2. Forfeiture - no use of water for three year period without legal excuse.

Dear Mr. Schumacher:

Enclosed is your Reissued Water License No. 1987A-3. Based on the June 17, 2011 ownership change you filed, No. 1987-3 was divided and reissued to reflect separate ownership.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 1987A-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water. If you have any questions, please contact our office.

Sincerely,

(1) William Schumacher was issued Water License No. 1987-3, September 6, 1974 for a water right to divert 3.08 cubic feet of water per second (cfs) from ground water (two wells – Gray Goose Aquifer), Hughes County, South Dakota for irrigation purposes. Water License No. 1987-3, with a priority date of April 26, 1973 was issued to the applicant for diversion of water with construction of the described water supply system and the application to beneficial use of water completed. Dear Mr. Schumacher:

Enclosed is Water License No. 7251-3. This is the final water right document completing your process of obtaining a Water Right. Included with your license is a map prepared by the staff engineer who conducted the field investigation.

For your information SDCL 46-6-27 requires that if the owner of an existing well, such as the well authorized by Water Right No. 7251-3, constructs a replacement well and does not plan to use the old well, the old well is considered abandoned and must be plugged. Also, any well that is being used or is not considered abandoned must be valved and controlled, if flowing, or sealed and capped so that no leaking occurs either underground or at the surface.

Upon licensing, the applicable portions of Water Right Nos. 1621-3 and 1987A-3 were incorporated into No. 7251-3. As long as you use the water beneficially, as stated in the Water License, the State Water Laws provide that you have a continuing right to use the water.
