Application No. 1596A-2 requests two additional diversion points located in the NE 1/4 SW 1/4 of Section 22 for 1.11 cfs of water. Application No. 1597A-2 requests one additional diversion point located in the NE 1/4 NW 1/4 of Section 22 for 0.9 cfs of groundwater (see map).

Aquifer - Ogallala

Aquifer Characteristics

The Ogallala is an excellent source of good quality and quantity of water. The well driller's logs for these wells indicate the static water level ranges from 70-80 feet below land surface. The geology of this area or poor well construction or a combination of both seems to restrict pumping capacity of the wells to 300-400 gpm per well. These poor pumping capabilities make adequate irrigation water unavailable without the construction of additional diversion points.

Observation well readings are available from two wells in the proximity of this application. These two observation wells are TD-76E and TD-76F. Both wells indicate seasonal fluctuations of one foot. Water levels of TD-76E have remained constant from 1977 to the present. Water level readings on TD-76F dropped approximately 1.5 feet from 1977 to 1981 and have remained relatively constant from 1982 to the present (see attachment). Additional information on the geology of the aquifer in this area may be obtained from the report written for Permit Nos. 1543-2, 1596-2 and 1597-2.

Conclusions

1. Water is available from the Ogallala aquifer.
2. The well capacities are low and warrant the need of these additional diversions for adequate irrigation.
3. Water level data is available from two observation wells in the proximity of this irrigation.

3. Postpone any action or take no action.

The hearing is an adversary proceeding. The permit owner has the right to be present or to be represented by a lawyer. These and other due process rights will be forfeited if they are not exercised. Decisions of the Board may be appealed to the Circuit Court and the State Supreme Court as provided by law.

Dear Ron,

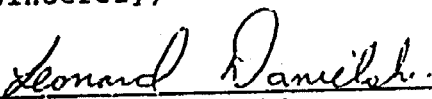

Just a short letter to explain why the Irrigation Questionnaire for the 1990 Season was not received at your office.

As you probably know, we are renting this land from Mr. Jacob Freidus of Long Island, New York. He received the paperwork down in New York and did not forward the Questionnaires to our office.

I have enclosed the needed paperwork in hopes that your office will reinstate the water permits for this ground. We have rented this ground for the 1991 Irrigation season, and hope to rent it in the future. Please send the Irrigation Questionnaires and any other correspondence to our address listed above.

If you have any questions or need any additional information, please let me know.

RE: Water Right Nos. 1543A-2, 1596A-2, (1597A-2) and 1615-2, Ella Freidus

Dear Mr. Danielski:

I am contacting you regarding ownership of land as described in Water Right Nos. 1543A-2, 1596A-2, 1597A-2 and 1615-2. Recently, I visited with Lyle Regennitter, from Farm Credit Services in North Platte, regarding these water rights. It is my understanding that you (or your company) now own the land.

Enclosed are partially completed transfer forms for use in filing an ownership change with each of the water rights. Please review the forms for accuracy and make any necessary corrections. You will need to complete the portion titled "to be transferred to: (name and address).....". Upon completion, please sign the forms in the presence of a notary public and return them to our office with a required filing fee of \$2.50 each (total of \$10.00).

If you have any questions concerning the water rights or completion of the forms, please give me a call at (605) 773-3352 or email me at gennym@denr.state.sd.us. Thank you in advance for your assistance.

Sincerely,

NOTE: Water permits may be cancelled for nonconstruction within the five year construction period. Once a water permit is developed and the water used, the permit becomes a right. A water right may be lost for three reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.
