

No. 2-11-3 Lacey Big Sioux

Water Division No. 3 Big Sioux River District

(Blanks to be Filled by the Engineer for the W. R. C.)

APPLICATION FOR PERMIT

STATE WATER RESOURCES COMM.

PIERRE, SOUTH DAKOTA

Request for priority of 1950 as gained by previous use and published and recorded notice to the Public

To Appropriate Water within the State of South Dakota

(NOTE—Draw a line through items not applicable.)

1. Name of applicant Edward H. Lacey

Postoffice address Trent County Moody State S. Dak.

I. If a corporation No

(a) Name of same

(b) Date and place of incorporation

(c) Amount of capital stock

(d) Amount paid in

(e) Names and addresses of directors

(NOTE—A certified copy of articles of incorporation must accompany the application.)

II. Method of accomplishing the work and financial resources of the applicant:

(a) Method of accomplishing work (Whether by contract, employment of others, or by direct labor)

any or all methods as to past and future construction plenty for

(b) Cash on hand, \$ future needs (c) Treasury stock, \$ none

(d) Bonds to be issued, \$ none contemplated (e) Other resources, \$ this and other lands

2. Name of diversion work Lacey Big Sioux River Project

From River and Gravel pit projects SW 18-105-43

3. Amount of water claimed SE 13-105-49 4.1 cubic feet per second 3.33 = total of 1500 gpm.

4. Source of water supply Big Sioux River or other source described in Lacey Gravel Pit Project Point A shown on the map or other point on the river

5. Location of point of diversion bank within 300 ft. of point A on the river left of Moody County.

Whenever advisable for good of crop or for storage during ample river flow period for later summer

6. Annual period or periods during which water is to be used crop, domestic, or stock watering use throughout year

7. To be used for:

I. Irrigation using sprinkler system, generally or combination of pumping and gravity

(a) Number of acres to be irrigated 325.27 acres.

(b) Legal subdivisions to be irrigated SE 13 Twp. 105N. R 48W. and SW 18 Twp. 105N. R 48W.

(NOTE—A list of lands to be irrigated, giving each subdivision and fraction with acreage thereof, should be written here or may be appended as a part of this application. Same must also be shown on accompanying map.)

(c) Statement as to domestic use (giving location, etc.) Domestic use at farmstead buildings on SE 18 or hereafter placed on SE 13

II. Stockwatering, mining, milling, power, fish culture, fire protection and public recreation:

(a) Nature of use Stockwatering, crop processing or fire protection

Name any of the above uses claimed

(b) Amount of power to be generated None horse power.

Amount claimed for engine cooling 1000 gal. for the water pumping engine

Point A shown on the map or other point on the bank and Lacey

(c) Location of plant land within 300 ft. of A

(d) Method of developing power engine driven pump

(e) Point where water will be returned to stream it will be absorbed by ground that is irrigated

See Lacey Gravel Pit application and map for information as to water distribution location

Map No. 167-3

(5100 ft. of 5" to 8" aluminum pipe & nozzles 60' c-c gates
(and fittings now on hand)

8. Estimated cost of work:

(a) Head Gates, \$ None

(c) Fluming, \$ 2500.00

(e) Other structures

(d) Canal-earth, \$ no

unknown additional or replacement
pipe pumps or engines

(b) Pumping plant, \$ 3000.00

Rock, \$

Total, \$

9. Description of diversion works: Pumping from the river or wells, distribution pipes and sprinkling nozzles
I. Nature of works: (Reservoir, dam, ditch, flume, pumping plant, etc.) Rainbird No. 240 sprinklers

3/16 x 1/8 nozzles 250 gpm pump with 90 HP Chrysler engine and such other equipment as may be necessary

II. Dimensions of works:

(a) Dam: Height None feet; length at bottom feet; length at top feet; thickness at bottom feet; thickness at top feet; slope at front water face; slope at back face

material used in construction

(b) Reservoir: Capacity when filled acre feet. Surface area at highwater mark acres.

DEPTH AT OUTLET-Feet	SURFACE AREA AT EACH DEPTH AT OUTLET--ACRES	ACRE-Feet CAPACITY
In making this application for a water right in compliance with existing statutes and the practice of the Water Resources Commission of the State of South Dakota, the undersigned does not waive any legal rights to subsurface or underground water or to the water in a deep hole in the river bed, regardless of the navigability of the stream, which accrued to the Patentee who secured the land from the U. S. Government and his successors in interest including the undersigned.		

