Mr. Sam Wedmore
Harmosa, South Dakota

Dear Mr. Wedmore:

At the Range Management meeting last week, I promised to look into the water right situation on Charles Draw and let you know.

These water rights, 560-2, Irvin Evans, 559-2 Irvin Evans and your own 491-2, are matters of record of Charles Draw in the vicinity of your land. A fourth, 559-2 Irvin Evans, is below you on the draw. The location of these water rights are shown on the enclosed map.

These water rights are listed below in order of priority.

491-2, Sam Wedmore, 2.8 cubic feet per second to irrigate 200 acres in Sec's. 25, 26, T 9 S, R 2 E with priority date August 24, 1925. This is a "vested right" water right record.

560-2, Irvin M. Evans, 1.1 cubic feet per second to irrigate 79.2 acres in the SW, Sec. 28, T 9 S, R 2 E with priority date June 1911. This is a "vested right" water right record.

559-2, Irvin M. Evans, 2.1 cubic feet per second to irrigate 150.6 acres in the NE, Sec. 31, T 9 S, R 3 E with priority date June 1955. This is a "vested right" water right record.

590-2, Irvin M. Evans, 0.12 cubic feet per second to irrigate 21 acres in the NW, Sec. 35, T 9 S, R 2 E with priority date March 26, 1960.

Sam Wedmore

2

November 29, 1960

Apparently, the storage reservoir, to which you referred during our talk, is located in the NW $\frac{1}{4}$, Sec. 35, T 9 S, R 2 E. No record of this reservoir was made under water right 560-2. Storage of 103.4 acre feet was included in water right 590-2. The reservoir is shown on official maps prepared by the United States Geological Survey in 1953 and no doubt was and is used to supply water for diversion to lands under water right 560-2.

Under provisions of the State water laws, Mr. Evans should allow water to pass his diversion point for water right 560-2 and 590-2 in the amount of 2.8 cubic feet per second during periods that you need water, or, if agreeable to both of you, a larger amount for correspondingly shorter periods of time whenever water is flowing in the draw immediately above his dam. He is not required to furnish water from his dam for this purpose when water is not flowing into his reservoir.

Because of these conditions and because both your water right, 491-2, and his water right, 560-2, were established under "vested right" provisions of the new State water laws (meaning that the water right records were established by you and Mr. Evans covering irrigation use of water prior to July 1, 1955 but not having acquired water rights under provisions of then existing state water laws), I believe that the best solution to your problem and his duties with respect to your water right would be to agree among the two of you to a sharing of the water supply. If you arrive at some agreement it would be well to let me know what it is so that I can make it a part of your and his water right record. If you cannot agree with Mr. Evans as to a satisfactory sharing of the water supply in Charles Draw let me know and I shall take the matter up officially.

Sincerely,

J. W. GRIMES
Executive Officer
