Dear Mr. Johnston:

I am writing in regard to the 2016 irrigation questionnaires you submitted for Water Right Nos. 248-1, 310B-1 and 311B-1. Copies of the questionnaires are enclosed showing the legal descriptions covered under each water right and the water use reported. In reviewing the data, the amount of water pumped seems excessive and may be in error.

All three water rights authorize diversion of water from the Belle Fourche River allowing up to three acre-feet of water per acre per year (36 inches per acre). The following information was reported:

Water Right No. 248-1	Water Right No. 310B-1	Water Right No. 311B-1
• Acres irrigated: 64 • Authorized water use: 192 acre feet • Water diverted: 398 acre feet (equivalent to 6.2 acre feet per acre)	• Acres irrigated: 284 • Authorized water use: 852 acre feet • Water diverted: 1326 acre feet (equivalent to 4.7 acre feet per acre)	• Acres irrigated: 94 • Authorized water use: 282 acre feet • Water diverted: 530 acre feet (equivalent to 5.6 acre feet per acre)

In all instances above, you are reporting significantly greater volume than is authorized.

The application of water varies greatly for the different types of systems, crops irrigated, topography and climatic conditions. Given those criteria it is still rare that irrigators even apply up to the volume of water they are authorized.

Many times irrigators do not keep track of the days or hours actually pumped and estimate numbers for the questionnaires in an effort to get them completed and back in on time. While we appreciate returning the questionnaires in a timely manner, the forms need to be as accurate possible.

The information we receive each year from irrigators across the state is very valuable. The water use data supplied by irrigators is one of the tools we use to help determine if an aquifer or stream may or may not be nearing full appropriation. Our goal is to protect existing water rights and ensure that additional water rights do not impair those existing water users.

Sam Johnston

If you did indeed apply that much water in 2016, you are exceeding the limits of your water right and need to be cutting back to within authorized use as outlined in your water right. If you have any questions or have changes to make on the questionnaires, please give me a call.

Sincerely,

A handwritten signature in cursive script that reads "Genny McMath".
