Dear Mr. Beringson:

I am writing to notify you that pursuant to the Notice of Intent to Validate Vested Water Right Claims dated June 30, 1988 that I intend to oppose validation of all Department of Game, Fish and Parks Vested Water Right Claims for lakes for the following reasons:

1. Until the outlet elevation for each lake is surveyed and the outlet elevation is set by the Water Management Board.
2. To allow the Vested Water Right Claim to be amended, if necessary, as follows:
 - a) Include the outlet elevation;
 - b) To correct the amount of water claimed;
 - c) To add the qualification that a vested claim is subject where necessary to installation of a concrete outlet structure to assure retention of the outlet as the established elevation; and
 - d) To add any amendments and qualifications necessary to clarify a Vested Right Claim.

Also, that I intend to oppose validation of all Department of Game, Fish and Parks Vested Water Right Claims for dams to allow the Vested Water Right Claim to be amended, if necessary, as follows:

1. To include the spillway elevation;
2. To correct the amount of water claimed; and
3. To add any amendments and qualifications necessary to clarify a Vested Right Claim.

September 21, 1988
Richard Reringson, Secretary

We will be working with your staff on these validations. We have already discussed settling outlet elevations before validating claims for lakes. Although the work necessary to complete the validation process will take several years to complete, the results should be of benefit to the public and to your Department. As the work is completed to validate each claim, the claim will be presented to the Water Management Board for validation.

Please advise if you have any questions.

Very truly yours,

From: Donald E. Stroup, DENR Natural Resources Project Engineer
Subject: License/Vested Right Nos. 726-2, 727-2, 728-2, 729-2, and 734-2

In September 1988 the Chief Engineer, Water Rights Division, notified the Secretary, Department of Game, Fish and Parks (GF&P) of his intent to oppose validation of all GF&P Vested Water Right Claims for lakes and dams for the following reasons:

Lakes:

1. Until the outlet elevation for each lake is surveyed and the outlet elevation is set by the Water Management Board;
2. To allow the Vested Water Right Claim to be amended, if necessary, as follows:
 - a. Include the outlet elevation;
 - b. To correct the amount of water claimed;
 - c. To add the qualification that a vested claim is subject where necessary to installation of a concrete outlet structure to assure retention of the outlet as the established elevation; and
 - d. To add any amendments and qualifications necessary to clarify a Vested Right Claim.

Dams:

1. To include the spillway elevation;
2. To correct the amount of water claimed; and
3. To add any amendments and qualifications necessary to clarify a Vested Right Claim.

In conjunction with the 2001 Staff Inspection Assignments, I examined GF&P License/Vested Water Right Nos. 726-2 Sylvan Lake, 727-2 Bismarck Lake, 728-2 Center Lake, 729-2 Legion Lake, and 734-2 Stockade Lake in Custer State Park for possible validation. These dams have

concrete spillways that can be used as an established, maintainable elevation reference upon completion of a proper survey. Once the outlet elevation is set and the correct amount of water to be claimed for each of these lakes is determined, these claims could be presented to the Water Management Board for validation.

Gale Selken, Water Rights Program, is presently coordinating completion of required surveys with GF&P personnel and will schedule these dams for elevation surveys in the near future.
