

WATER PERMIT NO. 1981-1

Name of Applicant: Homestake Mining Company

Address: 11457 Bobtail Gulch St, Central City SD 57754

Phone: 605 722-4796

Amount of Water Claimed: 9.6 cf

Total Acres: 675.18

Source of Water Supply: Belle Fouché River

Water to be used for: irrigation

County: Meade

Type of Waste Disposal System:

Location: approximately 35 miles east of Sturgis

PRIORITY

Date Received: 6-4-18

Application/License Fee: \$ 1950

Corrected Application Received:

Period of Annual Use: May 1 – August 31

Remarks:

Diversion Point: W 1/2 NW 1/4 Sec 1-T4N-R11E

and E 1/2 SE 1/4 Sec 31-T5N-R12E

Land to be Irrigated: N 1/2, E 1/2 SE 1/4 Sec 1-T4N-R11E, W 1/2 NW 1/4, NW 1/4 SW 1/4, NE 1/4 NW 1/4, NW 1/4 NE 1/4 Sec 6-T4N-R12E; SW 1/4, SE 1/4 NW 1/4, SW 1/4 NE 1/4, N 1/2 SE 1/4 Sec 31-T5N-R12E

Notice of Hearing - date to intervene: _____

**SOUTH DAKOTA
WATER PERMIT NO. 1981-1**

Date of first receipt of application June 4, 2018.

The Chief Engineer, on behalf of the Water Management Board, issues Water Permit No. 1981-1 to Homestake Mining Company of California, 11457 Bobtail Gulch St., Central City SD 57754 authorizing the construction of the water use system and the placing of water to beneficial use subject to the following limitations, conditions and qualifications:

1. Water Permit No. 1981-1 appropriates 9.6 cubic feet of water per second from the Belle Fourche River located between points in the W 1/2 NW 1/4 Section 1-T4N-R11E and the E 1/2 SE 1/4 Section 31-T5N-R12E for irrigation of 675.18 acres located in the N 1/2, E 1/2 SE 1/4 Section 1-T4N-R11E; W 1/2 NW 1/4, NW 1/4 SW 1/4, NE 1/4 NW 1/4, NW 1/4 NE 1/4 Section 6-T4N-R12E and the SW 1/4, SE 1/4 NW 1/4, SW 1/4 NE 1/4, N 1/2 SE 1/4 Section 31-T5N-R12E. The site is located approximately 38 miles east of Sturgis SD.
2. The amount of the appropriation may not exceed 2 acre feet annually for each acre of land to which water is actually and beneficially applied for irrigation. The water is to be used during the following described annual period: May 1 – August 31.
3. The date from which applicant may claim right is June 4, 2018.
4. The date of approval of Permit No. 1981-1 is July 23, 2018.
5. One-fifth of the construction is to be completed on or before January 23, 2021.
6. All construction is to be completed on or before July 23, 2023.
7. Water is to be put to beneficial use on or before July 23, 2027.
8. Water rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.

QUALIFICATIONS

1. Low flows as needed for downstream domestic use including livestock water and prior rights must be bypassed. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
2. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

**RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 1981-1, Homestake Mining Company of California**

Pursuant to SDCL 46-2A-2, the following is the recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 1981-1, Homestake Mining Company of California, c/o Jeff Burich, 11457 Bobtail Gulch St, Central City SD 57754.

The Chief Engineer is recommending APPROVAL of Application No. 1981-1 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. Low flows as needed for downstream domestic use including livestock water and prior rights must be by-passed. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.
2. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

Jeanne Goodman, Chief Engineer

July 2, 2018

REPORT ON WATER PERMIT APPLICATION NOS. 1979-1, 1980-1 & 1981-1
Homestake Mining Company of California
June 27, 2018

Application No. 1979-1 proposes to appropriate 8.0 cubic feet of water per second (cfs) from the Belle Fourche River located between points in the W $\frac{1}{2}$ SW $\frac{1}{4}$ Section 2 and SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 13 for irrigation of 566.90 acres located in the W $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 2; E $\frac{1}{2}$ Section 11; NW $\frac{1}{4}$ Section 13; N $\frac{1}{2}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 14; all in T6N-R8E.

