the flow cease about 150 yards from the pond. No water was entering the drainage. He stated that with the type of soil at the location the water runs back into the ground. This is the reason he had to line the ponds.

I told him I will relay this information to Kelli Buscher and if she needs further information I will direct her straight to him. He said he will be more than happy to answer any questions or accommodate an on-site investigation.

I talked to Kelli Buscher about Mr. Linstad's facility, She is going to have Jon Epp from the Rapid City regional office conduct an investigation to determine if the facility requires a discharge permit.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.

NAME: Eric Linstad

REPORT ON WATER PERMIT APPLICATION NO. 1636-1
for Wayne Lindstad
January 31, 1996

Application No. 1636-1 proposes to appropriate 0.23 cfs (104 gpm) from one additional well approximately 746 feet deep located in the SW 1/4 NW 1/4 of section 35, T7N R2E in Lawrence County. Water Permit No. 1379-1 appropriates 0.16 cfs from two wells located in the SW 1/4 NW 1/4 and the NW 1/4 NW 1/4 of section 35, T7N R2E. Water from the three wells is diverted to three small ponds and is used for domestic use and commercial use for a fish farming operation.

AQUIFER - MINNEKAHTA (MNKT)

The Minnekahta is a massive gray to lavender relatively pure limestone. The Minnekahta is about 40 feet thick in this area, underlies approximately 126,080 acres and contains an estimated 315,200 acre feet of recoverable water in storage in Lawrence County (Allen, 1984). The aquifer is areally extensive around the entire Black Hills and is hydraulically connected into Wyoming to the west and into Meade County to the east. The aquifer is confined and under artesian conditions at this site. The well log submitted with the application indicates the top of the Minnekahta was encountered at a depth of 742 feet and drilling continued to a depth of 776 feet. The well as completed was capable of free flowing 100 gpm and had a shut in pressure of 15 psi. The well completion report indicates that the well is completed in accordance with SD Well Construction Standards.

The Water Rights Program does monitor one observation well (LA-86B) which is completed into the Minnekahta and located about 3 1/2 miles west of this application. Water levels for this well show considerable response to climatic conditions. Water levels rose as much as 65 feet in seasonal response to recharge from wet climatic conditions. In general, the water level record indicates that the aquifer is capable of sustaining additional withdrawals (Water Rights, 1996).

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There is one existing water right No. 673-1 (0.16 cfs, 15 acres) located about 1 mile north of this application which also obtains water from the Minnekahta. Drawdown will occur as a result of this diversion. Both this application and the existing right obtain water from free flowing wells. Even slight changes in water levels may affect the amount of flow from these wells. It may become necessary to pump these wells, however, this would not adversely affect the supply of water from the aquifer only the means of delivery.

CONCLUSIONS

1. Water is available from the Minnekahta.
2. The aquifer is confined and under artesian conditions at this site. In fact, this is a free flowing well at the land surface.

3. Interference is not expected to be a concern. Drawdown will occur as a result of this diversion . It may become necessary to install pumps in the wells to obtain the amount of water needed. Water has been used for this purpose with no reported controversy and it is not anticipated that this request will change that.
4. The new well constructed for this application is completed in accordance with SD Well Construction Standards.
5. The Air and Surface Water Program has been contacted and will conduct an investigation to determine whether a discharge permit is necessary.

James A Goodman
Natural Resources Engineer

WATER RIGHTS OBSERVATION WELL LA-86B

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 1636-1, Wayne Lindstad**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 1636-1, Wayne Lindstad, RR 2, Box 393H, Spearfish, SD 57783.

The Chief Engineer is recommending APPROVAL of Application No. 1636-1 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion has been developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) in the public interest with the following qualifications:

1. The well approved under this Permit shall be valved and the flow reduced to the amount needed or to a minimum when not being used (directly or for storage purposes). The well shall also be equipped with a pressure gauge and a record kept of any pressure fluctuations. Such records shall be available to the Chief Engineer upon request. If this well is abandoned or the Permit cancelled, the well must be plugged in accordance with Water Management Board Rules, Chapter 74:02:04.
2. The well approved under this Permit will be located near domestic wells and other wells which may obtain water from the same aquifer. The well owner under this Permit shall control his withdrawals so there is not a reduction of needed water supplies in adequate domestic wells or in adequate wells having prior water rights.

