COMMENTS:

When we received the first clipping on October 17th of the Notice for Application No. 2560B-2, I called with corrections to the legal description. When we received the Affidavit on Nov 5th, the clipping attached did not have the requested changes made. I called the paper and requested the clipping from the second publication. We received that clipping on Nov 7th and it did not have the requested changes. There were still periods between the quarter-quarters.

Eric Gronlund indicated that he did not believe this would invalidate the legal notice.

PROGRAM

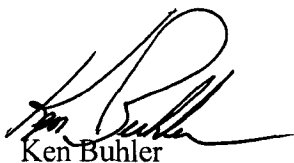

APPLICATION NO. 2560B-2
FALL RIVER WATER USERS DISTRICT
OCTOBER 2, 2007

Application No. 2560B-2 proposes to expand the future use area that was authorized by Future Use Permit Numbers 2560-2 and 2560A-2. Future Use Permit Number 2560-2 reserves 750 acre-feet annually from the Madison aquifer for rural water system use. Future Use Permit No. 2560A-2 amended the area originally reserved for future water use by Future Use Permit No. 2560-2, and the area currently reserved by the two future use permits includes Section 32, T7S-R6E, Section 5, T9S-R5E (Fall River County) and Section 36, T6S-R6E (Custer County). This application proposes to include portions of the SE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 29, T7S-R6E (Fall River County) to the future use area. This application does not authorize construction of works or the application of water to beneficial use.

A future use permit can be considered a reservation of water with emphasis on the source aquifer over that of a specific location. In approval of Future Use Permit No. 2560-2, it was determined that the criteria established by SDCL 46-2A-10 was met, namely unappropriated water was available, the water was needed, and the use is a beneficial use and in the public interest (Water Rights, 2005). The Water Management Board has allowed expansion of future use areas with the retention of the original priority dates in the past. The area from which the reserved water was to be obtained was expanded with the approval of Future Use Permit No. 2560A-2 in July 2007. Amending Future Use Permit Nos. 2560-2 and 2560A-2 to expand the future use area is not a substantive change to the permits. This and any other amendments to Future Use Permit No. 2560-2 will retain the original 2005 priority date and the original permit's qualifications.

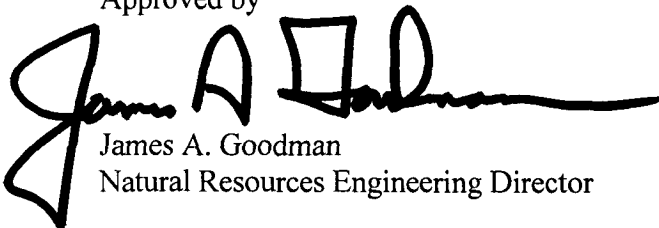

Conclusions:

1. Application No. 2560B-2 does not propose any additional appropriation from the Madison aquifer.
2. Application No. 2560B-2 should contain the same qualifications as Future Use Permit No. 2560-2 and Future Use Permit No. 2560A-2

**RECOMMENDATION OF CHIEF ENGINEER FOR FUTURE USE WATER PERMIT
APPLICATION NO. 2560B-2, Fall River Water Users District**