Application No. 1980-1 proposes to appropriate 10.7 cfs from the Belle Fourche River located between points in the W $\frac{1}{2}$ NW $\frac{1}{4}$ Section 8 and the E $\frac{1}{2}$ SE $\frac{1}{4}$ Section 9 for irrigation of 752.56 acres located in the S $\frac{1}{2}$ SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 4; S $\frac{1}{2}$ S $\frac{1}{2}$ Section 5; SE $\frac{1}{4}$, E $\frac{1}{2}$ SW $\frac{1}{4}$ Section 6; NE $\frac{1}{4}$, NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 7; N $\frac{1}{2}$ NW $\frac{1}{4}$, NE $\frac{1}{4}$ Section 8; N $\frac{1}{2}$ Section 9; all in T5N-R9E.

Application No. 1981-1 proposes to appropriate 9.6 cfs from the Belle Fourche River located between points in the W $\frac{1}{2}$ NW $\frac{1}{4}$ Section 1-T4N-R11E and the E $\frac{1}{2}$ SE $\frac{1}{4}$ Section 31-T5N-R12E for irrigation of 675.18 acres located in the N $\frac{1}{2}$, E $\frac{1}{2}$ SE $\frac{1}{4}$ Section 1-T4N-R11E; W $\frac{1}{2}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ SW $\frac{1}{4}$, NE $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 6-T4N-R12E and the SW $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NE $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$ Section 31-T5N-R12E.

The three proposed irrigation projects, Nos. 1979-1, 1980-1 and 1981-1, are located 20, 23, and 38 miles east of Sturgis respectively, in southern Meade County.

Review of the Proposed Project and Water Source

Combined, application Nos. 1979-1, 1980-1, and 1981-1 propose to appropriate 29.9 cfs of water to irrigate 1994.64 acres from the Belle Fourche River. The proposed source of water for these projects is from the Belle Fourche River in a 40 mile long reach between 12 river miles downstream from the Belle Fourche Irrigation District to 30 river miles upstream of the confluence with the Cheyenne River.

The Belle Fourche River headwaters in northeast Wyoming and flows northeast around the northern edge of the Black Hills of South Dakota then east to the Cheyenne River confluence north of the town of Wasta for an approximate distance of 290 river miles. Included in this stretch is the Belle Fourche Reservoir, which is part of the United States Department of the Interior's Belle Fourche Project. This project was completed in 1914 and includes a diversion dam, storage dam and a system of canals that irrigate 57,068 acres within the Belle Fourche Irrigation District located in southern Butte County in western South Dakota.

The United States Geological Survey (USGS) has maintained two stream flow gaging stations from 1953 to present on this reach of the Belle Fourche River east of Sturgis, SD. These three applications are located downstream of the Belle Fourche Irrigation District in the river reach

between the USGS Gaging Station near Sturgis and the USGS Gaging Station near Elm Spring (USGS, 2018). Both of these gages are located downstream of the Belle Fourche Irrigation District waste ways and tributaries such as Owl and Horse Creeks which funnel irrigation return flows from the Belle Fourche Irrigation district into the Belle Fourche River. Significant portions of the water in this reach of the river where the proposed irrigation projects are to be located consist of irrigation return flows coming from the Belle Fourche Irrigation District during the irrigation season.

Unlike a typical prairie river that has its flow peaking in the March and April due to snow melt and spring rains then trailing off throughout the summer months into fall, flow in the Belle Fourche River has an early peak in the spring and a larger peak flow in the summer from irrigation return flows. The impact of the return water from the upstream irrigation project can be observed in both Figure 1 and Figure 2 with the March and April spring peak dwarfed by a larger increase in flows during the months of May through September.

Figure 1 is a percentile flow hydrograph with the daily 5, 10, 25, and 50 percentile values for the gage near Sturgis based upon 64 years of available flow data. Based upon review of the flow hydrograph flows in excess of 50 cfs can be expected on average three out of four years during the irrigation season.

