RECOMMENDED MANAGEMENT:

The degree of wetness in the depressional areas and the extent of land with
a slope over 4% should determine the location of the pivot point.

If it is not possible to drain the depressions, an excavation in that portion
of low area that is excluded from pivot travel will concentrate the waste water
and at the same time, this area can be utilized as fill material in the shallow
portions of the depression that is within the pivot circle.

Any area with a slope between 4 to 9% should be left out or else seeded to
permanent vegetation to discourage wind and water erosion.

Any area with a slope of over 9% must not be irrigated.

JANUARY 19, 1981

Ms. Betty Westlund
Water Rights Specialist
Water and Natural Resources
Joe Foss Building
Pierre, SD 57501

Dear Ms. Westlund:

The Area Director, Bureau of Indian Affairs, has advised that on January 28, 1981, at 10 a.m., a hearing will be held by the Water Management Board at their office at Pierre, South Dakota, on the application of Mr. Earl Christensen of Kennebec, South Dakota, for a permit to appropriate for beneficial use 6.5 cubic feet per second of time of water from the Missouri River the point of diversion of which is to be located in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 28, and the NE $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 27, both in T. 108 N., R. 75 W., for the purpose of irrigation.

This letter will serve as our written objection to such application for a permit to appropriate ground water from within the boundaries of the Lower Brule Indian Reservation. Regardless of the decision in Colorado River Water Conservation District v. United States, 96 S. Ct., 1216, the issuance of such permit would be contrary to established law, which declares that the state lacks jurisdiction with respect to the adjudication of the waters of, or the lands within the exterior boundaries of an Indian Reservation. See 25 U.S.C.A. Sec. 381, Winters v. United States, 207 U.S. 564, 28 S. Ct. 207; United States v. Powers 94 F.2d 783; United States v. McIntire, 101 F.2d 650; and United States v. Alexander, 131 F.2d 359.

In filing this objection to the issuance of such proposed permit and in writing this letter to you, we do not waive our right to challenge the state's jurisdiction by legal action or otherwise and merely intend to call the state's attention to the absence of state jurisdiction in this matter and to the Winter's Doctrine.

Dear Mr. Christensen:

I am writing to acknowledge receipt of your 2005 irrigation questionnaire. I completed a questionnaire for you based on our telephone conversation. Enclosed is a copy for your records.

You may disregard the January 24, 2006, "Notice" concerning reporting requirements for Water Right No. 1742-2. The information was received in our office prior to the Water Management Board meeting and your name has been deleted from the agenda.

One item I noticed when filling out the questionnaire for you was the number of acres you irrigated (445) exceeds the number of acres you are licensed for (372.4). I have included a copy of Water Right No. 1742-2 and the map prepared by the staff engineer who conducted the field investigation in 1998. If the additional land you are irrigating is not covered by another water permit, changes will need to be made to your existing water right. Please review the enclosed copies and get in touch with me.

Thank you for calling with the 2005 irrigation information.
