Permit No. 1322-3Water Division 3 SIoux RIVER Water DistrictREPORT OF EXAMINATION OF WORKS
AND/OR APPLICATION OF WATER TO BENEFICIAL USE

TO: Water Resources Commission, State Office Building, No. 2, Pierre, South Dakota 57501

I have this day made a thorough examination of the water use system constructed by A.J. Vander Wal
Bruce, S.D. holder
 of Permit No. 1322-3, bearing date of priority of October 21, 1966
 authorizing the diversion of 3.67 cu. ft. per second of the waters of ground water
 for irrigation purposes, in Brookings County.

I have to report on the condition of the same as follows:

The Water Use System consists of,

A. Works used to divert the water:

Well 10, feet deep cased with 18 inch diameter steel pipe
 "Layne Bowler" Turbine pump, 10 inch
 "U.S." 100 H.P. electric Motor

B. Works used to transport water to place of use,

50 feet of buried steel pipe

C. Works used to apply water to beneficial use.

"Valley" 13 tower, water propelled, center pivot sprinkler system

The system is in the following condition: excellentThe point of diversion is located at the center of the SW $\frac{1}{4}$ of Section 35, T11N, R51W

The works are capable of diverting and conveying to the place of use 2.23
 cu. ft. per second of water which is to be used for sprinkler irrigation

Water has been put to beneficial use to the maximum extent as follows: _____
the center 138 acres of the SW $\frac{1}{4}$ of Section 35, T11N, R51W

comprising a total of 138 acres of land.Date September 12, 1972

Dear Mr. Vanderwal:

On October 6, 1988, the Water Management Board adopted rules to implement a 1988 law for application of chemicals through irrigation systems. The rules establish equipment standards, performance standards and installation requirements for irrigation systems that apply chemicals (fertilizers, insecticides, or herbicides) with irrigation water.

You have indicated on your 1988 Water Management Board Irrigation Questionnaire that you do apply chemicals with irrigation water. A copy of the new rules for chemigation are enclosed for your information.

The new standards include:

- * a check valve between the irrigation pump and the point of chemical injection;
- * a vacuum relief valve on top of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a low-pressure drain on the bottom of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a chemical injection line check valve between the chemical injection pump and the point at which the chemical is injected into the irrigation line; a second check valve is required if the chemical injection pump is not a positive displacement pump;
- * an interlock system which ensures that the chemical injection pump will stop whenever the irrigation pump stops;
- * an inspection port between the irrigation pump and the check valve on the irrigation line;

Each of these equipment requirements are discussed more thoroughly in Sections 74:02:09:05 through 74:02:09:10 of the enclosed rules. Appendix A contains diagrams of the arrangements of these anti-pollution devices.

The equipment must be installed according to the manufacturer's specifications, calibrated, and maintained in good working condition. All chemical product labels must be followed and warning signs must be posted. These rules also require reporting of all spills, accidents, and system malfunctions. A 24-hour telephone number is provided.

The chemigation rules contain notification and record keeping requirements. Prior to using chemigation, notification must be given to the Chief Engineer on the enclosed Form 1C. Information that must be provided in this notification includes the water permit or right number, the name, address, and telephone number of the water permit or right holder and of the system operator, and the legal description of the lands on which the system is located. A record of the name, quantity, dates and hours of each chemical applied must be provided to the Chief Engineer on Form 2C. A copy of this form is also enclosed for your information. It will be mailed with the annual irrigation questionnaire and must be returned with the questionnaire by the date specified. If you have any questions regarding these rules or need additional copies of the forms, please contact Susan Bowar, Water Rights Engineer (605-773-3352).

NOTE: Water permits may be cancelled for nonconstruction within the five year construction period. Once a water permit is developed and the water used, the permit becomes a water right. A water right may be lost for three reasons:
1. Abandonment -- no intent to use water and use is abandoned.
2. Forfeiture -- no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.

NOTICE OF TRANSFER OF OWNERSHIP

RECEIVED

JUL 16 2007

WATER RIGHTS
PROGRAM

To: Chief Engineer
Water Rights Program, DENR
523 E. Capitol
Pierre, SD 57501-3181

No. 1322-3

Date: 7-12-07

I/We request that Water Right No. 1322-3

formerly owned by: Mary VanderWal

be transferred to: (name & address) Lawrence VanderWal, 20740 464th Ave, Bruce SD 57220-5708

Telephone No. _____

Title to the following described land(s)/property has been transferred as described above:

138 acres – SW ¼ Section 35, T111N, R51W

I/We understand that the validity of Water Right No. 1322-3 has not been determined by this transfer action. If I/We have any questions on validity, I/We understand that only the Water Management Board has the authority to determine if a water permit/right is valid (see note).

You are requested to file this "Notice of Transfer" in the appropriate file with the Water Rights Program, as evidence of the change of ownership.

A fee of Two Dollars and Fifty Cents (\$2.50) is required to cover the filing fees as required under SDCL 46-2-13. This form must be signed by the new owner.

I/We Lawrence J. VanderWal, the new owner, certify that the above information is true and correct.

Lawrence J. VanderWal
(Signed by new owner)

NOTE: Water permits may be cancelled for nonconstruction after the five year construction period has expired. Once a water permit is developed and the water used, the permit becomes a right. A water right may be lost for three reasons:

1. Abandonment - no intent to use water and use is abandoned.
2. Forfeiture - no use of water for three year period without legal excuse.
3. For a third violation of a condition of a water permit/right.