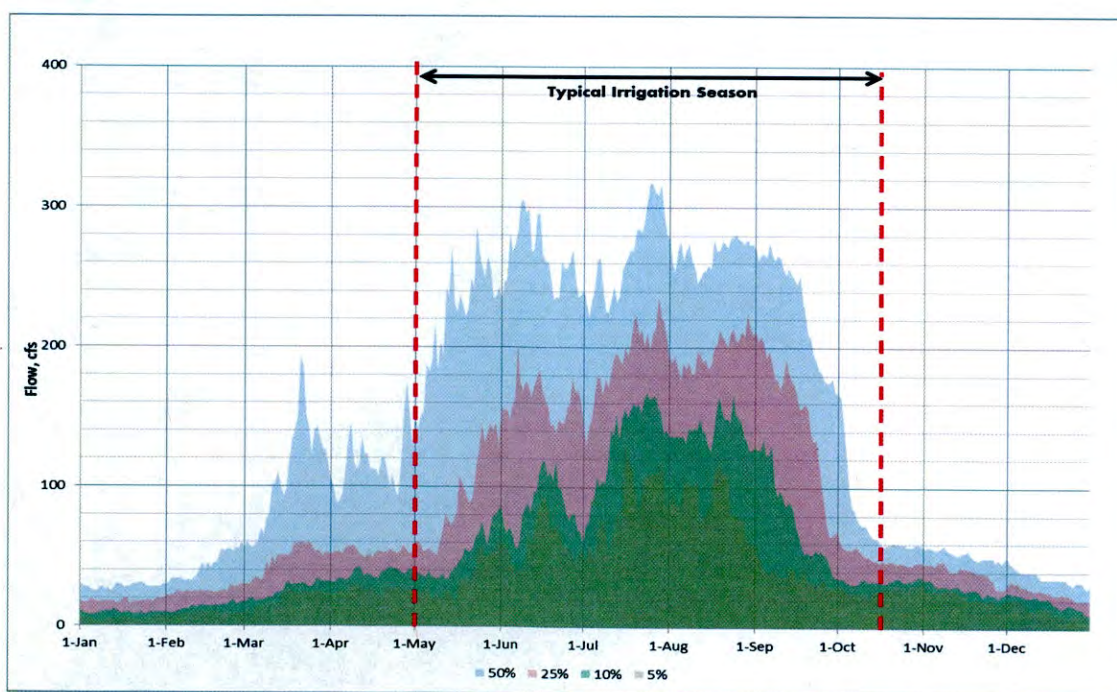

Figure 1. Daily percentile flow hydrographs for the USGS Belle Fourche River near Sturgis, 1953-2017, contributing drainage area 5798 mi² (USGS, 2018).

Figure 2 is a daily percentile flow hydrograph for the gage near Elm Springs, downstream from these proposed irrigation projects. Based upon 64 years of available flow data review of the

hydrograph indicate flows in excess of 50 cfs can be expected on average three out of four years during the irrigation season.

