REPORT ON WATER PERMIT APPLICATION NO. 2290-2
TOWN OF OACOMA
SEPTEMBER 7, 1993

Application No. 2290-2, Town of Oacoma, proposes to appropriate 0.5 cubic feet of water per second (cfs) from the Missouri River located in the SE1/4 NW1/4 of Section 17 T104N-R71W. The Town of Oacoma holds Water Permit No. 1698-2 authorizing the appropriation of 0.5 cfs from the Missouri River. This application, if approved, will authorize an additional diversion point and increase the total water appropriation of the two permits from 0.5 cfs to 1.0 cfs. The water is for municipal use by the Town of Oacoma. This project is located in Lyman County.

Review of the Water Source and Existing Water Rights

The source of water for this project is from the natural flow of the Missouri River. Water quantity would not be a problem. Water Permit No. 1690-2 was approved on May 22, 1980. The Division of Water Rights has no record of complaints concerning this project. Adverse affects to existing water users would not be expected.

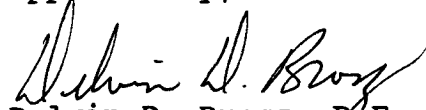

Conclusions

1. Application No. 2290-2 proposes to increase the diversion rate from 0.50 cfs as authorized by Permit No. 1698-2 to 1.00 cfs.
2. The source of water would be from the Missouri River. Adverse affects to existing water users would not be expected.
3. The water is to be used for municipal use by the Town of Oacoma.

PLEASE NOTE: Certain changes can be made in your permit within the five year construction period, usually without affecting the priority date provided an application to amend your permit is made within the five year period - i.e. changes in location or number of diversion points (wells) or location of land to be irrigated. Well locations for wells into the same aquifer can be moved up to 660 feet without application.

Applications to amend a permit after the five year construction period will be assigned a new priority date. Applications to change water sources, to add lands or increase original diversion rates, if approved will usually receive the date of the new application as a priority date regardless of the five year construction period.

TO: Chief Engineer, Water Rights Program, DENR, Foss Bldg., Pierre, SD 57501

On, September 2, 1998, I made a thorough examination of the water use system constructed by the Town of Oacoma holder of Permit Nos. 1698-2, bearing the priority of February 19, 1980 authorizing the diversion of 0.5 cu. ft. per second and 2290-2, bearing the priority of August 26, 1993 authorizing the diversion of 0.5 cu. ft. per second of the waters of the Missouri River for Municipal purposes, in Lyman County.

I have to report on the conditions of the same as follows:

A. Works used to divert the water:

Pumping station, 2 pumps and motors

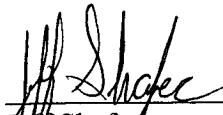

B. Works used to apply water to beneficial use:

Water treatment plant and municipal distribution system

The system is in the following condition Excellent. The point of diversion is located 2240' south and 2380' east of the NW corner of Section 17 T104N-R71W. The works are capable of diverting and conveying to the place of use 0.98 cu. ft. per second of water which is to be used for municipal purposes. The license should be issued for 0.98 cfs.

Applicable permit qualifications have been complied with: Yes

Exceptions to compliance are: Water Permit No. 1698-2 was incorrectly advertised as being in Township 105N. The point of diversion is located in Township 104N. This will need to be readvertised to correct.
