**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 1921-1, Cabbage Patch River Ranch, LLP**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 1921-1, Cabbage Patch River Ranch LLP, c/o Pete Reinert, 19153 Vista Place, Howes SD 57748

The Chief Engineer is recommending APPROVAL of Application No. 1921-1 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. Low flows as needed for downstream domestic use, including livestock water and prior water rights must be by-passed. Diversion under this permit shall be in accordance with any written orders issued by the Chief Engineer.
2. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

Garland Erbele, Chief Engineer
April 5, 2011

NOTE: The Water Rights Program intends to proceed with cancellation of Water Right No. 1053-1 and Water Permit No. 1060-1 which appropriated water from the Cheyenne River for irrigation of some of the same lands included under this permit. Notice will be provided to Cabbage Patch River Ranch regarding scheduling a hearing for cancellation before the Water Management Board.

REPORT ON APPLICATION NO. 1921-1

Cabbage Patch River Ranch, LLP

March 9, 2011

Water Permit Application No. 1921-1 proposes to appropriate 4.0 cubic feet of water per second (cfs) from the Cheyenne River located in NW¼ SE¼ Section 25 for irrigation of 364 acres located in the S½ SE¼ Section 24 and the N½, N½ SW¼, NW¼ SE¼ Section 25, all in T6N-R15E. The project is located in Meade County approximately 20 miles southeast of Enning and about 2½ miles below the confluence of the Belle Fourche River with the Cheyenne River.

This application is to replace Water Right No. 1053-1 and Water Permit No. 1060-1 authorizing diversions from the Cheyenne River. According to the applicant, the reason for the new application is that irrigation has not taken place for a number of years and they basically concede that Water Permit No. 1060-1 and Water Right No. 1053-1 have been forfeited. It is the intent of Water Rights, that with the approval of this application, to proceed with cancellation of Water Permit No. 1060-1 and Water Right No. 1053-1.

WATER SOURCE – CHEYENNE RIVER

Formed by the confluence of Antelope and Dry Fork creeks, the Cheyenne River rises in northeastern Wyoming in the Thunder Basin National Grassland in northeastern Converse County, Wyoming. It flows east into South Dakota, passes Edgemont, and skirts the southern end of the Black Hills, passing through Angostura Reservoir.

On the east side of the Black Hills, the river flows northeast, past Oral and the Buffalo Gap National Grassland, and along the northwestern boundary of the Pine Ridge Indian Reservation and Badlands National Park. It is joined by Rapid Creek, passes Wasta and is joined by the Belle Fourche River in eastern Meade County, after which it flows east-northeast along the southern boundary of the Cheyenne River Indian Reservation. It is joined by Cherry Creek at the town of Cherry Creek and then flows into the Missouri River approximately 32 miles north-northwest of Pierre, with the lower 35 miles of the river forming an arm of Lake Oahe.

Perennial Cheyenne River flows, above and below Angostura Reservoir, are normally low with occasional high flows occurring during spring snowmelt and periodic rainstorms. Average precipitation in the area is about 16-inches per year, most of which occurs from April through September. In dry to normal periods, Angostura reservoir does not normally contribute flow to the Cheyenne River.

Since 1929, the USGS has maintained a stream flow gaging station on the Cheyenne River near Wasta. Data from this gaging station for the June through August interval indicate there is a 50-percent probability the median flow rate will range from 102 to 324 cfs or greater at this location during this interval of any given year. There is a 75-percent probability the median flow rate will range from 59 to 106 cfs or greater for the same interval at this location (Table 1).

Since 1935, the USGS has maintained a stream flow gaging station on the Belle Fourche River near Elm Springs. Data from this gaging station for the June through August interval indicate there is a 50-percent probability the median flow rate will range from 235 to 311 cfs or greater at

this location during this interval of any given year. There is a 75-percent probability the median flow rate will range from 143 to 161 cfs or greater for the same interval at this location (Table 2).

Flows from the upper Cheyenne and Belle Fourche Rivers combine and flow northeast past the proposed project site to Lake Oahe and the Missouri River.

Since 1951, the USGS has maintained a stream flow gaging station on the Cheyenne River near Plainview, approximately 23 miles downstream from the proposed project. Data from this gaging station for the June through August interval indicate there is a 50-percent probability the median flow rate will range from 401 to 822 cfs or greater at this location during this interval of any given year. There is a 75-percent probability the median flow rate will range from 285 to 342 cfs or greater for the same interval at this location (Table 3).

During severe drought in the Upper Cheyenne River Basin, Water Rights with diversions from the Cheyenne River could be subject to Shut-off Orders issued by the Chief Engineer. The orders affect the Cheyenne River stretching from the Wyoming/South Dakota State Line to the confluence of the Belle Fourche River. The orders terminate at the Belle Fourche River confluence due to the additional flow provided by the Belle Fourche River (Table 2).

Shut-off Orders have been issued for the Cheyenne River in 1989, 1990, 2006 and 2007. Although the 2006 Order was issued on June 30 it was rescinded on September 5th allowing diversions from the Cheyenne River. The 2007 Order was issued on June 27th was rescinded on two or three instances allowing junior water right holders to divert water from the Cheyenne River for short durations (i.e. 24 to 48 hours).