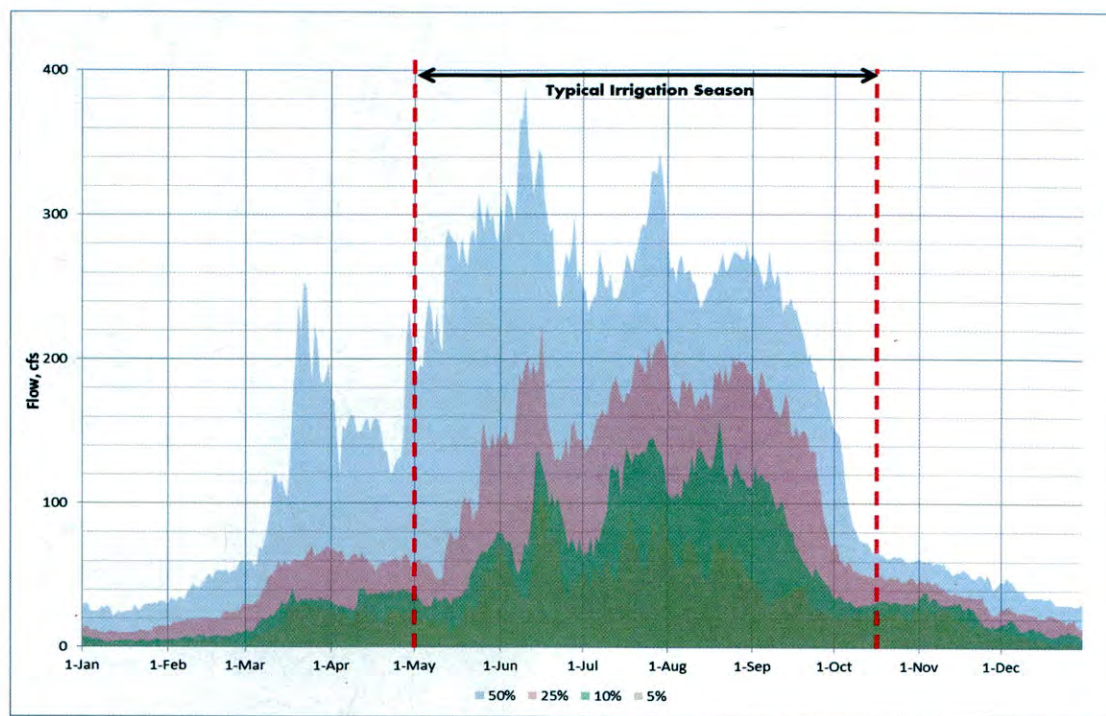

Figure 2. Daily percentile flow hydrographs for the USGS Belle Fourche River near Elm Springs, 1953-2017, contributing drainage area 6997 mi² (USGS, 2018).

Review of Existing Water Rights

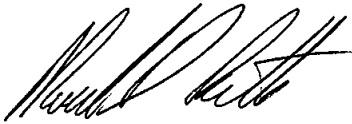

There are 20 existing water rights/permits appropriating 70.04 cfs in the Belle Fourche River reach between the USGS gaging station near Sturgis and the confluence with the Cheyenne. Based upon the historical flow records for the Sturgis gage and Elm Springs gage, there is a high probability water will be available for all three of these applications during the irrigation season (Water Rights, 2018).

Except under extremely dry climatic conditions, water availability from the Belle Fourche River would not be expected to be an issue if these applications are approved. However, to address the rare occasions when water availability is an issue, the permit should contain the following qualification:

- Low flows as needed for downstream domestic use including livestock water and prior rights must be by-passed. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

Conclusions

1. Combined, Application Nos. 1979-1, 1980-1, and 1981-1 propose to appropriate 29.9 cfs of water to irrigate 1994.64 acres from the Belle Fourche River.
2. The proposed source of water for these projects is from the Belle Fourche River in a 40 mile long reach 12 river miles downstream from the Belle Fourche Irrigation District and 30 river miles upstream of the confluence with the Cheyenne River.
3. Except under extremely dry climatic conditions, water availability from the Belle Fourche River in this reach would not be expected to be an issue if these applications are approved.
4. If approved the permit should contain the following qualification:
Low flows as needed for downstream domestic use including livestock water and prior rights must be by-passed. Diversions under this Permit shall be in accordance with any written orders issued by the Chief Engineer.

Mark D. Rath
Natural Resources Engineer III

Dear Mr. Burich:

Water Permit Application Nos. 1979-1, 1980-1 and 1981-1 for irrigation use have been examined and found to comply with the South Dakota Water Laws and applicable rules. A notice has been sent to the Faith Independent printed at Faith SD (Ph # 605 967-2161) and the Rapid City Journal printed at Rapid City SD (Ph # 605 394-8300). You will need to contact the newspapers and authorize publication of this notice. For your information, a copy of the notice, the recommendation of the Chief Engineer and report on the application are enclosed. Please review the notice prior to publication and notify this office, if you have any corrections or questions.

Be sure to contact the above newspapers to authorize publication of your Notice and to arrange for payment. Early contact with the papers can eliminate delays. Upon receiving authorization from you, the publisher has been instructed to publish your notice. The newspaper has also been instructed to send us the Proof of Publication. We must receive Proof of Publication before action can be taken on the application.

Sincerely,

Eric Gronlund
Natural Resources Engineer
(605) 773-3352

NOTE: If you plan to contest any part of the Chief Engineer's recommendation, you must file a petition pursuant to the procedures outlined in the attached notice of hearing. The Water Management Board will then consider your concerns during a hearing on the application.

NOTICE OF APPLICATION NOS. 1979-1, 1980-1 and 1981-1 to Appropriate Water

Notice is given that Homestake Mining Company of California, c/o Jeff Burich, 11457 Bobtail Gulch St, Central City SD 57754 has filed the following applications for a water permit.