See report on application for additional information.

Dear Mr. Lindstad:

Water Permit Application No. 1636-1 for commercial and domestic use has been examined and found to comply with the South Dakota Water Laws and applicable rules. A notice of hearing has been sent to the Publisher of the Black Hills Pioneer printed at Spearfish, SD (Ph # (605) 642-2761). For your information, a copy of the notice, the recommendation of the Chief Engineer and a report on the application are enclosed. Please review the notice prior to publication and notify this office, if you have any corrections or questions.

Be sure to contact the above newspaper to authorize publication of your Notice of Hearing and to arrange for payment. Early contact with the paper can eliminate delays. The publisher has been instructed to publish your notice once each week for two consecutive weeks with the last publication to occur twenty days before the board meeting. The newspaper has been instructed to send us the Proof of Publication. We must receive Proof of Publication before action can be taken on the application.

Sincerely,

Eric Gronlund
Natural Resources Engineer
605 773-3352

enclosures

NOTE: If you plan to contest any part of the Chief Engineer's recommendation, you must file a petition pursuant to the procedures outlined in the attached notice of hearing. The Water Management Board will then consider your concerns during a hearing on the application.

ATTENTION: Legal Department

Enclosed is a Notice of Hearing on Application No. 1636-1 to be published twice. Please publish the first notice on February 22, 1996, with the second publication 7 days later.

The APPLICANT MUST VERIFY TO YOU THAT THE NOTICE IS TO BE PUBLISHED, before you make the first publication. Please BILL the APPLICANT for the cost of publication. The APPLICANT is Wayne Lindstad, RR 2, Box 393H, Spearfish, SD 57783 (Ph # Home: 642-7435 and Work: 892-4776).

A copy of BOTH publications must be SENT to the WATER RIGHTS PROGRAM. IMMEDIATELY return the FIRST publication with the FIRST Transmittal form on the bottom of this page. The first copy is needed to check the publication for errors so any corrections can be made in the second publication. Publication errors can invalidate the public notice and cause the applicant costly delays.

Please be sure the SECOND publication is returned IMMEDIATELY with the enclosed Proof of Publication form. DO NOT WAIT until the end of the month or the billing cycle. No action may be taken on the permit application until proof of publication has been received.

Sincerely,

Eric Gronlund
Natural Resources Engineer

FIRST TRANSMITTAL NOTICE

TO: Eric Gronlund
Water Rights Program
Joe Foss Building
Pierre SD 57501-3181

No. _____

Date _____

We are in receipt of your letter of _____ enclosing Notice of Hearing to Appropriate Water by Application No. _____ which was first published in our issue of _____. ENCLOSED IS A COPY OF THIS FIRST PUBLICATION.

Name

Newspaper

Instruction to Newspaper - Publish first Notice on February 22, 1996, with the second publication 7 days later. The applicant is responsible for payment.

NOTICE OF APPLICATION NO. 1636-1 to Appropriate Water

Notice is given that Wayne Lindstad, RR 2, Box 393H, Spearfish, SD 57783 has filed an application for a water permit to appropriate 0.23 cubic feet of water per second (cfs) (104 gallons per minute) from one additional well (Minnekahta Formation) 746 feet deep located in the SW 1/4 NW 1/4 Section 35-T7N-R2E. Water Permit No. 1379-1 appropriates 0.16 cfs from two wells located in the SW 1/4 NW 1/4 and the NW 1/4 NW 1/4 Section 35-T7N-R2E. Water from the three wells is diverted to three small ponds. Water is used for domestic use and commercial use for a fish farming operation.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 1636-1 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the chief engineer will act on the application, as recommended, unless a petition is filed opposing the application or the applicant files a petition contesting the chief engineer's recommendation. If a petition opposing the application or contesting the recommendation is filed, then a hearing will be scheduled and the Water Management Board will consider the application. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting this application or recommendation must file a written petition with BOTH the applicant and chief engineer. The applicant must file a petition if contesting the chief engineer's recommendation. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by March 11, 1996.

