Mr. Robert Tinant

Dear Mr. Tinant:

The WI-1 form for your irrigation request has been received. A copy of the water analysis, the WI-1 form, and a copy of this letter are being sent to the State Conservation Commission.

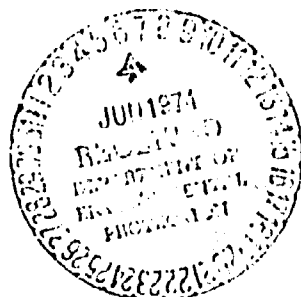

The quality of your water is designated on the back cover of Extension Circular 654 by a red encircled cross and is really quite good quality water. There should be no soil chemical trouble or chemical-physical trouble as a result of the use of this water. Although there is no physical problem or chemical-physical problem in the use of this water on the soils which you expect to irrigate, there is a very serious erosion hazard for this land as you are very well aware. (The ansel motassel sandy loam with slopes up to 21% and the holt vetal fine sandy loam with slopes to 3-9% are both subject to erosion because of the weak soil structure that these soils have and the relatively low content of clay. For this reason they should be used only for irrigated hay or pasture crops and not for row or cultivated crops. Furthermore, in the process of establishing stands of hay and pasture grasses and legumes you should endeavor to leave a cover on the soil at all times. This means part of the grass residue from the previous sod should be kept on top. You very likely have had experience in managing and tilling these soils with summer fallow techniques or have seen similar operations in cultivated areas near you. This would require the use of machinery which would lift the sod and leave parts of the sod up on top. A sub-surface blade tiller would enable you to do this and you could also establish a seed bed by not tilling too deeply with such an implement and perhaps packing slightly before attempting to seed. With these precautions you should be able to establish stands without undue loss of soil and the soil should be able to produce satisfactory hay and pasture forage for a sustained period of time under irrigation. You no doubt will have to use considerable chemical fertilizer to get the production levels which you need because some of these soils are very shallow and most of them are quite low in nitrogen as well as available phosphorus.

Sincerely yours,

Dear Sir:

I am at a loss to estimate how much water was used here for the past year. We have raised our dewatering since we dug our wells with the assumption of the "Pick" year. That year we didn't have any use. I'm not even sure which well is 1186-2 or 1181-2, so think you could estimate the gallons closer than I could but since you seem to be concerned I will estimate the pumping of 2000 Gal's per day for 15 days for a total of 300,000 Gal's for 1985.

Dear Garry

You sound like a very accommodating lady on the phone, so I'll try not to use any language that would embarrass you.

The reason I did not fill in the Questionair is that I really don't have the foggiest idea how many gallons of water was used on my corn field. Your office has a much better idea than I do. I have a probe that I stick in the ground, when its dry its turn the water on when its wet I shut it off. I don't keep a record of what day or what month; but I suppose I should just keep falsifying those reports like my neighbors do, or at least that's what they tell me they do, or they will pass a law that says I have to keep a diary diary, I sure would like that. -

The first man that came out from your office, said "He wanted to see our Irr. well," I told him I saw it every day but there was no need for him to see it, His answer was, "It's not going to cost anything, so let me look, well I don't want to be a mean guy so I said, O.K., In a couple weeks the same office sent a letter stating I would have to get a license to operate this Irr system. I ignored the letters for awhile, but finally got a registered ^{letter} that stated, that if I didn't get a license they would rescind my water rights, well that scared the pants right off me, so I sent in \$50. I guess the license was no good your going to rescind them any way.

I don't want to write any more 'Genny' this letter is boring enough already

Re: Irrigation rights

Dear Mr. Tinant:

I am writing in response to your letter of April 10, 1990 regarding your suspended Water Right No. 1186-2.

You stated in your letter that you did not know how to calculate the amount of water used. All you really need to do is keep track of the days pumped in each month, average hours per day, and your pump rate. If these figures are supplied, I can calculate the amount of water (in acre-feet) that you pumped.

I realize that there may be people who report inaccurate figures on their irrigation questionnaires. This, in the long run, will only hurt them. Irrigation water use data is very valuable. Actual water use from an underground aquifer or stream helps the Board to determine if additional applications can be approved or should be denied, establishes the permit owner's record of water use, is useful in design and development of new irrigation projects and provides excellent documentation of South Dakota's rights and claims to water when dealing with downstream States.

You stated in your letter that the Tribal President told you that the State did not have the authority to issue water rights or suspend them. We are aware of the Tribal position in this area. The Attorney General's Office advises, however, that we have jurisdiction over non-tribal members and their fee lands. A review of our records show that you fall into this category. Therefore it is our position that you must have an irrigation permit in order to irrigate.

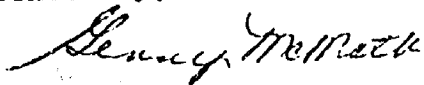

I understand and sympathize with the fact that you need to irrigate in order to pay the Pesticide Company and the REA. Unfortunately, I do not have the authority to give your irrigation rights back to you. Once the Water Management Board

May 2, 1996

takes action to suspend a water right, only it has the authority to reinstate that right. If you want suspension of Water Right No. 1186-2 for the 1990 irrigation season reconsidered, you need to submit your written request to schedule this matter before the Water Management Board at their May 23-24, 1990 meeting to be held in Watertown.

Please contact me regarding your decision in this matter.

NOTICE

RE: Violation of Water Permit No 1186-2.

Our records indicate that the 1994 Irrigation Questionnaire has not been submitted for Permit No 1186-2. The request for the Questionnaire was dated November 3, 1994. The Water Management Board has directed that owners of water permits who have not submitted the 1994 Irrigation Questionnaire be given notice of permit violation and a hearing to be held by the Board. The hearing held by the Board will determine the action to be taken for violation of Water Permit No 1186-2 qualification:

"This permit is approved subject to the Irrigation Water Use Questionnaire being submitted each year."

The hearing will be held at 9:30 am, March 8, 1995 in the Crown Room, 3rd Floor, Kings Inn Best Western Convention Center, 200 S Pierre, SD, and will be conducted pursuant to SDCL 46-1-12, 46-1-14, 46-2-9, 46-2-11 and 45-2-17. These are contested case hearings pursuant to SDCL 1-26. According to SDCL 46-1-12, the Board may suspend a permit for a period of up to one year for the first violation of a permit qualification or up to three years for a second violation, or cancel a permit for a third violation. Following the hearing, the Water Management Board can:

1. Suspend or cancel Permit No 1186-2 in accordance with applicable provisions of SDCL 46-1-12;
2. Postpone any action; or
3. Take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

If the questionnaire is received in this office on/or before March 3, 1995, you will no longer be in violation of your permit and your name will be deleted from the Board agenda.

Very truly yours,

Ron Duvall, Natural Resources Engineer IV
