Dear Mr. Mikel:

The Water Rights Program recently received a well completion report for a well drilled in July by Lacey Well Drilling for the City of Madison (copy enclosed). Is this new well a replacement well previously authorized by an existing water right or is this an additional well for the city?

If the well increases the city's ability to divert water to meet the community water needs, this would constitute a new appropriation of water and require a new water right permit.

Please let us know the status of this new well. If you have any questions regarding the city's existing permits, please contact Eric Gronlund or me.

Sincerely,
