Permit No. 755-2Water Division 2 FALL RIVER Water DistrictREPORT OF EXAMINATION OF WORKS
AND/OR APPLICATION OF WATER TO BENEFICIAL USE

TO: Water Resources Commission, State Office Building No. 2, Pierre, South Dakota 57501

I have this day made a thorough examination of the water use system constructed by BRAUNERD
INDIAN SCHOOL of HOT SPRINGS holder
 of Permit No. 755-2, bearing date of priority of JANUARY 16 1963
 authorizing the diversion of .10 cu. ft. per second of the waters of CASCADE CREEK
 for IRRIGATION & STOCKWATER purposes, in FALL RIVER county.

I have to report on the condition of the same as follows:

The Water Use System consists of,

A. Works used to divert the water:

HYDRAULIC RAM 4"

B. Works used to transport water to place of use,

2100' OF 1 1/2" PLASTIC LINE TO 12,000 GALLON
STORAGE TANK

C. Works used to apply water to beneficial use.

4" PLASTIC LINE TO 9 HYDRANTS PLACED AT
INTERVALS ON CAMPUSThe system is in the following condition: GOODThe point of diversion is located N 17° 15' E, 1600 FEET FROM THE
SW CORNER, SECTION 20, T8S, R5EThe works are capable of diverting and conveying to the place of use .11cu. ft. per second of water which is to be used for IRRIGATION & STOCKWATERING

Water has been put to beneficial use to the maximum extent as follows:

3 ACRES IN SE¹NE¹, SECTION 19, T8S, R5E,
AND FOR STOCKWATER & FIRE PROTECTIONcomprising a total of 3 acres of land.

Mr. Robert W. Felton, President
Brainerd Indian School
Hot Springs, South Dakota

Dear Mr. Felton:

In reviewing your application to appropriate water, I note you have requested 1.00 cfs, or 450 gallons per minute.

Statutes limit the amount of water for irrigation to one cubic foot per second for each 70 acres. With the three acres you propose, you would be entitled to .043, or approximately 20 gallons per minute for the irrigation portion of the application. Possibly the other uses would require about the same amount. In other words, the 1.0 cfs seems excessive, and I am sure the Commission would be hesitant about approving such an amount.

I would suggest you request that we reduce the amount to .17 cfs (45 gallons per minute) or a reduced figure which is more in line with your actual use.

Sincerely,

SUBJECT: Shut Off Order for Junior Water Rights Upstream of
Angostura Irrigation District

Effective May 19, 1989, you are ordered to cease diversions of water under Water Right No. 755-2. The priority date for your water right is junior to the April 11, 1941 priority date for Angostura Irrigation District Water Right No. 579-2.

The Angostura Irrigation District's water supply is as follows:

May 2, 1989	24,673 acre feet available for irrigation at elevation 3173.4 ft. msl
-------------	---

The Irrigation District needs 45,000 acre feet per year for irrigation.

One fill of Angostura reservoir is authorized per year. The District has agreed to allow junior priority irrigation upstream if the reservoir fills to elevation 3,183.7 ft. msl, 3.5 feet below full elevation (3187.2 ft msl). If the reservoir fills to 3,183.7 ft. msl, the shutoff order will be rescinded. Any releases by the District for irrigation will be included in the 3183.7 ft. msl. calculation.

If you have any questions, please contact Jim Winterton (605 773-3352).

SUBJECT: Shut Off Order for Junior Water Rights Upstream of
Angostura Irrigation District

This is a follow-up notice to the May 10, 1990 notice that you received ordering you to cease diversion of water under Water Right No. 755-2. You are reminded that the order is still in effect and will remain in effect until Angostura Reservoir has filled. The May 10, 1989 order stated that the order was effective until the reservoir had reached an elevation of 3183.7 feet above mean sea level (msl). This has been changed and the order will remain in effect until the reservoir has reached the full elevation of 3187.2 msl. On March 6, 1990 the reservoir elevation was 3171.1 msl.

All water rights above Angostura Reservoir will be monitored until the reservoir has filled. I am asking for your cooperation in complying with this order. The Water Management Board can suspend any water right that does not comply. The option also exists in that a water use control area can be established to enforce compliance.

If you have any questions, please contact Del Brosz (605 773-3352).

SUBJECT: Shutoff Order for Junior Water Right Holders Up stream
of the Angostura Irrigation District.

Effective immediately no diversions of water under your Water Right No. 755-2 are authorized. Your water right is junior in priority to the US Bureau of Reclamation Water Right No. 579-2 (April 11, 1941 priority date). The Bureau of Reclamation water right for the Angostura Irrigation District allows one annual fill of the reservoir.