Application No. 1979-1 proposes to appropriate 8.0 cubic feet of water per second (cfs) from the Belle Fourche River located between points in the W 1/2 SW 1/4 Section 2 and SE 1/4 NW 1/4 Section 13 for irrigation of 566.90 acres located in the W 1/2 SW 1/4, SE 1/4 SW 1/4, SW 1/4 SE 1/4 Section 2; E 1/2 Section 11; NW 1/4 Section 13; N 1/2 NE 1/4, NE 1/4 NW 1/4 Section 14; all in T6N-R8E. The site is located approximately 20 miles northeast of Sturgis SD.

Application No. 1980-1 proposes to appropriate 10.7 cfs from the Belle Fourche River located between points in the W 1/2 NW 1/4 Section 8 and the E 1/2 SE 1/4 Section 9 for irrigation of 752.56 acres located in the S 1/2 SW 1/4, SW 1/4 SE 1/4 Section 4; S 1/2 S 1/2 Section 5; SE 1/4, E 1/2 SW 1/4 Section 6; NE 1/4, NE 1/4 NW 1/4 Section 7; N 1/2 NW 1/4, NE 1/4 Section 8; N 1/2 Section 9; all in T5N-R9E. The site is located approximately 23 miles east of Sturgis SD.

Application No. 1981-1 proposes to appropriate 9.6 cfs from the Belle Fourche River located between points in the W 1/2 NW 1/4 Section 1-T4N-R11E and the E 1/2 SE 1/4 Section 31-T5N-R12E for irrigation of 675.18 acres located in the N 1/2, E 1/2 SE 1/4 Section 1-T4N-R11E; W 1/2 NW 1/4, NW 1/4 SW 1/4, NE 1/4 NW 1/4, NW 1/4 NE 1/4 Section 6-T4N-R12E and the SW 1/4, SE 1/4 NW 1/4, SW 1/4 NE 1/4, N 1/2 SE 1/4 Section 31-T5N-R12E. The site is located approximately 38 miles east of Sturgis SD.

Pursuant to SDCL 46-2A-2, the Chief Engineer recommends APPROVAL of Application Nos. 1979-1, 1980-1 and 1981-1 with qualifications because 1) unappropriated water is available, 2) existing rights will not be unlawfully impaired, 3) it is a beneficial use of water, and 4) it is in the public interest. The Chief Engineer's recommendations with qualifications, the applications, and staff report are available at <http://denr.sd.gov/public> or contact Eric Gronlund for this information, or other information, at the Water Rights Program address provided below.

Any person interested in opposing or supporting these applications or recommendations must file a written petition with BOTH the applicant and Chief Engineer. The applicant must file a petition if contesting the Chief Engineer's recommendations. The Chief Engineer's address is "Water Rights Program, Foss Building, 523 E Capitol, Pierre SD 57501 (605 773-3352)" and the applicant's mailing address is given above. A petition filed by either an interested person or the applicant must be filed by July 23, 2018.

The petition may be informal, but must include a statement describing the petitioner's interest in the applications, the petitioner's reasons for opposing or supporting the applications, and the signature and mailing address of the petitioner or the petitioner's legal counsel, if legal counsel is obtained.

If the applicant does not contest the recommendations of the Chief Engineer and no petition to oppose the applications are received, the Chief Engineer shall act on the applications pursuant to the recommendations with no hearing held before the Water Management Board. If a petition opposing the applications or contesting the recommendation is filed, then a hearing will be scheduled and the Water Management Board will consider these applications. Notice of the hearing will be given to the applicant and any person filing a petition.

Steven M. Pirner, Secretary, Department of Environment and Natural Resources. Published once at the total approximate cost of _____.

Central City SD 57754

Dear Mr. Burich:

Enclosed are Water Permit Nos. 1979-1, 1980-1 and 1981-1 authorizing construction of the water diversion systems and beneficial use of the water, not exceeding the limits as specified in the Water Permits.

Form 10's, *Notice of Completion of Works and Application of Water to Beneficial Use*, are enclosed. Please return the completed forms after you have finished the systems and have put the water to beneficial use. An investigation can then be scheduled so the water license may be issued, thus completing the acquisition of a water right.

An informational sheet *Common Water Right Questions?* is also enclosed. This sheet is intended to answer some of the questions associated with obtaining and keeping a water right.

Sincerely,

Jeanne Goodman, Chief Engineer
