REPORT ON VESTED RIGHT APPLICATION NO. 2229-2
for Blue Spruce Valley Cabins/Campground
June 1, 1992

Vested Right Application No. 2229-2 proposes to appropriate 30 gpm (0.067 cfs) from one well approximately 85 feet deep located in the SE 1/4 SE 1/4 of section 11, T2S R4E in Pennington County. The water is used as a commercial water supply for the cabins, campground and a ceramic shop.

AQUIFER - PRECAMBRIAN ROCK (CRSL)

The Precambrian rock in this area is a metagraywacke consisting of mica schist and quartzite. Ground water is found in fractures and natural foliations within the rock type. The aquifer is under unconfined (water table) conditions. Very little well information was submitted with the application. The well is located within a few hundred feet of Spring Creek. Ground water probably discharges into Spring Creek from the Precambrian rock most of the time. The creek could also provide water to the ground water system, especially when the well is pumped.

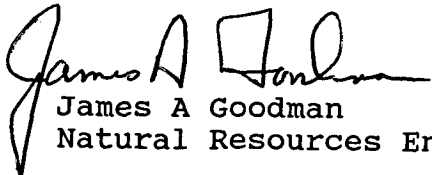

The Division of Water Rights does not monitor any observation wells in this area. No historical water levels information is available for this area.

REVIEW OF EXISTING WATER PERMITS/RIGHTS

There are no other water permits/rights in this area. The nearest existing permit/right is over 1/2 mile downstream. Interference is not expected to be a concern.

CONCLUSIONS

1. Water is available from the Precambrian rock.
2. Interference is not expected to be a concern.
3. The affidavit of water use submitted with the application indicates that water has been used for the purposes listed from 1947 to the present.
4. Information included in the application is not sufficient to determine if the well construction is in accordance with SD Well Construction Standards.

Dear Ms. Ellison:

Enclosed are your Validated Vested Water Right and Water License No. 2229-2. As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water.

Very truly yours,

JOHN HATCH, Chief Engineer