The amount of water required for one annual fill of Angostura Reservoir as of January 1, 1993 was 45,402 acre feet. On March 9, 1993 the water elevation in Angostura Reservoir was 10.2 feet and 41,305 acre feet below full. Reservoir storage level will be closely monitored. If inflows increase and the reservoir will fill, this shutoff order will be rescinded. Any 1993 irrigation releases from the reservoir will be included in the inflow calculations.

All water rights above Angostura Reservoir will be monitored until the reservoir has filled. I am asking for your cooperation in complying with this order.

If you have any questions, please contact Del Brosz or Mark Rath, Division of Water Rights, 523 E Capitol Ave, Pierre, SD 57501. Phone (605) 773-3352.

SUBJECT: Shutoff Order for Junior Priority Date Water Rights Upstream of
Angostura Dam

Shutoff Order for Water Right Nos. (755-2)

To protect the US Bureau of Reclamation's Water Right No. US579-2 for Angostura Reservoir with a senior priority date of April 11, 1941, the Bureau of Reclamation has asked that we issue shutoff orders for junior water right holders. Effective immediately no diversions of water from the Cheyenne River and tributaries by holders of junior water rights upstream of Angostura Dam will be allowed. On April 30, 2004, the water elevation in Angostura Reservoir was 3179.1 feet, a little over 8 feet below the full elevation of 3187.2 feet. Current storage is at 96,912 acre-feet, about 33,850 acre-feet below full and inflows are only about 38 acre-feet per day.

The Angostura Reservoir storage level will be closely monitored and if the Cheyenne River flows upstream of dam increase such that the reservoir will fill, this shutoff order will be rescinded at that time. If conditions do not improve, this order will remain in effect until December 31, 2004.

I am asking for your cooperation in complying with this shutoff order. If you have any questions, please contact Mark Rath or Don Stroup with the Water Rights Program at (605) 773-3352. Thank you.

Subject: Request for Junior Water Rights Shut Off Order - Angostura Reservoir, South Dakota

Dear Mr. Erbele:

We request that the State of South Dakota's Department of Environment and Natural Resources Water Rights Division issue shut off orders to junior water right holders on the Cheyenne River above Angostura Reservoir.

Angostura Reservoir is presently at elevation 3169.90, which is a little over 17 feet down from full (top of conservation or full is at elevation 3187.2). On February 24, 2005, the storage in Angostura Reservoir is about 60,000 acre-feet, which is 63,000 acre-feet from full. If the spring weather continues to be dry, the water right at Angostura will not be satisfied.

If you have questions, please contact Curt Anderson or me at 605-394-9757.

SUBJECT: Shutoff Order for Junior Priority Date Water Rights Upstream of Angostura Dam

Shutoff Order for Water Permit No(s). 755-2

The US Bureau of Reclamation holds Water Right No. US579-2 for Angostura Reservoir with a senior priority date of April 11, 1941. To protect this right, the Water Rights Program is issuing shutoff orders for junior water right holders. Effective immediately no diversions of water from the Cheyenne River or its tributaries, by holders of water rights junior to the priority date of April 11, 1941, upstream of Angostura Dam will be allowed. On June 03, 2026, the water elevation in Angostura Reservoir was 3173.87-feet, 13.3-feet below the fill elevation of 3187.2-feet (top of the conservation pool). Storage was at 71,519.0 acre-feet, which is approximately 51,529 acre-feet below full. At this time, Angostura Reservoir is not expected to fill with the current low inflows.

The Angostura Reservoir storage level will be closely monitored and if flows in Cheyenne River and its tributaries upstream of the dam increase such that the reservoir will fill, this shutoff order will be rescinded at that time. If conditions do not improve, this order will remain in effect until the end of the calendar year.

Water Right No. 755-2 is authorized for domestic, irrigation, and institutional uses. Regardless if there is a shutoff order in effect for this watershed or not, the diversion of water from Cascade Creek is authorized up to 18 gallons per minute (gpm) to serve domestic use (defined in South Dakota Codified Law 46-1-6(7): <https://sdlegislature.gov/Statutes/46-1-6>). Therefore, if there are people currently staying at the campus during the time period of this shutoff order is in effect, water from Cascade Creek may still be diverted at a rate of up to 18 gpm to serve domestic needs, including livestock watering.

I am asking for your cooperation in complying with this shutoff order to the **holders of water rights junior** to the priority date of April 11, 1941 upstream of Angostura Dam. If you have any questions, please contact Nakaila Steen at (605) 394-2229, or myself at (605) 773-3352 with the Water Rights Program. Thank you.

We would appreciate it if you would call Nakaila in our Rapid City office and provide an up-to-date phone number and email for faster communication on this matter. Thank you.