(c)* Head gate: Width None feet; height feet;

Material

(d) Canal: Total length miles. 5100 ft. of 5" to 8" metal pipe now on hand, as needed may be increased

LOCATION BELOW HEADGATE	DEPTH	BOTTOM WIDTH	WIDTH AT WATER-LINE	GRADE PER MILE
At Mile	feet	feet	feet	feet
At Mile	feet	feet	feet	feet
At Mile	feet	feet	feet	feet
At Mile	feet	feet	feet	feet
At Mile	feet	feet	feet	feet
At Mile	feet	feet	feet	feet

(Give dimensions where reductions in size are made.)

10. Time required for completion of work 3 years.

11. Time required for complete application of water to the proposed beneficial use 3 or more years.

12. Choice of newspaper for publication of notice of intention to appropriate Flandreau Paper (Meedy Co. Times)

STATE OF SOUTH DAKOTA

County of Minnehaha ss.

I, Edward H. Lacy, being first duly sworn on my oath depose and say: That my relation to the above described undertaking is that of owner, that I have read the above foregoing statement, examined the map accompanying the same, and that I know of my own personal knowledge that the matters therein stated and shown are true.

Signed Edward H. Lacy

Subscribed and sworn to before me this 2 day of June 1956

Notary Public (or other qualified officer.)

*Each diversion must have a headgate or measuring device.

I, Edward K. Mather, a duly licensed Land Surveyor, in and for the State of South Dakota, do hereby certify that the accompanying map shows the land to be watered from one or more sources of water supply by pumping and sprinklers under the LACEY WATER PERMITS or Water Rights.

In Witness Whereof I have hereunto set my hand and seal this 31st. day of May, 1956

Chief Engineer, Executive Officer

Vested Right
Number of permit 211-3

Date of first receipt of application June 14, 1956

Date of return to applicant for correction, amendments or changes required as follows: July 13, 1956

Date of receipt of corrected application August 3, 1956

Date from which applicant may claim right 1948, 1956

Approved September 4, 1956 Recorded in Book 3 Page 123

This is to certify that we have examined the foregoing application for vested right water of the
State of South Dakota, and we hereby grant the same as stated herein, subject, however, to the following limita-
tions and conditions:

1st. The equivalent of at least one-fifth of the work above specified was completed on or before
in 1948, 1956

2nd. The whole of said work was completed on or before in 1948, 1956

3rd. The limit of time for proof of beneficial use of water appropriated in accordance herewith is
September 4, 1958

4th. The water appropriated shall be used for the purpose of Irrigation &
Business

5th. The prior right of all persons who, by compliance with the laws of the State of South Dakota, have
acquired a right to the use of water must not be injuriously affected by this appropriation.

6th. The amount of the appropriation herein granted shall not exceed 4.65
cubic feet per second; neither shall it exceed the capacity of the above described system of diversion works,
nor the least amount of water that experience may hereafter indicate as necessary for the production of crops
in the exercise of the best husbandry; and further, said appropriation must be limited to not more than one-
seventieth (1/70) of one cubic foot of water per second of time for each acre of land to which water is actually
and beneficially applied for irrigation on or before September 4, 1958; said water to be used
during the following described annual period:

none within a mile or more known of

Soil and topography has caused a hole some 10 ft. or more in depth at the river bend where pump suction is placed opposite point A on the map which will hold water when other stretches of the river bed are dry. Therefore, we feel justified in asking for priority based upon vested Rights and prior use of water from this favorable deep hole site in the Big Sioux River channel.

STATE OF SOUTH DAKOTA

WATER LICENSE No. 211-3

WHEREAS, On the 14th day of June A. D. 1956.

