Re: Valleys:

The rules adopted by the Water Management Board for establishing a water use control area on the Belle Fourche River, Whitewood Creek and Owl Creek requires that the water right holder be assessed a fee of ten dollars for each cubic foot per second or portion thereof of the diversion capability of the diversion works plus twenty-five cents for each acre irrigated as shown by the water rights of record in the Division of Water Rights. These fees are required to be paid to the Division of Water Rights by July 1, 1981.

Permits for which fees have not been paid by July 1, 1981 shall be refused the right to divert water for the remainder of the year. The fees paid will be used to defray the costs of providing water master services within the water use control area. The following is a tabulation of your assessment.

ownership of Water Rights

COMMENTS:

Mr. Vallery had crossed Phillip's name off of 1984 questionnaire - I called him to inquire on the status of the water rights

He indicated all Permits or Rights listed under Phillip & Thornton Vallery should be listed under Thornton only - Phillip has passed away.

Mr. Vallery stated him & his wife are now owners of the property.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.
