APPLICATION FOR PERMIT

To Appropriative Water within the State of South Dakota

(NOTE—Draw a line through items not applicable.)

1. Name of applicant Samuel A. Kirk & Sons Inc. A. Kirk, President
Postoffice address Pringle, County Custer, State S.D.

- ~~I. If a corporation~~
- ~~(a) Name of same~~
- ~~(b) Date and place of incorporation~~
- ~~(c) Amount of capital stock~~
- ~~(d) Amount paid in~~
- ~~(e) Names and addresses of directors~~

(NOTE—A certified copy of articles of incorporation must accompany the application.)

II. Method of accomplishing the work and financial resources of the applicant:

(a) Method of accomplishing work (Whether by contract, employment of others, or by direct labor)

Contract(b) Cash on hand, \$ Sufficient(c) Treasury stock, \$ None(d) Bonds to be issued, \$ None(e) Other resources, \$ Govt. Cost Share

2. Name of diversion work Samuel A. Kirk Water Spreading Project
3. Amount of water claimed 0.34 cubic feet per second or 71.7 Ac. ft.

4. Source of water supply Surface runoff - dry draw

5. Location of point of diversion 75.2 Rods S 44° 20' E of the NW
Corner S 2 - T 5 S - R 4 E, 24th left bank Custer County.

6. Annual period or periods during which water is to be used Whenever available during
7. To be used for: annual period

I. Irrigation or domestic use: Gravity, overhead sprinkling or combination system? Irrig. Gravity

(a) Number of acres to be irrigated 23.9 acres.(b) Legal subdivisions to be irrigated See Attachment #1

(NOTE—A list of lands to be irrigated, giving each subdivision and fraction with acreage thereof, should be written here, or may be appended as a part of this application. Same must also be shown on accompanying map.)

(c) Statement as to domestic use (giving location, etc.)

II. Stockwatering, mining, milling, power, fish culture, fire protection and public recreation:

(a) Nature of use None
Name any of the above uses claimed(b) Amount of power to be generated None horse power.

Amount claimed for engine cooling

(c) Location of plant

(d) Method of developing power

(e) Point where water will be returned to stream

Map No. 552-2

8. Estimated cost of work:

(a) Head Gates, \$ 2,250.00

(c) Fluming, \$ (d) Canal earth, \$

(e) Other structures Dam, take 12. plugs, \$2000.00

(f) Pumping plant, \$

Rock, \$

Total, \$

9. Description of diversion works:

I. Nature of works: (Reservoir, dam, ditch, flume, pumping plant, etc.)

Water will be let out of Reservoir by take
into Area. Plugs below Reservoir will distribute
water

II. Dimensions of works:

(a) Dam: Height 22.0 feet; length at bottom 124.0 feet; length at top 30.0 feet; thickness at bottom 12.0 feet; thickness at top 12.0 feet; slope at front water face 7:1; slope at back face 7:1; material used in construction Earth

(b) Reservoir: Capacity when filled 4.6 acre feet. Surface area at highwater mark 1.2 acres.

DEPTH AT OUTLET-FEET	SURFACE AREA AT EACH DEPTH AT OUTLET-ACRES	ACRE-Feet CAPACITY
<u>0.0</u>	<u>0.0</u>	<u>0.0</u>
<u>10.0</u>	<u>1.2</u>	<u>4.8</u>

(c) Head gate Width 1 feet; height 1 feet; Material Metal

(d) Canal: Total length miles

LOCATION BELOW HEADGATE	DEPTH	BOTTOM WIDTH	WIDTH AT WATER-LINE	GRADE PER MILE
At <u> </u> Mile	<u> </u> feet	<u> </u> feet	<u> </u> feet	<u> </u> feet
At <u> </u> Mile	<u> </u> feet	<u> </u> feet	<u> </u> feet	<u> </u> feet
At <u> </u> Mile	<u> </u> feet	<u> </u> feet	<u> </u> feet	<u> </u> feet

Number of permit: 594-2

Date of first receipt of application April 13, 1960

Date of return to applicant for correction, amendments or changes required as follows: _____, 19____

Date of receipt of corrected application _____, 19____

Date from which applicant may claim right April 30, 1960

Approved June 8, 1960, Recorded in Book 6 Page 82

This is to certify that we have examined the foregoing application for a permit to appropriate water of the State of South Dakota, and we hereby grant the same as stated herein, subject, however, to the following limitations and conditions:

1st. The equivalent of at least one-fifth of the work above specified is to be completed on or before December 8, 1962

2nd. The whole of said work is to be completed on or before June 8, 1965

3rd. The limit of time for proof of beneficial use of water appropriated in accordance herewith is June 8, 1969

4th. The water appropriated shall be used for the purpose of irrigation

5th. The prior right of all persons who, by compliance with the laws of the State of South Dakota, have acquired a right to the use of water must not be injuriously affected by this appropriation.