The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to this application. Nettie H. Myers, Secretary, Department of Environment and Natural Resources.

COUNTY OF LAWRENCE) SS.

Billy T. Masterson, Jr. of said County and State being first duly sworn, on his oath says: That the BLACK HILLS PIONEER is a legal daily newspaper of general circulation, printed and published in the City of Spearfish, in said County and State by Billy T. Masterson, and has been such a newspaper during the times hereinafter mentioned; and that said newspaper has a bonafide circulation of at least 200 copies weekly, and has been published within said County in the English language for at least one year prior to the first publication of the notice herein mentioned, and is printed in whole or in part in an office maintained at the place of publication; and That I, Billy T. Masterson, Jr., the undersigned, am the Publisher of said newspaper and have personal knowledge of all the facts stated in this affidavit; and that the advertisement headed:

438 Notice of App. # 1636-1

a printed copy of which is hereto attached, was printed and published in said newspaper for 2 successive and consecutive weeks, the first publication being made on the 22 day of Feb, 1996, and the last publication on the 29 day of Feb, 1996, that the full amount of fees charged for publishing same, to-wit: The sum of \$ 43.41, insures solely to the benefit of the publisher of the BLACK HILLS PIONEER, that no agreement or understanding for a division thereof has been made with any person and that no part thereof has been agreed to be paid to any other person whomsoever.

Subscribed and sworn to before me this 29 day of Feb, 1996.

Ardith Johnson
Notary Public, Lawrence County, South Dakota
My commission expires: 10-24-96

NOTICE IS GIVEN that Wayne Lindstad, RR 2, Box 393H, Spearfish, SD 57783 has filed an application for a water permit to appropriate 0.23 cubic feet of water per second (cfs) (104 gallons per minute) from one additional well (Minnekahta Formation) 746 feet deep located in the SW 1/4 NW 1/4 Section 35-T7N-R2E. Water Permit No. 1379-1 appropriates 0.16 cfs from ~~two~~ wells located in the SW 1/4 NW 1/4 and the NW 1/4 NW 1/4 Section 35-T7N-R2E.

Water from the three wells is diverted to three small ponds. Water is used for domestic use and commercial use for a fish farming operation.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application No. 1636-1 because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. In accordance with SDCL 46-2A-23, the chief engineer will act on the application, as recommended, unless a petition is filed opposing the application or the applicant files a petition contesting the chief engineer's recommendation.

If a petition opposing the application or contesting the recommendation is filed, then a hearing will be scheduled and the Water Management Board will consider the application. Notice of the hearing will be given to the applicant and any person filing a petition.

Any person interested in opposing or supporting this application or recommendation must file a written petition with BOTH the applicant and chief engineer. The applicant must file a petition if contesting the chief engineer's recommendation. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by March 11, 1996.

The petition may be informal, but must include a statement describing the petitioner's interest in the application, the petitioner's reasons for opposing or supporting the application, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained. Contact Eric Gronlund at the above Water Rights Program address to request copies of information pertaining to this application.

Nettie H. Myers,
Secretary
Department of Environment
and Natural Resources.

Dear Mr. Lindstad:

Enclosed is Water Permit No. 1636-1 authorizing construction of your water diversion system and beneficial use of the water, not exceeding the limits as specified in the Water Permit.

Also enclosed is Form 10, Notice of Completion of Works and Application of Water to Beneficial Use, which you are to complete and submit to the Chief Engineer when you have completed the system and/or have put the water to beneficial use. An inspection can then be scheduled so that the Water License may be issued, thus completing your acquisition of a Water Right.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Program
605 773-3352

enclosures

PLEASE NOTE: Certain changes may be made to your water permit usually without affecting the priority date. The location of a point of diversion may be changed or additional points of diversion may be approved if the water source remains unchanged; no additional water is appropriated; and, if irrigating, no additional land is irrigated. The change may be allowed without application or publication, if the Water Rights Program is contacted and the chief engineer makes a finding that the change does not increase the potential for interference with existing diversions.

