WATER RIGHT PERMIT NO. 1722-3

The Water Resources Commission hereby grants and issues this Water Right Permit No. 1722-3 authorizing the construction of the water use system and the putting of water to beneficial use as stated in the Application and as modified in the Water Right Application approval, subject, however, to the following limitations and conditions:

1. The date from which applicant may claim right is FEBRUARY 4, 1970
2. The equivalent of at least one-fifth of the work above specified is to be completed on or before SEPTEMBER 18, 1972
3. The whole of said work is to be completed on or before MARCH 18, 1975
4. The limit of time from proof of beneficial use of water appropriated in accordance herewith is MARCH 18, 1976
5. The water appropriated shall be used for the purpose of IRRIGATION

6. The prior right of all persons who, by compliance with the laws of the State of South Dakota, have acquired a right to the use of water must not be injuriously affected by this appropriation.

7. The amount of the appropriation herein granted shall not exceed 4.5 cubic feet per second; neither shall it exceed the capacity of the above described water supply system, nor shall it exceed the amount of water needed for beneficial uses served, and if for the irrigation purposes said appropriation must be limited to not more than 3 acre feet per acre per year and be limited to not more than one-seventieth (1/70) of one cubic foot of water per second of time for each acre of land to which water is actually and beneficially applied for irrigation on or before MARCH 18, 1976; said water to be used during the following described annual period: APRIL THRU OCTOBER

Albert Allen Wipf
RR 1, Box 77
Frankfort, SD 57440

Dear Mr. Wipf:

On October 6, 1988, the Water Management Board adopted rules to implement a 1988 law for application of chemicals through irrigation systems. The rules establish equipment standards, performance standards and installation requirements for irrigation systems that apply chemicals (fertilizers, insecticides, or herbicides) with irrigation water.

You have indicated on your 1988 Water Management Board Irrigation Questionnaire that you do apply chemicals with irrigation water. A copy of the new rules for chemigation are enclosed for your information.

The new standards include:

- * a check valve between the irrigation pump and the point of chemical injection;
- * a vacuum relief valve on top of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a low-pressure drain on the bottom of the pipeline between the irrigation pump and the irrigation pipeline check valve;
- * a chemical injection line check valve between the chemical injection pump and the point at which the chemical is injected into the irrigation line; a second check valve is required if the chemical injection pump is not a positive displacement pump;
- * an interlock system which ensures that the chemical injection pump will stop whenever the irrigation pump stops;
- * an inspection port between the irrigation pump and the check valve on the irrigation line;

Each of these equipment requirements are discussed more thoroughly in Sections 74:02:09:05 through 74:02:09:10 of the enclosed rules. Appendix A contains diagrams of the arrangements of these anti-pollution devices.

The equipment must be installed according to the manufacturer's specifications, calibrated, and maintained in good working condition. All chemical product labels must be followed and warning signs must be posted. These rules also require reporting of all spills, accidents, and system malfunctions. A 24-hour telephone number is provided.

The chemigation rules contain notification and record keeping requirements. Prior to using chemigation, notification must be given to the Chief Engineer on the enclosed Form 1C. Information that must be provided in this notification includes the water permit or right number, the name, address, and telephone number of the water permit or right holder and of the system operator, and the legal description of the lands on which the system is located. A record of the name, quantity, dates and hours of each chemical applied must be provided to the Chief Engineer on Form 2C. A copy of this form is also enclosed for your information. It will be mailed with the annual irrigation questionnaire and must be returned with the questionnaire by the date specified. If you have any questions regarding these rules or need additional copies of the forms, please contact Susan Bowar, Water Rights Engineer (605-773-3352).

Very truly yours,

Dear Mr. Peterson:

Enclosed is Water License No. 1722A-3. Due to the ownership changes filed, Water Right No. 1722-3 was divided and reissued to reflect separate ownership as follows:

- **No. 1722A-3 – Twisted Land and Cattle, 19026 391st Ave, Hitchcock SD 57348** authorizing diversion of 2.28 cfs to irrigate 160 acres in the NE ¼ Section 30, T115N, R61W;
- **No. 1722B-3 – Danny Peterson, 38984 189th St, Hitchcock SD 57348; Brad Peterson, 19026 391st Ave, Hitchcock SD 57348; Lenny Peterson, 19111 Maple Ave, Hitchcock SD 57348** authorizing diversion of 1.14 cfs to irrigate 80 acres in the NW ¼ Section 30, T115N, R61W.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 1722A-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

Your receipt in the amount of \$50 which you paid for filing the ownership change is enclosed. If you have any questions, please contact our office.

Sincerely,

Jeanne Goodman, Chief Engineer
