The Dam is build out of Concrete with 36" CIO Pipe for a Flume to Irrigate 24 Ac. of Alfalfa.

The Flume is used to divert water to Alfalfa land when Draw is running. When Flume is not in use, water runs over top of Dam onto a concrete Slab in bottom of Draw, extending about 25 Ft. from Base of Dam. This Project has proved to be very beneficial over the years, with the only maintenance being the extension of the concrete slab in bottom of Draw.

RE: Water Right/Vested Water Right Nos. 303-2, 570-2, 583-2, 584-2, 945-2

Dear Mrs. Williams:

I am contacting you in regard to the 2005 irrigation questionnaire for Water Right No. 303-2. I received a call this morning from your son indicating no irrigation took place in 2005. A form was completed for you based on this information. You may **disregard** the January 24, 2006, "Notice" concerning reporting requirements for Water Right No. 303-2. The information was received in our office prior to the Water Management Board meeting and your name has been deleted from the agenda.

It is my understanding that any water rights held by Dick Williams should be transferred to your name. I found 5 water rights and vested water rights listed in his name (copies enclosed). The reason you only get one irrigation questionnaire each year is because our records show the other four water rights are for diversion of water from dry draws through water spreading systems.

Enclosed are partially completed "Notice of Transfer of Ownership" forms for filing ownership changes. Please review the forms and complete as needed. Upon completion, please sign the forms and return them to our office with a required filing fee of \$2.50 each (total of \$12.50). The check or money order for the fee can be made payable to the Water Rights Program.

If you have any questions, please contact me.
