Dear Sir:

In regards to our conversation this morning find enclosed a sketch of our new sand and rock processing plant located north-east of Sioux Falls. The plant is located approximately $\frac{1}{4}$ mile west of our present plant in the Northeast quarter of Section 11, Township 101N, Range 49 W, Minnehaha County near the Sioux River. The new plant is not now in operation but we expect to begin material processing about September 15 at which time the old plant will be retired. We plan on a total recirculation system made up of two settling ponds measuring 129' x 380' x 18' deep and 129' x 300' x 14' deep respectively. Make up water to replace loss due to plant waste, evaporation, etc. will be made directly to the final settling pond from an on site well. Loss should be minimal and discharge into the Sioux River should be non-existent. Water in the final settling pond will be maintained at such a level as to permit the addition of a reasonable amount of natural water from rain and surface run-off without overflowing into the Sioux River. The settling ponds are so designed to permit the new plant to run approximately one full season before we are required to dispose of the sediment.

We will keep your office informed of the status of both plants and if we can be of any further help please don't hesitate to call on us.

Very truly yours,

Dear Sir:

I am writing to notify you that pursuant to the Notice of Intent to Validate Vested Water Right Claims dated June 20, 1988 that I intend to oppose validation of your water right claim No(s). 1618-3 until a field inspection has been completed. The claim has either never been inspected or an inspection was conducted so long ago that a new inspection is needed. An inspection is needed to determine the current state of your vested water right claim.

A staff member from the Division of Water Rights will be contacting you and scheduling an inspection of your water project. If we can answer any questions, please contact us.

COMMENTS:

I inspected VR 1618-3 for Concrete Materials, Inc. of Sioux Falls. I spoke with Mr. Keith Jones who works at the site, and has been a foreman at the plant since 1969.

We looked at the well site and noted that it is still at the location it was on the 1968 license. Mr. Jones stated that they still use the well all the time. The diversion rate varies somewhat with the use and the plant activity but they will use up to their allotted rate of 1.0 cfs at times. At the time of the inspection they were pumping 200-300 GPM.

The operation is essentially the same as is found on the license and the Vested Right Claim to 1618-3 can be validated as is.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.

VESTED WATER RIGHT NO. 1618-3

Date of Receipt of Claim September 19, 1968.

Date of Validation September 30, 1992.

The Water Management Board validated Vested Water Right Claim No. 1618-3 for Concrete Materials Co., Inc., 1201 W Russell St, Sioux Falls SD 57102 with the following limitations, conditions and qualifications:

1. Vested Water Right No. 1618-3 appropriates 1.0 cubic feet of water per second from one well located in the NW 1/4 NE 1/4 Section 11-T101N-R49W.
2. The appropriated water is used for supplying water for sand and gravel washing and may not exceed the amount of water needed for beneficial use for industrial purposes.

The water is to be used during the following annual period:
April 1 - December 31

3. The priority date of the Vested Water Right is January 1, 1949.
4. The water use system has been constructed and water has been applied to beneficial use.
5. Water Rights obtained in compliance with the laws of the State of South Dakota may not be unlawfully impaired by this appropriation.
