Dear Sir:

I am contacting you in regard to Water Right Nos. 519-1 and 1206-1. Both water rights are listed in the name of James R Reed. Initially there were three water rights on file for Mr. Reed however one closer to Sturgis is in the process of being transferred to Michael Ballard. A review of online records with Meade County found the land described in the above listed water rights is owned by "Jason Reed Trust".

I have enclosed copies of both water rights for your review. Back when these systems were inspected for licensing, they utilized a water spreading type system and included diversion of water from a storage dam. If the systems still exist and the dry draw dam is still in place, the water rights should be maintained by transferring ownership.

Enclosed are partially completed Notice of Transfer of Ownership forms for filing ownership changes. Please review the forms and make any necessary corrections. Upon completion, please sign the form and return it to our office with a required filing fee of \$50.00 each (total of \$100). The check or money order for the fee can be made payable to the Water Rights Program.

If you do not wish to maintain the water rights or I need to be contacting someone else for ownership changes, please let me know. Thank you in advance for your help.

Sincerely,

Genny McMath

NOTE: Water permits may be cancelled for nonconstruction after the five year construction period has expired. Once a water permit is developed and the water used, the permit becomes a right. A water right may be lost for three reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.