Edward H. Lacey

of Trent County of Moody and State of South Dakota duly made application (No. 211-3) to us for a permit to use 4.65 cubic feet per second of the waters of the Big Sioux River and adjacent ground water County of Moody, State of South Dakota, for irrigation and business purposes; and

WHEREAS, On the 4th day of August A. D. 1956 recognizing Permit No. 211-3 was issued to said applicant for the diversion of said water, and ~~providing for the~~ completion of the works of diversion therein described ~~XXXXXXXXXX~~ providing ~~XXXXXX~~ in 1948 ~~XXXXXX~~ and for the application to beneficial use of said water on or before the 4th day of September A. D. 1958 and,

WHEREAS, On the 3rd day of August A. D. 1956 the holder of said permit duly made proof of the completion of adequate works for the diversion of 4.65 cubic feet per second of said waters, as evidenced by our Certificate No. 211-3 dated September 4, 1958 confirming the completion of works of sufficient capacity for diverting and conveying to the place of intended use 4.65 cubic feet per second of water, with date of priority of 1948 ~~XXXX~~ and,

WHEREAS, On the 3rd day of September A. D. 1958 proof was duly made of the application to beneficial use of 4.65 cubic feet per second of said water; on 326.27 acres located in SE $\frac{1}{4}$, Sec 13, T 105N, R 49W, and the SW $\frac{1}{4}$, Sec 18, T 105N, R 48W,

NOW, THEREFORE, By the virtue of the authority vested in us by the laws of the State of South Dakota,
 We hereby grant and confirm to Edward H. Lacey
 of Trent, South Dakota the holder and owner of said permit No. 211-3
 a water right, dating from 1948, to the use of 4.65
 cubic feet per second of the waters of the Big Sioux River and adjacent ground water
 in the County of Moody and State of South Dakota, or so much thereof as may be
 necessary for the purposes hereinbelow mentioned, to be diverted at between a point 825 feet South
and 1100 feet East of the West 1/4 Cor., Sec. 18, T-105N, R-48W and a point
1789 feet West and 100 feet North of the SE Cor., Sec 13, T 105N R 49W.
and conducted to and upon
the SE 1/4 Sec 13, T-105N, R-49W and SW 1/4 Sec 18, T-105N, R-48W
 for the purpose of irrigation and business use.

subject, however, to the laws of the State of South Dakota applicable to a license for the use of the waters of the
 State, and subject, also to the local or community customs, rules and regulations which have been or may be
 adopted from time to time by a majority of the users from a common source of supply, canal or lateral from
 which such water may be taken, when such rules and regulations have for their object the economical use of such
 water.

Proof of Application of Water to Beneficial Use

PETITION OF HOLDER

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Edward H. Lacey, owner and operator, Trent, South Dakota

Ques. 2. If acting in behalf of a corporation, state its name, principal place of business (if a foreign corporation, give name and postoffice of statutory agent,) your position with reference to same, and your authority for appearing in its behalf.

Ans. _____

Ques. 3. State date of posting and date of recording notice of appropriation.

Ans. Posted January 21, 1950. Recorded February 11, 1950.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Big Sioux River, Point "A" between Big Sioux River and
Gravel Pit project (see map).

Ques. 5. Describe your works of diversion giving length and height of each dam and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use, and date of completion of same.

Ans. Pump and combination gravity and sprinkler distribution. Total pumpingcapacity is 2100 gallons per minute. All sprinkler heads, sprinkler line,and main line ordered and major portion is delivered but sprinkler line will
not be completely delivered until spring.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have ACTUALLY been irrigated with said water.)

Ans. Irrigation of the SW 1/4, Sec 18, T. 105N., R. 49W., and the SW 1/4, Sec 13,T. 105N., R. 49W. - 326.27 Acres (gov't measurement).

Ques. 7. If for other than irrigation purpose, state how applied, amount of horse power generated, etc.

Ans. Domestic use, fire protection and possible farm product processingon above described lands.

Ques. 8. What is the minimum amount of water required for the use specified above?

Ans. 1500 gallons per minute.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. _____

Ques. 10. State when, how, in what amount and to what extent, the water diverted under above mentioned permit has been used.

Ans. Project was begun in 1949. Maximum water use of 1500 gallons per minute attained by January 21, 1950 on afore mentioned lands.

(Sign.)

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Sioux Falls, County of Minnehaha, State of South Dakota, on this _____ day of _____ A. D. 19____

Witnesses.

I, the undersigned, do hereby certify that I am a duly qualified elector residing in the immediate vicinity of the diversion works designated in the foregoing testimony, that I have no interest in the works, water or land above described, that I have read the foregoing testimony and that I know of my own personal knowledge that the matters therein stated are true.

