RE: Validation of Vested Right No. 768-1

COMMENTS:

On this date I spoke to Gene & Arlene Cox and inspected Vested Right No. 768-1. The system has been developed and used. The original dam and spreader ditches have been replaced with a portable Pacer pump with a maximum capacity of 200 gpm. The legal descriptions of both the point of diversion and the acres irrigated as described on V.R. No. 768-1 are wrong. The diversion point location and the irrigated have always been the same. Apparently the original Vested Right application is in error.

Application No. 768A-1 has been prepared and sent to the Cox's (8/7). It correctly describes the point of diversion and the irrigated acreage.

A transfer form was also left with the Cox's to transfer the V.R. to Roubiax Ranch.