A new water permit application is required to change water sources, increase the permitted diversion rate, or increase the irrigated acreage. If the application is approved, the water permit will receive a new priority date.

**NOTICE OF COMPLETION OF WORKS AND
APPLICATION OF WATER TO BENEFICIAL USE**

Permit No. 1636-1

Wayne Lindstad
RR 2, Box 393H
Spearfish, SD 57783

Dear Mr. Lindstad:

The investigation of your water use system was conducted on November 19, 1996, by Ken Buhler, staff engineer. The investigation included the extent of application of water to beneficial use, as developed under Water Permit Nos. 1379-1 and 1636-1. Your final water right document, the Water License, can now be issued. Upon licensing, the applicable portions of Water Permit No. 1379-1 will be incorporated into 1636-1.

Statutes require that we charge a \$50.00 fee for the investigation and issuance of the Water License. Upon receipt of the \$50.00 fee from you, we will begin processing your Water License.

**Please remit fee to:
Department of Environment & Natural Resources
Water Rights Program
523 E. Capitol
Pierre, SD 57501-3181**

South Dakota Water Law 46-5-30.1 requires that a permit holder may not divert water until the \$50.00 license fee has been paid. Please contact us if you have any questions.

Sincerely,

Cheryl F. Frost
Secretary
Water Rights Program
(605) 773-3352

NOTE: On check or money order, please specify your permit number. This will insure proper handling of the fee.

SYSTEM SUMMARY:

Water from well No 1. Flows 48 gpm. The water is used for livestock use at the stock tank at the well, at the house and at the hatchery. The dam in SE¹/₄SE¹/₄Sec.27, T7N-R2E listed on the permit is no longer part of the system (leaks to gypsum, won't hold water). Water from well No. 2 and well No.3 is used in the busses (3 tanks per abandoned buss). The "tanks" are converted bathtub/showerstalls which hold approximately 250 gallons per "tank". Discharge from tanks goes to dugout No. 1 and Dugout No. 2. Well No. 2 and Well No.3 can also discharge directly to dugout No.1 and Dugout No.2. Discharge from dugout No. 1 and dugout No.2 go to dugout No.3. Overflow from dugout No. 3 dissipates in the field below the dugout.

Belle Fourche River - Water District

Report Of Examination Of Works And/Or Application of Water To Beneficial Use

TO: Chief Engineer, Water Rights Program, DENR, Foss Bldg., Pierre, SD 57501

I have this day, November 19, 1996, made a thorough examination of the water use system constructed by Wayne Lindstad of Spearfish holder of Permit Nos. 1379-1 and 1636-1, bearing the priorities of December 9, 1986 and January 16, 1996 respectively authorizing the diversion of 0.16 and 0.23 cu. ft. per second respectively and/or the storage of 11.1 acre-feet of the waters of groundwater for domestic and commercial use purposes, in Lawrence County.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

Water is diverted from 3 wells: 828 feet deep, 760 feet deep, and 776 feet deep. The wells are located: 1). 2633 feet north and 580 feet east; 2). 385 feet north and 770 feet east; and 3). 450 feet north and 695 feet east of the west 1/4 corner of Sec.35, T7N-R2E respectively. The wells are free flowing 174 gallons per minute.

B. Works used to transport water to place of use:

Water is transported to place through approximately 3,285 feet of 2" diameter PVC and rubber hose.

C. Works used to apply water to beneficial use:

Water is applied to beneficial use for livestock watering, domestic use, fish rearing tanks and in 3 dugouts located in the NW1/4 SE1/4 SW1/4 NW1/4 Sec.35, T7N-R2E. The combined storage capacity of the dugouts is 2.44 acre-feet.