Permit No. 211Water Division No. 3 Big Sioux Water District

Certificate of Examination of Works

Report of Examining Engineer

STATE WATER RESOURCES COMM.
PIERRE, SOUTH DAKOTA

To the State Water Resources Commission, Pierre, South Dakota:

Dear Sirs: I hereby certify that in accordance with your letter of authorization dated September 3, 1958, I have this day made a thorough examination of the diversion works constructed by Mr. Edward H. Lacey of Trent, South Dakota Moody County, South Dakota, holder of Permit No. 211-3, 212-3, 213-3 issued upon Application No. 211-3, 212-3, 213-3 bearing date of priority of September 1948, authorizing the diversion of 4.65 cu. ft. per second of the waters of ground water & Big Sioux River for domestic use, fire protection, & possible farm product processing on lands specified herein.

The diversion works comprise: See attached description

and the system is in the following condition: Good condition for very effective use whenever and wherever irrigation or other specified use is needed.

The point of diversion is located at points designated in the application 211-3, 212-3 and 213-3

The works are capable of diverting and conveying to the place of use 4.65 cu. ft. per second of water, which is to be used for Domestic use, fire protection, and crop processing

The legal sub-divisions to be irrigated are: 5th Sec. 18, T. 105 N., R. 48 W. and the SE Sec. 18, T. 105 N., R. 49 W. including 326.27 acres according to Government Land Office Official Survey.

comprising a total of 326.27 acres acres of land.
The domestic use intended comprises water for man or beast as desired also for fire protection

The utilization for power, mining, or other beneficial uses comprises: irrigation and processing of potatoes or other vegetables or farm products for market.

Witness my hand, this 6th day of September, A. D. 1958.

—SEAL—

Edward H. Mather
Examining Engineer.

Dear Mr. Blimes,

My dad Ed H. Faray has mentioned you several times as we would talk about water which is quite important to us in our farming operation as we raise 40-50 thousand bushels of potatoes each year.

Anyways the problem is that we cannot go back on the same ground for potatoes over once every 3-4 years. Lately we have been going back too often and as a result our red potatoes have been going down in quality with blanches and scab on the tubers so we have to get off the farm for some of our potato crop this year. We can rent some ground adjacent to the Sioux River on which we have a right to pump water for use on our farm.

I would like to know if it is possible for us to use some of the water we have a right to on another man's farm. The reason for the desire to irrigate this rented river bottom land is that 1) when our potato plants leave the field we spend \$70 investment per acre in seed and fertilizer and without water one might not even get the seed cost back from the crop and 2) after it harvest time it becomes necessary to irrigate

to soften the ground to facilitate harvest.

In view of the fact that only three or four farmers out of the ten or so who have shared water from the river have proved out it would seem possible that we could use some of our water at another point on the river without creating any problems, anyway I figure we could ask you if this could be done and if you would like for us to come to Pierre and talk to you just give us a time and we would be there.

Thank you

Jim
Facey.

Tremont, S.D. 57065

January 10, 1966

Mr. Jim Lacey
Trent, South Dakota, 57065

Dear Mr. Lacey:

In your letter of January 7, 1966, you ask about whether or not you may irrigate temporarily rented land instead of your own land under your water rights numbers 211-3, 212-3, and 213-3.

There are no specific provisions in the South Dakota water rights law which covers the question that you ask. There are specific procedures prescribed to change the lands irrigated and to change the point of diversion (Sections 61.0128 and 61.0129, page 9 of the enclosed copy of the water laws) but these do not cover special cases such as yours without unreasonable complications and "red tape". Also, Section 61.0127, page 9, provides that irrigation is appurtenant to the land upon which water is used under appropriative water rights.

However, under the broad regulatory authority vested in the Water Resources Commission, the Commission has granted temporary permits for water use. Of course, such temporary permits are restricted in scope. As applied to your request, such a temporary permit would be:

- (1) limited in time to one irrigation season,
- (2) subject to non-interference with all other water rights,
- (3) the priority of your existing water right would not apply in case of water shortage.

If you think that such a temporary permit would solve your problem without undue risk to your investment in your crop, I shall be pleased to use your letter as a request for a temporary permit from the Commission at its meeting on January 19-20, 1966.

Jim Lacey

2.

January 10, 1966

Please advise me if you wish to have a temporary permit considered by the Commission and, if so, send a description of the rented land you wish to irrigate and the location of the new diversion point on the Big Sioux River. If you wish, you may speak to the Commission personally during the Commission meeting in Pierre during the P.M. January 19 or during the A.M. January 20.

