RE: Questionnaire

COMMENTS:

Mr. Rommeriem called and indicated he rents the land from Ira Albeck,
and probably will for a few years. The land was in PIK during 1983
and no irrigation was done.

He further indicated Mr. Albeck no longer lives in New York,
his address has changed to: Ira Albeck

212½ E Main Street

LaVerne MN 56156

A questionnaire was filled out (showing no irrigation)
and placed in the questionnaire files
for Water Right No. 1487-3.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.

Dear Mr. Rommereim:

On October 6, 1988, the Water Management Board adopted rules to implement a 1988 law for application of chemicals through irrigation systems. The rules establish equipment standards, performance standards and installation requirements for irrigation systems that apply chemicals (fertilizers, insecticides, or herbicides) with irrigation water.

You have indicated on your 1988 Water Management Board Irrigation Questionnaire that you do apply chemicals with irrigation water. A copy of the new rules for chemigation are enclosed for your information.

The new standards include:

- * a check valve between the irrigation pump and the point of chemical injection;
- * a vacuum relief valve on top of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a low-pressure drain on the bottom of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a chemical injection line check valve between the chemical injection pump and the point at which the chemical is injected into the irrigation line; a second check valve is required if the chemical injection pump is not a positive displacement pump;
- * an interlock system which ensures that the chemical injection pump will stop whenever the irrigation pump stops;
- * an inspection port between the irrigation pump and the check valve on the irrigation line;

Each of these equipment requirements are discussed more thoroughly in Sections 74:02:09:05 through 74:02:09:10 of the enclosed rules. Appendix A contains diagrams of the arrangements of these anti-pollution devices.

The equipment must be installed according to the manufacturer's specifications, calibrated, and maintained in good working condition. All chemical product labels must be followed and warning signs must be posted. These rules also require reporting of all spills, accidents, and system malfunctions. A 24-hour telephone number is provided.

The chemigation rules contain notification and record keeping requirements. Prior to using chemigation, notification must be given to the Chief Engineer on the enclosed Form 1C. Information that must be provided in this notification includes the water permit or right number, the name, address, and telephone number of the water permit or right holder and of the system operator, and the legal description of the lands on which the system is located. A record of the name, quantity, dates and hours of each chemical applied must be provided to the Chief Engineer on Form 2C. A copy of this form is also enclosed for your information. It will be mailed with the annual irrigation questionnaire and must be returned with the questionnaire by the date specified. If you have any questions regarding these rules or need additional copies of the forms, please contact Susan Bowar, Water Rights Engineer (605-773-3352).

Very truly yours,

JOHN HATCH, Chief Engineer

Dear Sir:

Enclosed is a "Notice" dated October 21, 2022 concerning the 2022 irrigation questionnaires. The notice was originally mailed to 43250 200th St, DeSmet SD. The post office notified us that your address has changed, and I will update our records accordingly.

Our records show you operate the systems for the following people:

No. 1487-3 – Ira Albeck

No. 4282-3 – Marvin Ogren

No. 6480-3 – Keith Larson

If you now own the land or no longer operate the systems, please let me know. Thank you in advance for the information.

Sincerely,

Genny McMath