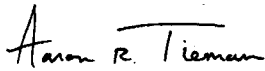

REVIEW OF EXISTING WATER PERMITS/RIGHTS

Upstream of this project to the confluence with the Belle Fourche River there is one existing water right appropriating 9.57 cfs and downstream there are 12 existing water rights appropriating 39.49 cfs. At times, especially during drought periods, low flows occur in the Cheyenne River reach from the reservoir to the confluence with the Belle Fourche River.

Except during severe drought conditions in the Upper Cheyenne River Basin, historical USGS stream flow data indicates that a diversion rate of 4.0 cfs of water should not adversely impact existing water rights or domestic water use downstream of this proposed project.

CONCLUSIONS

1. Water Permit Application No. 1921-1 proposes to appropriate 4.0 cfs from the Cheyenne River for irrigation use.
2. During extremely dry conditions, a low-flow bypass or shutoffs may be ordered by the Chief Engineer in order to protect downstream domestic use and prior water rights.
3. Except during severe drought conditions in the Upper Cheyenne River Basin, historical USGS stream flow data indicates that a diversion rate of 4.0 cfs of water should not adversely impact existing water rights or domestic water use downstream of this proposed project.

NOTICE OF ONE YEAR SUSPENSION OF WATER PERMIT

PLACE, HOWES, SD 57748

FROM: Garland Erbele Chief Engineer
Water Rights Program *Garland Erbele*

SUBJECT: One Year Suspension of Water Permit Nos. 1921-1 and 1922-1

On March 7, 2013, the Water Management Board ordered:

Effective April 7, 2013, Water Permit Nos. 1921-1 and 1922-1 be suspended for the 2013 irrigation season for failure to submit the 2012 irrigation questionnaires.

If the 2012 irrigation questionnaires are received prior to April 7, 2013 the suspensions will not take effect.

Suspension of a water permit or right means water may not be pumped during the 2013 irrigation season. Consistent with the Board's order, you are not permitted to irrigate in 2013 unless the irrigation questionnaire is submitted by April 7th.

After April 7th, you may petition the Water Management Board to rescind the suspension. You will need to submit the 2012 irrigation questionnaires and a letter to our office requesting time on the agenda for the next Water Management Board meeting scheduled for May 1 and 2, 2013 in Pierre, SD. The letter should include your reasons for not completing the 2012 irrigation questionnaires. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

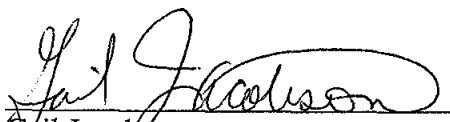

Water Rights Staff will conduct compliance checks of suspended water permits this summer to determine if irrigation is taking place.

Please contact Genny McMath (605) 773-3352, if you have any questions.

Dear Genny:

To follow up our telephone conversations and email exchange of earlier this week, I have forwarded the 2015 Water Management Board Irrigation Questionnaire on to the client. As I generally understand your email of Wednesday, March 23, 2016, at 2:52 p.m. (MDT), to the extent they are unable to get these matters completed by April 4th, I will of course be in contact with you. Please appreciate they understand the urgency of these matters and are moving those issues forward. If I can provide you anything else or if you need any further follow-up as it concerns these matters, please feel free to contact me.

RE: Cabbage Patch River Ranch LLLP

Dear Mr. Cammack:

The 2015 irrigation questionnaires for Water Permit Nos. 1921-1 and 1922-1, held by Cabbage Patch River Ranch LLLP were submitted on April 1, 2016. Thank you for helping to get the questionnaires submitted and for your assistance in updating our records with the new contact information.

The questionnaires were originally mailed in October, 2015 to Pete Reinert as manager for Cabbage Patch River Ranch LLLP. When the forms were not returned, a notice was sent to Mr. Reinert scheduling a hearing for March 3, 2016. At that time, the Water Management Board suspended both permits for a period of one year effective 30 days from the date of the hearing.

After the March 3rd hearing, we became aware the contact information we had on file was incorrect. The water permits were removed from the list of those suspended by the Board due to improper notice. With your help, the questionnaires are now on file and our records have been changed to reflect Cammack Cattle Company as the manager for the ranch.

The 2016 irrigation questionnaires will be directed to your attention in October, 2016. If you have any questions, please get in touch with me.

Sincerely,

NOTE: Water permits may be cancelled for nonconstruction after the five year construction period has expired. Once a water permit is developed and the water used, the permit becomes a right. A water right may be lost for three reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.

RE: Water Right Nos. 542-1, 543-1, 1921-1 and 1922-1

Dear Mr. Feist:

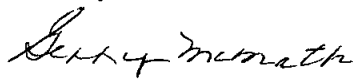

I am writing to acknowledge receipt of the transfer forms and filing fees submitted on your behalf by Gunderson, Palmer, Nelson & Ashmore Law Firm in Rapid City.

The ownership changes have been completed. Water Right Nos. 542-1, 543-1, 1921-1 & 1922-1 formerly held by Cabbage Patch River Ranch LLLP are now listed in your name.

For informational purposes, each October our program mails out irrigation questionnaires to water right holders in South Dakota who utilize pumping systems. The forms are typically due back in our office by the first week in December. I have enclosed a copy of last years' forms for your review and to give you an idea of what type of information is required. The actual forms you will need to complete and return will be mailed to you in October.

If you have any questions concerning the water rights, please give me a call.

Sincerely,