Sincerely,

JWG:ls

J. W. Grines

211-3 212-3 213-3
J.W. Grimes
State Office Bldg.
Pierre, So. Dak.

Jim Lacey
Trent, So. Dak.
57065

Dear Sir,

My Father and I farm 440 acres just south of Trent on the Sioux River. We have water rights for roughly 2200 gallons per minute on 320 acres of this land. The other 120 acres we purchased last spring and have no water rights on this. This newly purchased land adjoins our 320 acres on the south side. Several years ago we installed a 10" steel pipeline along our south line so now we have land on both sides of this line.

I would like you to determine or else ask the Water Resources Commission when it meets if we can go ahead and water this additional 120 acres without exceeding our 2200 gallon per minute right. From my point, there would be no point for us to acquire additional water as 2200 gallons is adequate to handle the acreage.

Also, I would like your personal opinion of the feasibility of developing the the Big Sioux River as outlined in this little folder enclosed, recently I was elected to the Board of Directors of this association.

Sincerely,

Jim Lacey
Jim Lacey

STATE WATER RESOURCES COM. L.
PIERRE, SOUTH DAKOTA

211-3 212-3 213-3
December 20, 1967

Mr. Jim Lacey
Trent
South Dakota 57065

Dear Mr. Lacey:

Concerning your recent letter, the State water laws require that a water right must be obtained for the additional 120 acres you propose to irrigate even though you have sufficient water capacity to handle the additional acreage.

Water right application forms are enclosed. This can be handled as a supplement to your present water rights Nos. 211-3, 212-3 and 213-3, including the additions to the map.

With respect to the possible development of the water resources in the whole Big Sioux Basin as very generally outlined in the brochure attached to your letter, much benefit and solutions of problems could be the results of such development. In addition to the studies being made by the Corps of Engineers, the Soil Conservation Service and the Bureau of Reclamation have basin-wide investigations underway. With the information from all such work, what might be built will depend in large part upon the approval of people living in the basin. Verne Butler of the East Dakota Conservancy Sub-District, P. O. Box 68, 524 17th Ave., Brookings, South Dakota 57006, is following these studies closely. I assume that your Rural Area Development Association is working closely with him.

Sincerely,

J. W. Grimes

Ted Lacey
Box 796
Trent, SD 57065

Dear Mr. Lacey:

We have contacted the Department of Transportation regarding your request to install a line to cross their track. Nora Doyle indicates they have to have one of their engineers check it out, and they have been tied up with other work. They anticipate that they will get to it soon.

We are assuming the 27 acres you mentioned are included in the acreage under water rights 211-3, 212-3 and 213-3. If so, we have no objection to changing the method of applying the water.

Sincerely,

BLANCH E. ADAMS
Water Rights Coordinator

SP1/81

OBSERVATIONS DURING THE FIELD INSPECTION OF THE EDWARD
H. LACEY IRRIGATION PROJECT (VESTED RIGHT 211-3, 212-3, and
213-3) ON NOVEMBER 2, 1956.

Mr. Lacey was very cooperative during this inspection even when told that this was only a pick-up inspection and not a formal one.

He has 4 self contained pumping units equipped with $4\frac{1}{2}$ " inlet and $2\frac{1}{2}$ " outlet Hale pumps. Each is rated at 600 gpm. They are powered by Chrysler, Dodge, Wakasha (90Hp) and Diamond-T industrial engines. The pumps all have pressure gauges installed. These units were purchased from government surplus.

The water on the home project is pumped from 11 wells which are 3 feet in diameter with gravel pack screens, they are all curbed with concrete tile. All 11 wells are piped to a central pumping point. Each well is also valved and during the pumping Mr. Lacey adjusts the valves so that the requirement from each well will be such that the static water level in all of the wells will be kept as closely the same as possible. There is approximately 12 feet of water in each well.

He now has about 2640 feet of 6" line, 80 rods of 5", and 3340 feet of 4". Mr. Lacey is going to purchase 2000 feet of 8" main line pipe this spring in order to relieve some of the friction loss when pumping a half-mile which he is required to do at times. He has 170 Rainbird Model 40 5/32 x 13/64 nozzles (15 gpm @ 40#) and 170 rizers.