6th. The amount of the appropriation herein granted shall not exceed .34 cubic feet per second; neither shall it exceed the capacity of the above described system of diversion works, nor the least amount of water that experience may hereafter indicate as necessary for the production of crops in the exercise of the best husbandry; and further, said appropriation must be limited to not more than one-seventieth (1/70) of one cubic foot of water per second of time for each acre of land to which water is actually

and beneficially applied for irrigation on or before June 8, 1969; said water to be used during the following described annual period:

when available during annual irrigation season

NOTICE OF COMPLETION OF WORKS

This blank must be filled out by the holder of permit and forwarded to the Executive Officer at least 60 days before the time set for completion of works

(P. O.) Pringle

(Date) March 12, 1965

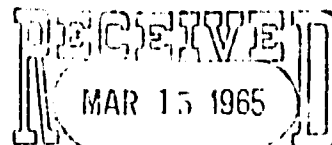

TO THE STATE WATER RESOURCES COMMISSION
OF SOUTH DAKOTA, PIERRE:

DEAR SIR: Notice is hereby given of the completion of the works for the diversion of .34
cu. ft. per second of the waters of the state from dry draw
through the spreader system, Water Spreading Project Number 1- Enlargement
for irrigation purposes
Irrigation Permit No. 594-2 in accordance with the terms and con-
ditions of a certain permit heretofore issued by the Water Resources Commission of the State of South Dakota.

1. The name of the person or corporation holding said permit is Samuel A. Kirk
2. The postoffice address of each person or the place of business of such corporation is Pringle
County of Custer State of South Dakota
3. The number of such permit is 594-2 and the date set for the completion of such work is
June 8, 1965
4. Said water to be used for irrigation purposes.
5. Said works of diversion will be fully completed on the date set for such completion, and the amount of
water which said works are capable of conducting to the place of intended use, in accordance with the plans ac-
companying the application for such permit, is .34 cubic feet per second.
6. The amount of land for which said water is available is 23.9 acres,
particularly described as follows: NW⁴NE⁴ Sec. 2--5.6 acres, SW⁴NE⁴ Sec. 2--3.6 acres
NW⁴SW⁴ Sec. 2--4.1 acres and NE⁴SW⁴ Sec. 2--5.6 acres. For a
total of 23.9 acres all located in Township 5 South Range 4 East, RUL.

I hereby certify that the facts set forth in the above notice are true.

Permit No. 594-2Water Division 2 FALL RIVER Water District

**REPORT OF EXAMINATION OF WORKS
AND/OR APPLICATION OF WATER TO BENEFICIAL USE**

TO: Water Resources Commission, State Office Building No. 2, Pierre, South Dakota 57501

I have this day made a thorough examination of the water use system constructed by Samuel A. Kirk
Frigle of _____ holder _____
 of Permit No. 594-2, bearing date of priority of April 30, 19 60
 authorizing the diversion of 0.34 cu. ft. per second of the waters of surface runoff
 for spreader irrigation purposes, in Custer County County.

I have to report on the condition of the same as follows:

The Water Use System consists of,

A. Works used to divert the water:

Small diversion plugsB. Works used to transport water to place of use,
carrying ditches

C. Works used to apply water to beneficial use.

Gravity flow across small areasThe system is in the following condition: good

The point of diversion is located between points 75.2 rods S 44° 20' E. of NW corner
and 129.3 rods N 97°00' east, SW Corner, Both in Sec. 2, T5S, R4E

The works are capable of diverting and conveying to the place of use severalcu. ft. per second of water which is to be used for spreader irrigationWater has been put to beneficial use to the maximum extent as follows: all in Section 2, T5S, R4E

NW $\frac{1}{4}$ NW $\frac{1}{4}$	5.6 acres
SW $\frac{1}{4}$ NW $\frac{1}{4}$	8.6 acres
NW $\frac{1}{4}$ SW $\frac{1}{4}$	4.1 acres
NE $\frac{1}{4}$ SW $\frac{1}{4}$	5.6 acres

comprising a total of 23.9 acres of land.Date March 4, 1970

FILE DOCUMENTATION

NAME: Samuel A Kirk, President, Kirk and Sons Inc.
Pringle SD 57773

PHONE: 673-2653

SUBJ: Inspection of Vested Water Right No. 589-2 and Water Right Nos. 594-2 and 595-2

