- Change of point of diversion -

463-1

(See your letter of October 5th-1960)

This application made for the purpose of including the flow from a 'dry draw' (Frazee Draw) which is intercepted by the dike and ditch lateral which conveys the water, to be pumped from the Belle Fourche River, for irrigation of the major part of this project. A neighbor maintains a large stock reservoir, above this project, and, for this reason, water from Frazee Draw reaches this project only after heavy rains or melting snow have cause a heavy run-off and therefore infrequently.

Dear Mr. Levin:

Thank you for the prompt return of the 1987 irrigation questionnaire for Water Right No. 821-1. I am contacting you in regard to your inquiry about completing questionnaires for Water Right Nos. 523-1 and 963-1.

Our records show the water use systems under Water Right Nos. 523-1 and 963-1 are waterspreading systems. Water Right holders with waterspreading systems are not required to submit yearly irrigation questionnaires. This is why you did not receive forms for Nos. 523-1 and 963-1.

Thank you for your inquiry into this matter. If you have any questions, please contact me.
