Dear Mr. Knutson:

Enclosed is a partially completed "Notice of Transfer" form for use in filing an ownership change on Water Right No. 117-3A. The transfer form is being sent to you in response to your 1990 irrigation questionnaire on which you stated that your father had turned the land over to you.

The transfer form should be checked over for accuracy and signed in the presence of a notary public. Upon completion, return the form to our office with a required filing fee of \$2.50.

COMMENTS:

After receiving a letter from me with a transfer form, Glenn Knutson called to inform us that he still retained ownership of the land. His son, Bill, is now operating the farm for him.

Bill Knutson then spoke to me and stated he realized his comment on the irrigation questionnaire ("his father has turned this over to me") was a bit misleading, however, he meant he is now operating everything for his father.

Glenn Knutson requested that future irrigation questionnaires be sent directly to Bill Knutson (RR 2 Box 32, Centerville).

I told them to disregard the "Notice of Transfer of Ownership" I mailed to them and I would change the files accordingly.

Dear Mr. Knutson:

I am writing to acknowledge receipt of your 1999 irrigation questionnaires. You may disregard the January 14, 2000, "Notice" concerning reporting requirements for Water Permit Nos. 117-3A and 2268-3. The information was received in our office prior to the Water Management Board meeting and your name has been deleted from the agenda.

I would also like to thank you for your comments concerning the necessity of the irrigation questionnaire. I fully understand your frustration with having to take the time to keep track of hours pumped during an irrigation system.

The information reported to us each year by the irrigators is very valuable. We use it as a management tool to assess how much water is being used and whether additional water is available for new water permits. State law requires us to protect water availability for existing water users such as yourself before we issue new water permits.

If you have any questions, please contact me.

Sincerely,

Genny McMath

RE: Water Source for Water Right No. 117-3A

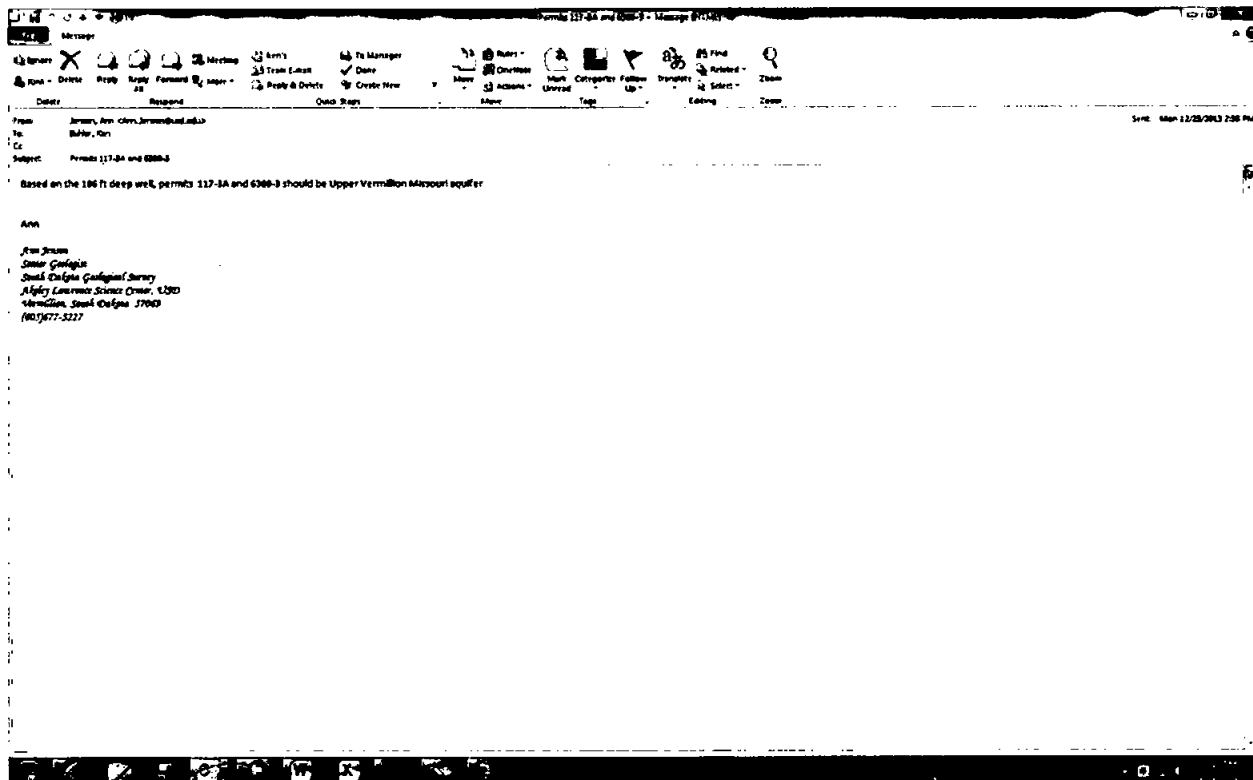

COMMENTS:

I contacted Glyndon Knutson regarding the water source for Water Right No. 117-3A. Glyndon the son of Glen Knutson and brother of Bill Knutson, is the current operator of the irrigation system authorized by Water Right No. 117-3A. I explained that upon review of the file, the actual depth of the well was unclear.

Except for changing the power source for the well, the Knutsons have not had any pump or well work done on this well so well depth, water level and pump setting documentation is not available.

Glyndon explained that the original well failed about 1974-1975 and was replaced. He thought the original well casing "rotted away" which would be consistent with galvanized casing used by Grimshaw & Bice Drilling. Glyndon thought that Paul Worm drilled the replacement well.

At this time it appears that the source of water for Water Right no. 117-3A is the well 106 feet deep.

Re: Aquifer management unit redesignation for selected water rights/permits on Clay and Turner Counties

COMMENTS:

Review of a request to change diversion point for Water Permit No. 8790-3, authorized to withdraw water from the Upper Vermillion Missouri: South aquifer (UVM:S), determined the well they wished to use is authorized under authorized by Water Right No. 7384-3 Water Right No. 7384-3 does not currently have a management unit designated for withdrawal from the Upper Vermillion Missouri aquifer (Water Rights, 2025). In reviewing the best information currently available for aquifer and management unit naming conventions, the best aquifer and management unit designation for Water Right No. 7384-3 is the Southern management unit of the Upper Vermillion Missouri aquifer (UVM:S) as shown in Figure 1. Furthermore, there are an additional 25 other water rights/permits, see Table 1, which should have the UVM:S management unit assigned (Water Rights, 2025).

This addition of the management unit designation, to the Southern management unit of the Upper Vermillion Missouri aquifer, does not represent a physical change in the water source. It is an update to the naming convention to reflect the currently best available information for aquifer and management unit extents. This update to the aquifer management unit name does not authorize any increase in the amount of water appropriated by any of these water rights/permits, change in diversion rate, relocation of existing wells, completion of additional wells into the aquifer, or change of acres permitted for irrigation. Going forward, issuance of any pertinent documents will reflect the updated aquifer and management unit designation.