On July 24, 1992, an inspection was completed of Vested Right No. 589-2 and Nos. 594-2, and 595-2 with Sam Kirk and Jack Kirk (Sam's son.) Inspection of Vested Right No. 589-2 was needed based on the Water Rights Division contesting validation of the vested right as part of the 1986 validation legislation. The inspection found that a small dam had been constructed with a gated tube through the dam. According to Mr. Kirk (Jack), the tube has not been operated for several years and the property is no longer irrigated. The small dam seldom holds water and serves as a water source for livestock when water is available. I informed Mr. Kirk (Sam and Jack), that the vested right would be scheduled for cancellation due to abandonment.

Water Right Nos. 594-2 and 595-2 were also inspected while on site. The area described on No. 594-2 continues to be irrigated. The system does not include the small dam on the north end of the project. The dam was not constructed. Essentially, the project is a type of terrace system used to "irrigate" the acreage. Water is collected by the terrace and gradually soaks into the ground irrigating the area. Water Right No. 595-2 authorizes diversion of water from Beaver Creek for irrigation of 20.8 acres. According to Don Kraus, DOT representative, modifications to the stream channel during road construction may have adversely affected the ability to divert water through the ditch. During the inspection, water was being diverted through a section of the ditch. According to Greg Fuller, also with DOT, the water was being diverted through the ditch to allow construction of a drain system and construction of a cattle underpass. The stream channel appeared to be graded to a final elevation. As noted, water was being diverted through the ditch at this elevation. A backhoe had been used to open the first few yards of the ditch. Water diverted through the ditch was being diverted back to the stream a few hundred feet downstream through a manmade breach in the ditch. The water went into a sump hole created for diversions of water for road construction. Water was flowing out of the sump hole. According to Mr. Kirk (Jack), the acreage located at the beginning of the ditch is sub-irrigated and acreage at the end of the ditch is irrigated only during high flows. High flows are necessary to get the water to the end of the ditch. Maintenance work on the ditch would assist greatly with operation of the irrigation system.

Complaints have been received concerning water availability downstream for domestic uses. One complaint made by Jeff McClaren concerns diversions from the sump hole and one by Thomas Kirk (letter dated July 22, 1992) concerns operation of the irrigation system. Water was flowing past the sump hole. In order to divert water down the ditch, an earthen plug is placed across the stream. I informed Sam and Jack Kirk that some flow must be bypassed to satisfy downstream domestic water uses.

A subsequent conversation with Joan Borthem, Division of Environmental Regulation, indicates that water quality standards do not allow discharge of pollutants (including dirt/fill) to a stream, unless authorized by a Corps of Engineers 404 permit. In addition, the stream classification of Beaver Creek does not allow more than 90 parts per million of total suspended solids. Placing dirt in the creek may result in violation of this standard during construction and due to erosion of the fill. Aside from water quality concerns, provision for bypassing some flow for downstream domestic uses is very difficult using an earthen fill. If a portion of the creek is bypassed, the fill would probably erode quickly reducing the ability to irrigate and also causing water quality concerns. Therefore, an alternate diversion method is needed because: 1) placement of dirt fill in the creek is considered a pollutant, and 2) adequate flows need to be bypassed for downstream domestic uses. One alternative may be installation of a permanent diversion structure with a low level outlet to bypass some flow for downstream domestic use. This type of structure may require approval of a 404 permit.