The system is in the following condition good. The points of diversion are located 1). 2633 feet north and 580 feet east; 2). 385 feet north and 770 feet east; and 3). 450 feet north and 695 feet east of the west 1/4 corner of Sec.35, T7N-R2E (NE1/4NW1/4NW1/4NW1/4 Sec.35; NW1/4SE1/4SW1/4NW1/4 Sec.35; and NW1/4SE1/4SW1/4NW1/4 Sec.35, T7N-R2E respectively). The works are capable of diverting and conveying to the place of use .39 cu. ft. per second of water and/or storing 2.44 acre-feet of water which is to be used for domestic and commercial use. The license should be issued for 0.39 cfs and/or 2.44 acre-feet of storage. Applicable permit qualifications have been complied with: yes

Exceptions to compliance are: n/a

Ken Buhler
Natural Resources Engineer
DENR, Water Rights Program

STATE OF SOUTH DAKOTA

WATER LICENSE NO. 1636-1

(1) Wayne Lindstad, RR 2, Box 393H, Spearfish SD 57783 made Application No. 1636-1, January 16, 1996 for a water permit to divert 0.23 cubic feet of water per second (cfs) from groundwater (one additional well) into three shallow ponds, Lawrence County, South Dakota for domestic and commercial use (fish farming operation) purposes. Permit No. 1636-1, with a priority date of January 16, 1996 was approved March 11, 1996 and issued to the applicant for diversion of water with construction of the described water supply system to be completed on or before March 11, 2001 and for the application to beneficial use of said water on or before March 11, 2005.

The permit holder submitted a *Notice of Completion of Works and Application of Water to Beneficial Use* on April 24, 1996. The *Notice* stated the diversion system was completed December, 1995 and the water placed to beneficial use December, 1995.

Water Permit No. 1379-1 with a priority date of December 9, 1986, authorized 0.16 cfs from two wells. The water was diverted to a 8.9 acre-feet storage dam which is no longer utilized by the system. The applicable portions of Permit No. 1379-1 have been incorporated into Water License No. 1636-1.

(2) It is certified that the applicant has complied with the provisions of South Dakota State Law relating to completion of the construction of the water supply system and is entitled to divert 0.39 cubic feet of water per second and to store 2.44 acre-feet of water in three dugouts for beneficial use. The location of the diversion points are: Well #1 - 2,633 feet north and 580 feet east (NW 1/4 NW 1/4); Well #2 - 385 feet north and 770 feet east (SW 1/4 NW 1/4); and Well #3 - 450 feet north and 695 feet east (SW 1/4 NW 1/4); all from the west quarter corner of Section 35-T7N-R2E. The dugouts are located in the SW 1/4 NW 1/4 Section 35-T7N-R2E.

(3) The applicant has complied with the provisions of South Dakota State Law relating to the application of water to beneficial use at a fish farming operation.

(4) Pursuant to South Dakota Water Law 46-5-30.1 Wayne Lindstad, RR 2 Box 393H, Spearfish SD 57783 the holder and/or owner of Incorporated Water Permit No. 1636-1 is issued a license to appropriate water, the right to store 2.44 acre-feet of water and to divert 0.39 cubic feet of water per second from groundwater (three wells) with priority dates of December 9, 1986 (0.16 cfs) and January 16, 1996 (0.23 cfs) from the locations specified in (2) of this license for the purpose of domestic and commercial use. This license is subject to any limitations or qualifications listed in Incorporated Water Permit No. 1636-1 and subject to South Dakota State Law.

RR 2, Box 393H
Spearfish, SD 57783

Dear Mr. Lindstad:

Enclosed is Water License No. 1636-1. This is the final water right document completing your process of obtaining a Water Right. Enclosed is Receipt No. 415773 in the amount of \$50.00 which you paid for the investigation and issuance of the Water License.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 1636-1, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Very truly yours,

JOHN HATCH, Chief Engineer
Water Rights Program

RE: Pressure Gage on well

COMMENTS:

Mr. Lindstad called to inform me that he had purchased a pressure gage and intended to install it on the one of the wells authorized by Water Right No. 1636-1. A condition of the water right is to have pressure gages installed on the well. This well which is authorized by WR No. 1636-1 is located on Mr. Frank Loup's (?spelling?) property. Mr. Loup refused to allow Mr. Lindstad to put the pressure gage on the well. I informed Mr. Lindstad that I would write-up a file documentation reflecting that he tried to install a pressure gage but was unable to because of access.

Mr. Lindstad said that pressure gages are installed on his other wells.