Normally Mr. Lacey has 160 acres in potatoes and 160 acres in corn, alfalfa and general crops. The entire acreage is usually irrigated.

The location of the central point of diversion for his 11 wells at home, the Big Sioux River and the three wells in the gravel pit compared very closely with that shown on the map.

He has three wells in the gravel pit which he drops a suction hose into and uses a portable pump.

There is only a Railroad fill that separates the gravel pit from the Sioux River diversion. Pumping may be done from both of these points with the pump at only one location as shown on the map.

Mr. Lacey's equipment was all in very good condition. At the time of my visit he had 3 of the pumping units torn down and was giving them a complete overhaul.

The general observation showed that the quality of the potatoes, corn etc, and yields were very good.

NOTICE

Edward H. Lacey
Box 796
Trent SD 57065

Dear Mr. Lacey:

I am writing to notify you that pursuant to the Notice of Intent to Validate Vested Water Right Claims dated June 20, 1988 that I intend to oppose validation of your water right claim No(s) 211-3, 212-3, 213-3 until a field inspection has been completed. The claim has either never been inspected or an inspection was conducted so long ago that a new inspection is needed. An inspection is needed to determine the current state of your vested water right claim.

A staff member from the Division of Water Rights will be contacting you and scheduling an inspection of your water project. If we can answer any questions, please contact us.

Very truly yours,

for

NOTICE OF AMENDMENT OF WATER PERMIT

TO: TED LACEY, OPERATOR
RR #1 BOX 39
TRENT, SD 57065

FROM: Ron Duvall, Natural Resources Engineer IV
Water Rights Division
(605) 773-3352 *Ron Duvall*

SUBJECT: Amendment to Water Permit No(s). 211-3,
212-3, 213-3

Pursuant to the provisions of the notice dated February 1, 1991, and following the Hearing February 27, 1991, the Water Management Board has amended Water Permit No(s). 211-3, 212-3, 213-3 to add the following qualification:

"This permit is subject to the Irrigation Water Use Questionnaire being submitted each year."

The addition of this qualification to your Permit means that failure to submit the required irrigation questionnaire in the future could result in suspension of the water permit and no use of water for up to one year for the first violation.

Please contact Genny McMath (605) 773-3352, if you have any questions.

SENDER: Complete items 1 and 2 when additional services are desired, and complete items 3 and 4.

Put your address in the "RETURN TO" space on the reverse side. Failure to do this will prevent this card from being returned to you. The return receipt fee will provide you the name of the person delivered to and the date of delivery. For additional fees the following services are available. RE: Status of Vested Rights 211-3, 212-3, 213-3

COMMENTS:

On 6-28-89 I inspected the lands irrigated under Vested Right Claims Nos. 211-3, 212-3, 213-3 to determine the status of the permits.

The 3 vested right claims have been compared to produce 2100 GPM ^(14.5 cfs) to irrigate 326 acres in the SE $\frac{1}{4}$ of Section 13, T105N, R49W and the SW $\frac{1}{4}$ of Section 19, T105N, R49W. The 3 claims cover diversions from the Big Sioux River and wells in an adjacent gravel pit in Section 13 + a shallow well in Section 19.

The diversion point from the Big Sioux River is also used to supply water to another permit, No. 1500-3 now operated by Ted Lacey.

Presently approximately 252 acres are irrigated under the 3 Vested Right claims (see map). There are 4 diversion points capable of producing 2850 GPM (see map). About 765 GPM of the maximum diversion rate from the river diversion point is for Permit No. 1500-3. The 3 Vested

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.

NOTICE

TO: Edward H. Lacey
Box 796
Trent SD 57065

FROM: John Hatch, Chief Engineer
Water Rights Division
695 773-3352

SUBJECT: Hearing to Consider Validation of Recognized Vested Right Claim Nos.
211-3, 212-3 and 213-3

A Notice of Intent to validate Claim Nos. 211-3, 212-3, 213-3 was published on June 22 and 29, 1988 in the Moody Co. Enterprise, Flandreau SD. The Water Rights Division opposed validation of Nos. 211-3, 212-3, 213-3 for purposes of completing on-site inspection of the claims. The inspection of the claims was completed on June 28, 1989, by Tom Brandner staff engineer. The inspection found that the number of acres being irrigated has been reduced from 326.27 acres to 252 acres. The diversion rate is to be reduced, accordingly, from 4.65 cubic feet of water per second (cfs) to 3.6 cfs. This reduced diversion rate is based on the statutory application rate of 1 cfs per 70 acres (252 acres/70 = 3.6 cfs).