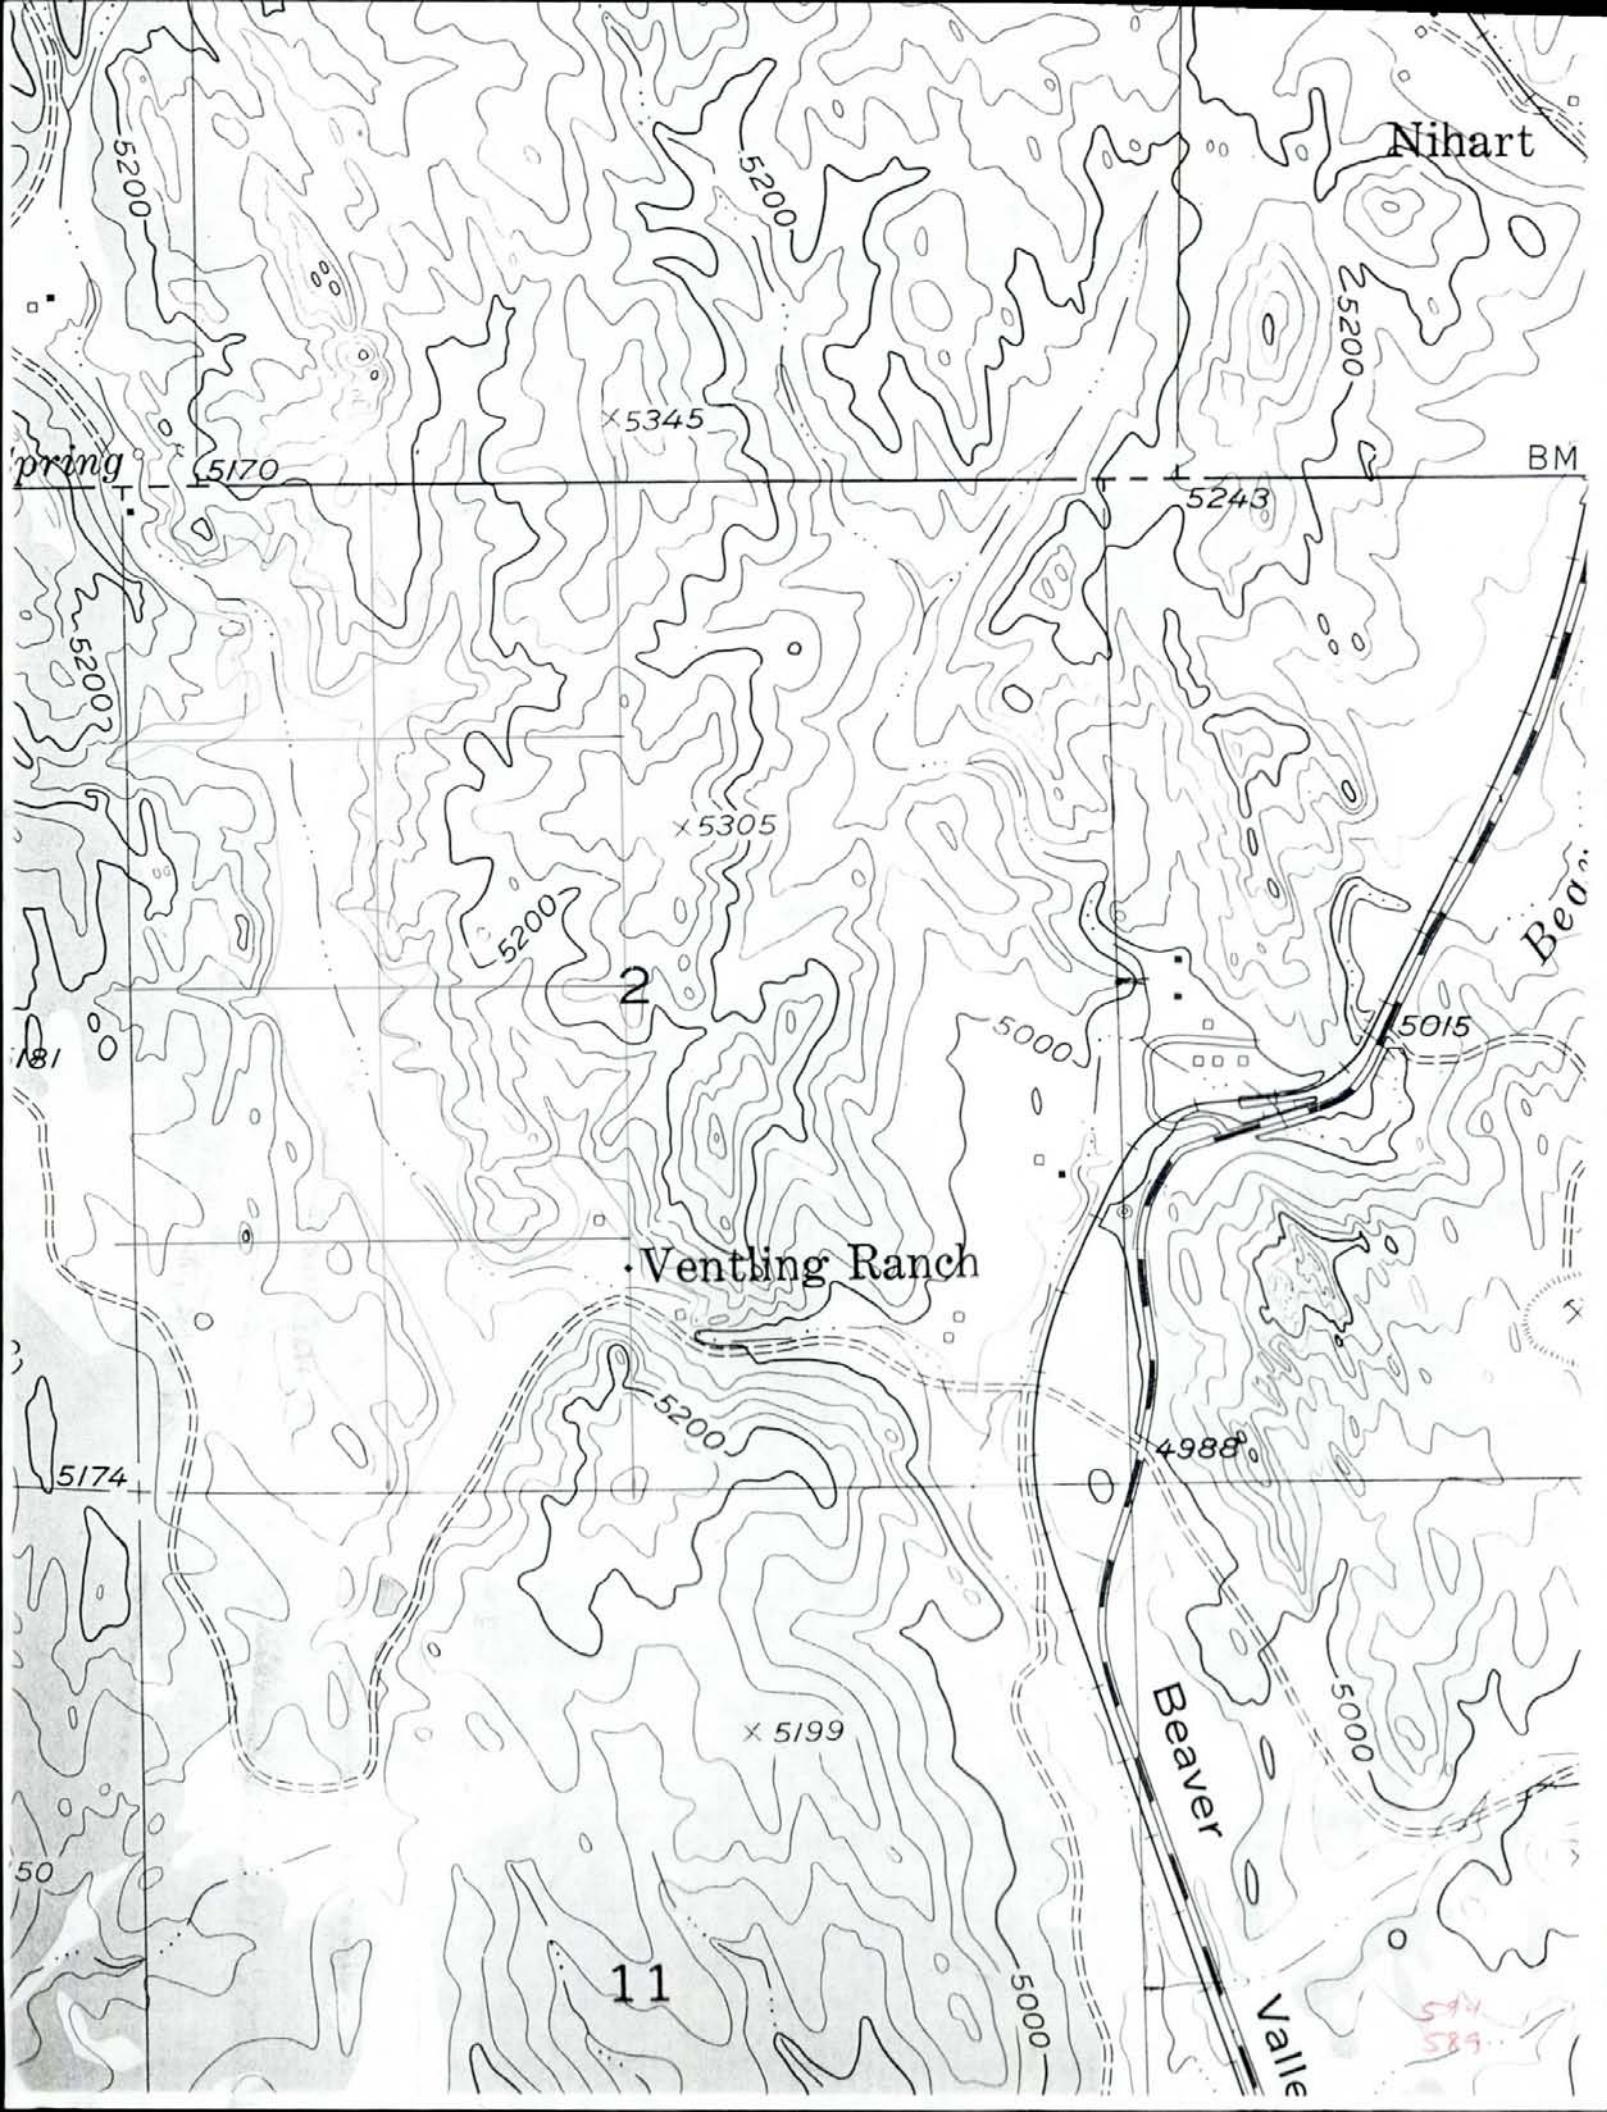

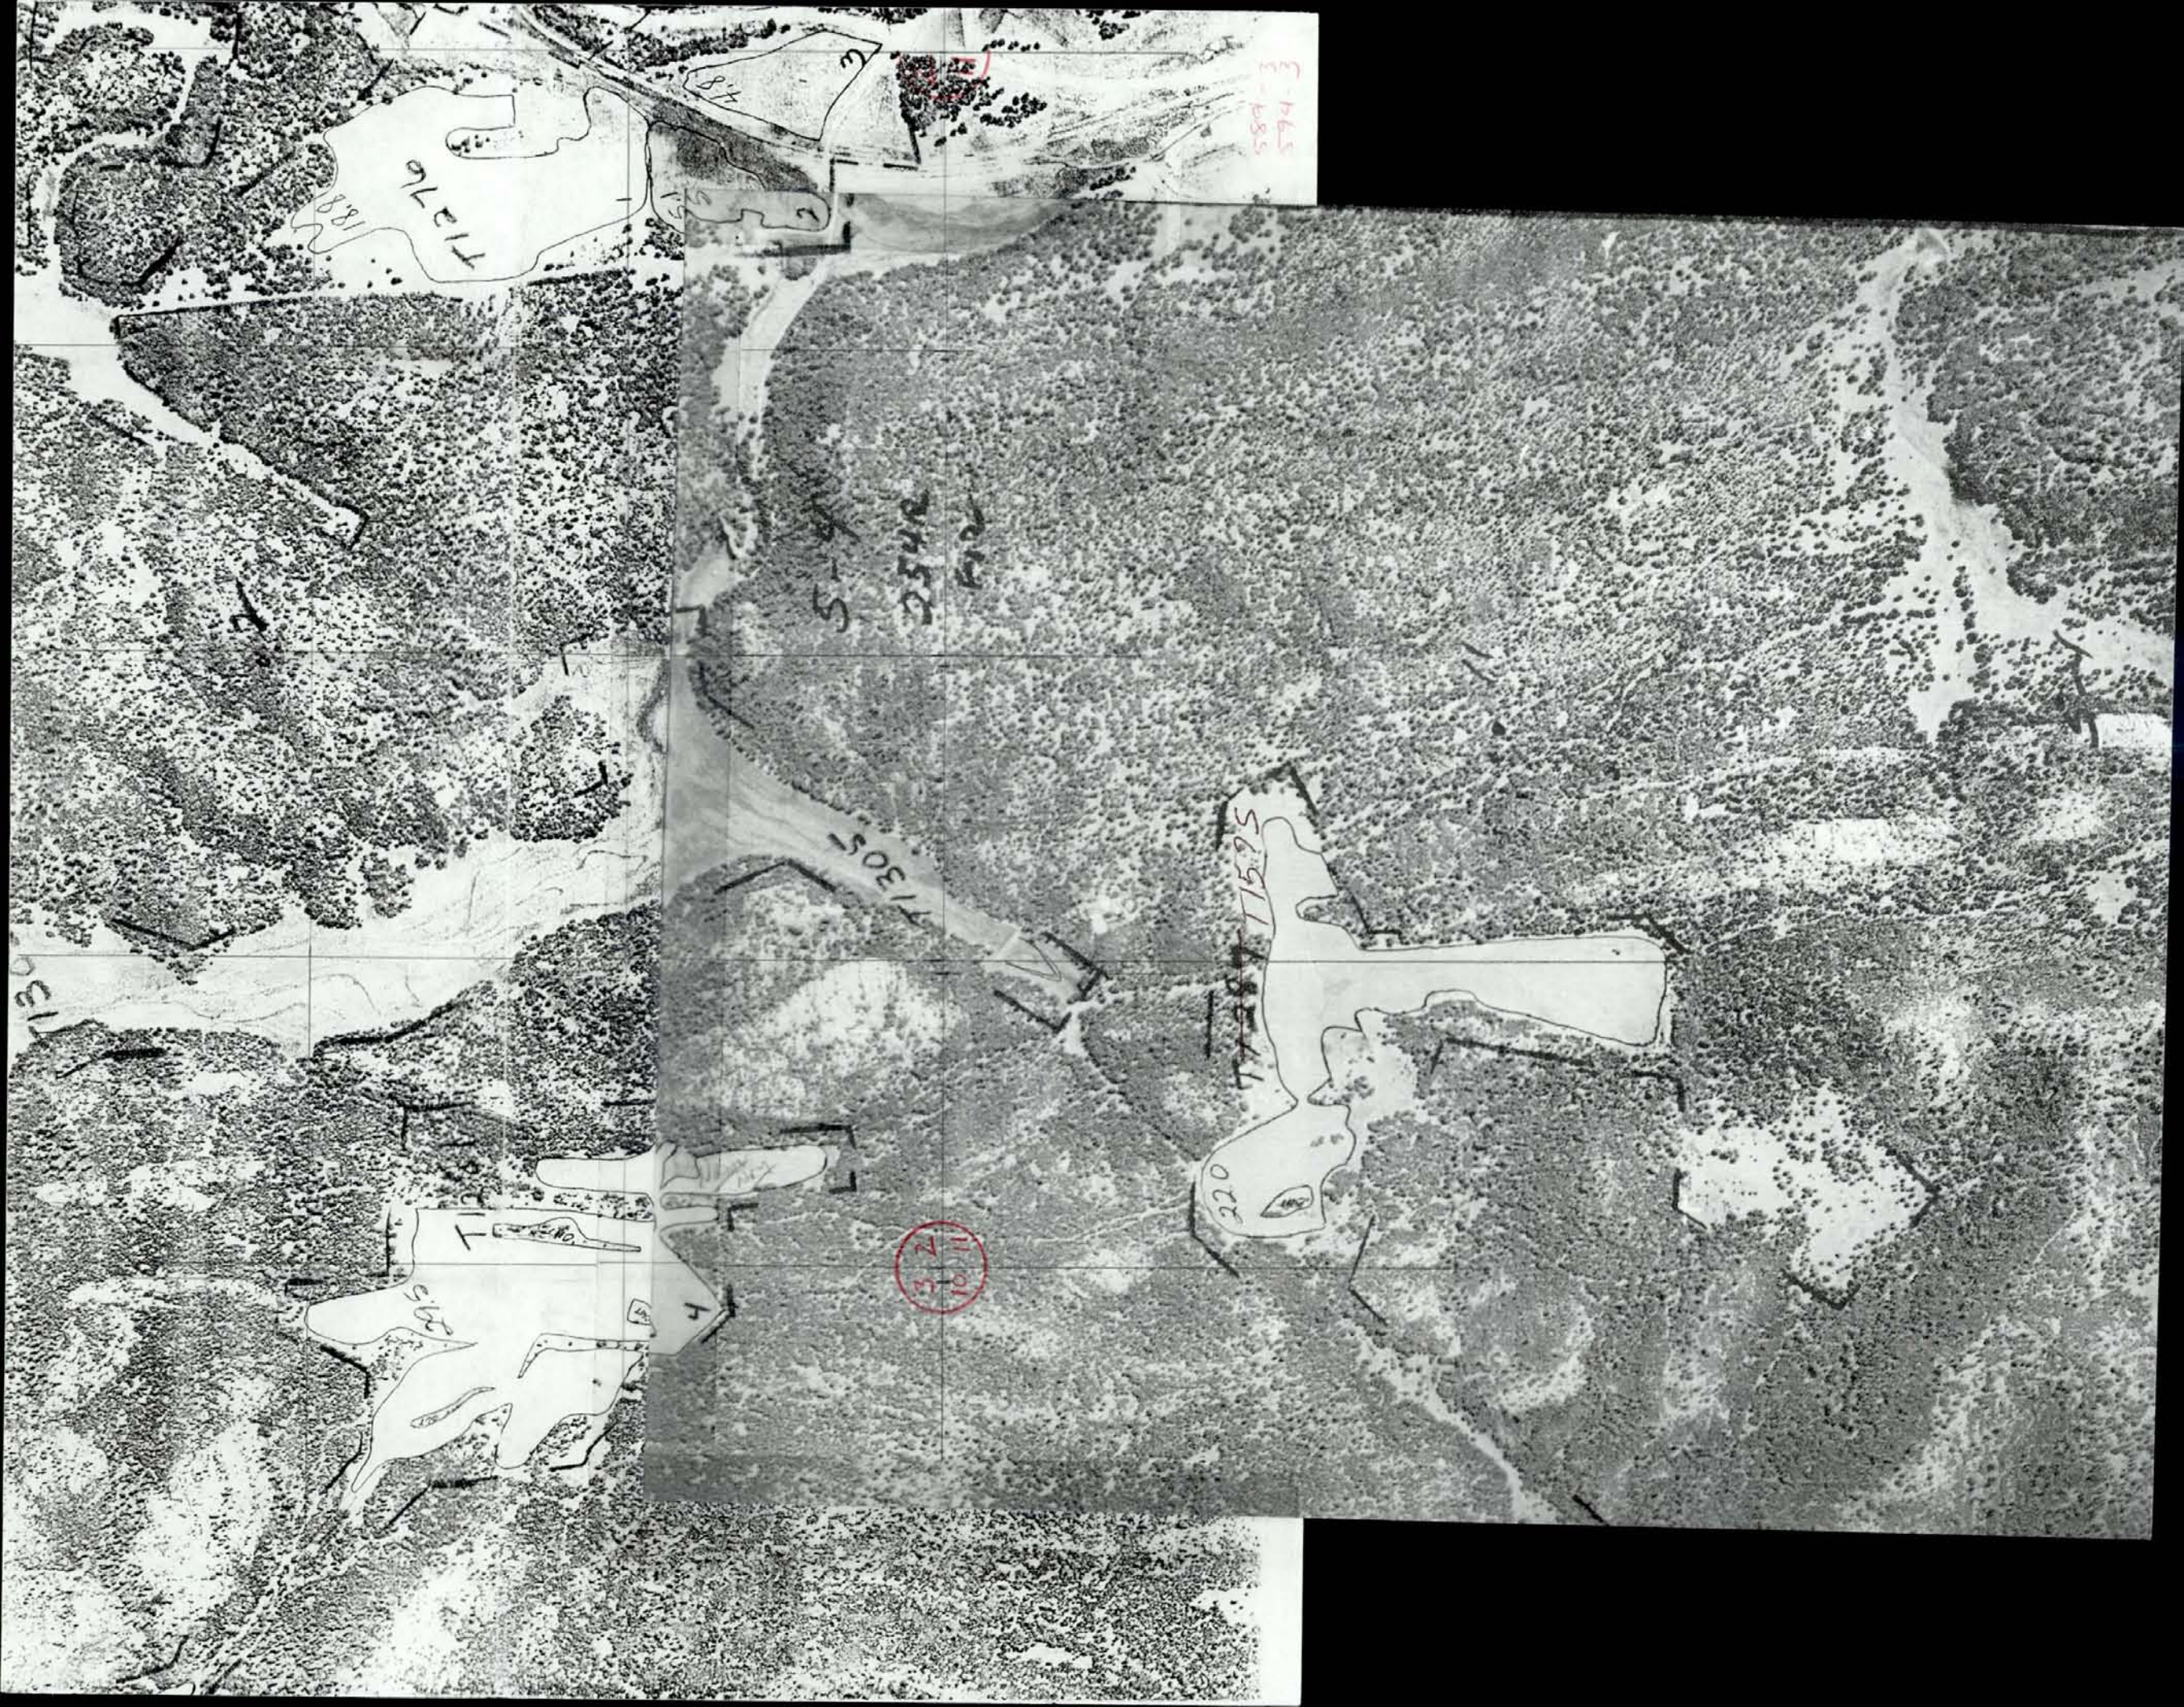

Ron Duvall, Natural Resources Engineer

NOTE:

The clippings of the publication notices for Water Right Nos. 595-2 and 594-2 have been reversed in the files. The published notice for No. 595-2 contains a publication error. The acreage located in section 12 was mistakenly placed in section 11. The water license issued for No. 595-2 on May 19, 1970, has the correct location of the acreage and is legalized pursuant to SDCL 46-5-4.1 even though the publication was in error.
