Dear Mr. Pester:

I have completed all of the forms necessary for filing vested rights on your two water spreading systems in Section 15, T12S, R1E.

I spoke with Mr. Robert Geiser as you suggested. Mr. Geiser stated that all of the old filings that are on record were either abandoned or never developed. He stated that he constructed the two present systems in the 1950's. He wasn't exactly sure what years the construction took place. In order for a water right to be considered as a "vested right", under South Dakota law, the system would have had to been under construction on or before March 2, 1955. If this was not the case, the system would not have a valid water right.

Would you please examine the forms and correct anything that is in error. You may want to add more definite information on form 2-B if you have it or are able to obtain it. Especially for diversion point #1. Then, please sign the forms in the presence of a notary where indicated. The forms should then be returned to our office with a check for \$21.00. This is for the cost of the filing fee and the water license (\$10.50 for each system). Upon recognition by the Water Management Board your copies of the forms will be returned to you.

I have enclosed a map of your projects. If you have no changes to make on this map you may keep it for your files. If you have changes please indicate them on the map and return it with the forms. We will then correct our office copy.

All of the Location Notices and Water Right Filings that we have on record for your property in South Dakota, will be brought before the Board of Water Management for cancellation. This will be based on Mr. Geiser's statement of abandonment or non development. We will be forwarding cancellation notices on these at a later date. South Dakota law states that non use of water for a period of three years shall be considered abandonment.

If you have any questions, please feel free to contact me.

Sincerely,

Delvin D. Brosz, P.E.

NOTICE

TO: Alex Pester, RR #1, Minatare, NE 69356

FROM: John Hatch, Chief Engineer
Water Rights Division
605 773-3352

SUBJECT: Notice of Requirement to File Vested Water Right Claim

This Notice is in regard to your two water spreading systems located in Fall River County, South Dakota and Sioux County, Nebraska. Del Brosz, Hydrologist, with the Division of Water Rights inspected your systems July 19, 1984. On August 27, 1984, partially completed application forms were sent to you for filing a vested right claim for each system. To date, we have not received these applications from you.

In order for a water right to be considered as a "vested right", under South Dakota law, the system would have had to been under construction on or before March 2, 1955. If these systems were constructed after this date, a new application will need to be filed.

South Dakota Water Law SDCL 46-5-49 as passed by the 1986 Legislature states that if the Chief Engineer is aware of a water use system for which the owner claims vested right status, the owner is required to file the vested right claim within 90 days. Any claim filed after the 90 days will be considered a new application and receive a new priority date, which would be the date the application is received in this office. You have 90 days from the date of this notice to submit your applications. The filing fee is \$15.00 per application (a total of \$30.00 for your applications).

Enclosed is a partially completed set of application forms to claim vested rights. If your systems do not qualify for vested right status, the filing fee for your applications will be \$225.00 each. We will be glad to help you complete the applications and answer any questions you may have.

CERTIFICATION

I hereby certify that on July 10, 1986 I have personally deposited with the U.S. Mail, a postage prepaid envelope containing a Notice pertaining to Requirement to File Vested Right Claim addressed as stated on the notice.

Alex Pester
October 20, 1986

Application No. 1992-2 requests validation of a vested right claim to appropriate 1.01 cfs from Indian Creek. The water has been used following construction of the system during 1951 to irrigate 71 acres. The point of diversion is located in the NW1/4SE1/4 of Section 15, T12S-R1E. The 26 acres irrigated are located in the N1/2SE1/4, Lot 3 and Lot 4 of Section 15, T12S, R1E. The 45 acres irrigated are located in Section 24, T35N, R57W.

Conclusions:

1. The project is a water spreading system. It was inspected by Delvin D. Brosz and found to exist as described.
2. According to the affidavit of water use, the system was constructed during 1951 and water has been put to beneficial use since that time.
3. It is recommended that the vested right claim be validated.
4. A priority date of January 1, 1951 should be assigned since the exact date for start of construction during 1951 is unknown.

SUBJECT: Shutoff Order for Junior Priority Date Water Rights Upstream of
Angostura Dam

Shutoff Order for Water Right Nos. 1992-2, 1993-2

- To protect the US Bureau of Reclamation's Water Right No. US579-2 for Angostura Reservoir with a senior priority date of April 11, 1941, the Bureau of Reclamation has asked that we issue shutoff orders for junior water right holders. Effective immediately no diversions of water from the Cheyenne River and tributaries by holders of junior water rights upstream of Angostura Dam will be allowed. On April 30, 2004, the water elevation in Angostura Reservoir was 3179.1 feet, a little over 8 feet below the full elevation of 3187.2 feet. Current storage is at 96,912 acre-feet, about 33,850 acre-feet below full and inflows are only about 38 acre-feet per day.

The Angostura Reservoir storage level will be closely monitored and if the Cheyenne River flows upstream of dam increase such that the reservoir will fill, this shutoff order will be rescinded at that time. If conditions do not improve, this order will remain in effect until December 31, 2004.

I am asking for your cooperation in complying with this shutoff order. If you have any questions, please contact Mark Rath or Don Stroup with the Water Rights Program at (605) 773-3352. Thank you.

Dear Mr. Erbele:

We request that the State of South Dakota's Department of Environment and Natural Resources Water Rights Division issue shut off orders to junior water right holders on the Cheyenne River above Angostura Reservoir.

Angostura Reservoir is presently at elevation 3169.90, which is a little over 17 feet down from full (top of conservation or full is at elevation 3187.2). On February 24, 2005, the storage in Angostura Reservoir is about 60,000 acre-feet, which is 63,000 acre-feet from full. If the spring weather continues to be dry, the water right at Angostura will not be satisfied.
