We plan to pump the water from the Southwest corner of the gravel pit located on the farm. This area is shown on the accompanying map by the shaded area in ink. The pit floor is 15 feet below ground level. Plans call for 75 foot by 75 foot pit to be dug by drageline, 45 foot depth.

Water level is about 17 feet from ground surface in the pit area.

Dear Mr. Manning:

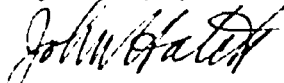

I am writing to advise you that our records now show that a 1987 irrigation questionnaire has been completed for Water Right No. 1434-3. During a March 16, 1988, telephone conversation with Genny McMath, of this office, you indicated you reported all of your 1987 irrigation data on the questionnaire for Permit No. 4896-3.

The Water Management Board did take action to amend your water right at their March 2, 1988 meeting, however, since the questionnaire data was in our office prior to the hearing, your name has been deleted from the list of permits amended at the hearing.

It is satisfactory to include irrigation data for more than one permit on one form, however, to avoid future misunderstandings, please return all forms. This will insure that all permit numbers receive proper credit.

If you have any questions, please contact us.

Very truly yours,

Dear Mr. Manning:

Enclosed herewith is, Water License No. 4896-3. This is the final water right document completing your process of obtaining a water right.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water.

Very truly yours,
