Subject: RE: [EXT] Request a time for a conference call with you this week.
Date: Thursday, February 2, 2023 10:24:00 AM

Mark and Bob,

Thank you for checking on what is needed from a water rights perspective to do some rehabilitation work on the Boy Scouts' water system as authorized by Water Right No. 1265-2. Water Right No. 1265-2 is licensed for diversion of up to 18 gallons per minute (0.04 cubic feet of water per second) to supply the camp from an infiltration gallery/well. You indicated that testing has found the capacity has decreased and is insufficient for camp water needs. From a water rights perspective, a permit holder can perform maintenance of their water system for purposes of being able to divert the amount of water authorized by their water right. As long as the water source remains unchanged, the location of the diversion point is the same, and there is no increase above the permitted amount of water, then no additional water rights permitting is needed.

Please let me know if you have any questions.

Thank you,

Ron Duvall

Subject: [EXT] Request a time for a conference call with you this week.

Hi Ron

We are returning to the issue of the water supply situation at the Boy Scout Camp at Medicine Mountain. I, Bob Morcom, Corey Davis and the camp manager, took a site visit to better understand the system which is performing poorly.

Could you be available for a conference call with Bob and I sometime this week? We will, of course, coordinate with you a convenient time for all.

We would like to go over what we found out and examine alternatives to restore the degraded system.

Thanks for your consideration.

Mark