The Water Management Board will consider validation of Claim Nos. 211-3, 212-3 and 213-3 at 9:30 am, May 6, 1992, in the Floyd Matthews Training Center, Joe Foss Building, 523 E Capitol, Pierre SD. The agenda time is an estimate. The actual time of the hearing may be later than 9:30 am due to prior agenda items.

Pursuant to the findings of the on-site inspection, validation of Claim Nos. 211-3, 212-3 and 213-3 are recommended for a diversion rate of 3.6 cfs from the Big Sioux River and three wells for stock watering and to irrigate 252 acres. Following the hearing, the Board is authorized to 1) validate the claims as recommended for 252 acres and 3.6 cfs, 2) validate the claims as licensed prior to the on-site inspection, 3) validate the claims based on evidence presented at the public hearing, or 4) defer validation of the claims. Applicable provisions of the published notice of intent to validate Claim Nos. 211-3, 212-3 and 213-3 will still apply at this hearing. A copy of the June 22 and 29, 1988, publication is available upon request.

This hearing is an adversary proceeding. You have the right to be represented by a lawyer. These and other due process rights will be forfeited if not exercised. Decisions of the Board may be appealed to the Circuit Court and State Supreme Court as provided by law.

cc: Diane Best, Assistant Attorney General

CERTIFICATION

I hereby certify that on April 15, 1992, I have personally deposited with the United States Mail at Pierre, South Dakota, first class postage, prepaid envelopes containing a Notice dated April 15, 1992, regarding Hearing to Consider Validation of Recognized Vested Right Claim Nos. (211-3), 212-3 and 213-3 addressed as stated below:

Edward H. Lacey, Box 796, Trent, SD 57065.

Patrick Lacey
141 N Main #704
Sioux Falls SD 57102

Dear Mr. Lacey:

This letter is in response to our phone conversation on April 23, 1992. Enclosed are copies of Vested Water Right Nos. 211-3, 212-3, and 213-3; inspection notes by Tom Brandner; a map prepared from the inspection; and the water rights laws.

The copies of the vested right claims include each application as filed and the water license issued for each claim. Based on the inspection results, a map was prepared. The map outlines in red the acreage being irrigated (252 acres) and also shows the location of the pipelines in orange.

The statutes pertaining to validation of Mr. Lacey's vested right claims are South Dakota Codified Laws 46-2A-16 through 46-2A-18 (pages 27 and 28). The reduction in the diversion rate from 4.65 cubic feet of water per second (cfs) to 3.6 cfs is based on SDCL 46-5-6 (page 39). The acreage (252 acres) divided by 70 are the figures used to arrive at the 3.6 cfs figure.

You are welcome to attend the hearing in Pierre on May 6, 1992; however, if you agree with the contents of the notice dated April 15, 1992, there is no need to make the trip. The Water Management Board will validate the claim as recommended in the notice. Please let me know if you have any problems with the recommendation, we may be able to address your concerns and save you a trip to Pierre.

Sincerely,

Ron Duvall
Natural Resources Engineer

RE: Validation of Vested Right Claims 211-3, 212-3 & 213-3

COMMENTS:

Mr. Lacey called me at home on the evening of April 30, 1992.
He was concerned that we are recommending a reduction in the
diversion rate for the three claims. He is unable to attend the
WWRB meeting on May 6th due to corn planting. The higher
diversion rate is needed due to the sandy type soil. I told
him I would check on the situation and call him at 1:00 p.m.
on May 1st.

Called Mr. Lacey @ 1:30 p.m. on May 1st. Told him that
we would recommend validation of the three Vested Right
claims at a diversion rate of 4.65 cfs. This exceeds the
allowable rate (by statute) of 3.6 cfs by 1.65 cfs. The reason
for recommending the 4.65 cfs is that the soil is very
sandy and the configuration of the fields requires more time
to irrigate. I also told him that we would incorporate the
three claims into one claim. Mr. Lacey agreed with all of
this.

File in Permit or other file as necessary. Use to document conversations and what the other party was told; why action or decision was made.
