COMMENTS:

Mr. Hollenbeck called about the notice he received about transferring Water Right No. 1212-2 from Billie Parsons to Federal Land Bank. He stated they no longer have an interest in this property. They thought they would be obtaining the property through foreclosure, but did not.

Mr. Hollenbeck stated he thought Boyd Parsons, Billie's brother, was buying the land. He stated they have not went to closing yet, should wait awhile before contacting Boyd Parsons. He further stated that Boyd knew what papers had to be filed and would probably contact our office when the time came.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.

NOTICE OF SHUTOFF ORDER

TO: BOYD PARSONS
PO BOX 26
MILESVILLE SD 57553

FROM: GARLAND ERBELE, Chief Engineer
Water Rights Program

SUBJECT: Cheyenne River Shutoff Order for Junior Priority Date Water Rights

Shutoff Order for Water Right Nos. 658-2(1212-2)

To protect the senior priority water rights, the department is issuing additional shutoff orders to junior water right holders with priority dates between January 1, 1960 and December 31, 1969 for the river reach between the Angostura Dam to Belle Fourche River confluence. Effective immediately, no diversions of water from the Cheyenne River and tributaries will be allowed for those permits with a priority date after January 1, 1960. Shutoff orders were issued previously to Cheyenne River water rights junior to December 31, 1969.

Flow in the Cheyenne River continues to decline to the point where domestic use of water, which includes livestock watering from the river, has become a concern. This order will be rescinded as soon as conditions improve. If conditions do not improve, this order will remain in effect until the end of the calendar year.

The USGS maintains a website where you can view real-time stream flow measurements at several sites along the river, the web address is:

<http://waterdata.usgs.gov/sd/nwis/rt>

I am asking for your cooperation in complying with this shutoff order. The ongoing drought is creating hardship for all the water right holders along the river.

If you have any questions, please contact Mark Rath or Lynn Beck with the Water Rights Program at (605) 773-3352. Thank you.

Dear Mr.Parsons:

This letter is in regards to your Water Right Nos. 658-2 and 1212-2 from the Cheyenne River. The Chief Engineer recently issued you a shutoff order due to low flows in the Cheyenne River. Recently a rainstorm over the Rapid Creek drainage is causing flows to for the short term increase downstream on the Cheyenne River. The Chief Engineer is going to temporarily allow you pump under this water right for a period of 48 hours starting when flows increase, due to this increased runoff, past your diversion point. After the 48 hour period, the shutoff order of July 18, 2006 will go back into effect.

Dear Sir:

This letter is to inform you that until further notice pumping **will be allowed** to continue under your junior priority water right(s) from the Cheyenne River. Due to recent rains and cooler temperatures, flow in the Cheyenne River has improved and appears to holding steady.

We will continue to monitor the daily stream flows. If flow conditions worsen and domestic use flow is again being impacted, DENR may be forced to again limit pumping.
