Dear Mr. Anderson:

This letter is in response to a call I received from your wife concerning a holding pond built by the Spearfish Country Club. On July 30 Tim Schaal and myself looked at the pond. The pond is not obstructing the flow of the creek. It is a holding pond for irrigation water and emptied at night. Because it is not obstructing normal flow of the creek we do not feel it creates any additional hazard to downstream residents.

If you have any further questions, please contact this office.

Dear Ms. Nevin:

This letter is in response to your complaint about the pond constructed by the Spearfish Country Club. On July 30 Tim Schaal and myself inspected the structure built by the country club. It is not a dam across the creek but merely a holding pond for irrigation water. Because it is not obstructing normal flow in the creek we do not feel it creates any additional hazard to downstream residents.

If you have further questions, please contact this office.

WR NO. 1199-1 & 728-1

After receiving several complaints that the Spanish Canyon Holding Company had dammed up the creek that passes through the Spanish Canyon Golf Course, we investigated the situation on July 30, 1981.

The Spanish Canyon Holding Company has built a holding pond for storage from their wells. They previously used two storage tanks and now after installing a larger underground irrigation system need more storage. The pond is built into the side of a hill and is not on the creek. The pond measures approximately 235 feet by 190 feet and 8 to 10 feet deep with 1V on 3.4 slopes.

We notified the people that issued the complaints that no action would be taken against the Spanish Canyon Holding Company.

I am writing in response to your letter to Kevin Larson dated August 12 concerning the holding pond constructed by the Spearfish Country Club. It is considered to be a holding pond by this Department and is not obstructing the natural course of the stream.

If you feel the flooding of your property is being caused by somebody or something upstream, damages caused by flooding of property can be assessed only through court action. Remedies to flooding can be obtained only through you as an individual filing a civil action suit against the party or parties which you feel are responsible for causing the problem.

Please advise this office if there are any further questions.

Mr. Kevin C. Lannon:

It was nice of you to come and
inspect the "Kneading Pond" constructed
by the Spearsfish Chapter Club. Here
in Spearsfish.

Wish the that you could have
come and talked to the families
who live here below the "Kneading
Pond" as you named it, and saved
them some when we were having
a hard rain.

Since I-90 went in whenever
we get a hard rain, not even a
flash-flood, we are flooded here.
Water runs thru my yard knee
deep. Has not gotten into my
basement as yet, but should the
"Pond" dyke break, during one of

These heavy rains, which is
very apt to do, it is such
flood not only everything
flooding, but the other lowlands
of the river South of me.

The water comes down the
highway and spreads from my
yard to the neighbors' basements
and so.

We are all very much
concerned.

We understand that it is
necessary to obtain a permit
to build a dam or pond on a
dry creek.

They changed the creek channel
so that the water from a heavy
rain or flash flood is not supposed
to run into the "Pond" which
has been had several of the
last 3 years.

Trusting you will inspect

this father, as we are very
buried.

My basement is full of
antiques and gaudy & fat
water heaters & etc.

Course the interior of my
whole house would furnish
also and everything buried
the all of space it very
much.

Hoping to hear from you
again soon regarding the
old situation.
